The Changing Land, 2004 Mount Fuji H. Byron Earhart, 2015-07-15 Illustrated with color and black and white images of the mountain and its associated religious practices H Byron Earhart's study utilizes his decades of fieldwork including climbing Fuji with three pilgrimage groups and his research into Japanese and Western sources to offer a comprehensive overview of the evolving imagery of Mount Fuji from ancient times to the present day Included in the book is a link to his twenty-eight minute streaming video documentary of Fuji pilgrimage and practice Fuji Sacred Mountain of Japan Beginning with early reflections on the beauty and power associated with the mountain in medieval Japanese literature Earhart examines how these qualities fostered spiritual practices such as Shugendo which established rituals and a temple complex at the mountain as a portal to an ascetic otherworld As a focus of worship the mountain became a source of spiritual insight rebirth and prophecy through the practitioners Kakugyo and Jikigyo whose teachings led to social movements such as Fujido the way of Fuji and to a variety of pilgrimage confraternities making images and replicas of the mountain for use in local rituals Earhart shows how the seventeenth century commodification of Mount Fuji inspired powerful interpretive renderings of the peerless mountain of Japan such as those of the nineteenth century print masters Hiroshige and Hokusai which were largely responsible for creating the international reputation of Mount Fuji In the

eighteenth and nineteenth centuries images of Fuji served as an expression of a unique and superior Japanese culture. With its distinctive shape firmly embedded in Japanese culture but its ethical ritual and spiritual associations made malleable over time, Mount Fuji came to symbolize ultranationalistic ambitions in the 1930s and early 1940s, peacetime democracy as early as 1946, and a host of artistic, naturalistic, and commercial causes, even the exotic and erotic, in the decades since. *Sacred Landscapes in Antiquity* Ralph Haussler, Gian Franco Chiai, 2020-07-31

From generation to generation, people experience their landscapes differently. Humans depend on their natural environment; it shapes their behavior, while it is often felt that deities responsible for both natural benefits and natural calamities, such as droughts, famines, floods, and landslides, need to be appeased. We presume that in many societies, lakes, rivers, rocks, mountains, caves, and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes, and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end, as different societies had very different understandings, beliefs, and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality, and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were rewritten, adapted, and redefined in the course of time to suit new cultural, political, and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed, and monumentalized, especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative, human-made, seemingly non-natural landscape with perfectly astronomically aligned buildings that define a cosmological order. *Sacred Landscapes* therefore aims to analyze the complex links between landscape, religiosity, and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual, and historical perspective. **Re: Action** Hani Rashid, 2023-05-08
