Muddling Toward Frugality:

Muddling Toward Frugality Warren Johnson, 2010-07 Mr Johnson's thesis can be summarized without much difficulty after generations of extravagant and reckless industrial expansion we are clearly entering an age of economic scarcity While human demands continue to rise natural resources especially the non renewable kind become harder to find and more expensive to extract process transport and distribute This simple brute fact is the basic cause of inflation despite the inability of most professional economists to see it The dismal science has never been more dismally obtuse than it is today The law of diminishing returns is coming into effect Technological developments can delay the process but not halt or reverse it nor can we rely on government or big business to save us Planning for further growth delays the adjustments that must be made makes a fair sharing of necessary sacrifices more troublesome and if carried too far will make more severe and painful because rapid the inevitable decline of the international economic machine The best way to deal with the end of affluence is to accept it not fight it and to begin here and now the unavoidable adaptations on an individual family and community basis Piecemeal experimental and muddling

Muddling Toward Frugality Warren A. Johnson, 1979 Foresees the social and economic benefits of the energy crisis as Americans are forced to alter lifestyles increase self sufficiency and strengthen communities when geographic mobility is reduced

The Ecotechnic Future John Michael Greer, 2009-10-01 In response to the coming impact of peak oil John Michael Greer helps us envision the transition from an industrial society to a sustainable ecotechnic world not returning to the past but creating a society that supports relatively advanced technology on a sustainable resource base Fusing human ecology and history this book challenges assumptions held by mainstream and alternative thinkers about the evolution of human societies Human societies like ecosystems evolve in complex and unpredictable ways making it futile to try to impose rigid ideological forms on the patterns of evolutionary change Instead social change must explore many pathways over which we have no control The

troubling and exhilarating prospect of an open ended future he proposes requires dissensus a deliberate acceptance of radical diversity that widens the range of potential approaches to infinity Written in three parts the book places the present crisis of the industrial world in its historical and ecological context in part one part two explores the toolkit for Ecotechnic Age and part three opens a door to the complexity of future visions For anyone concerned about peak oil and the future of the industrial society this book provides a solid analysis of how we got to where we are and a practical toolkit to prepare for the future

Liberating the Church Howard A. Snyder,1996-12-03 The Church gets into trouble whenever it thinks it is in the church business rather than the Kingdom business In the church business people are concerned with Kingdom activities all human behavior and everything God has made Church people think about how to get people into the church Kingdom people think about how to get the church into the world

Rethinking Freire and Illich Rosa Bruno-Jofré, Michael Attridge, Jon Igelmo Zaldívar, 2023-10-02 Marking the fiftieth anniversary of two of the most influential books in modern educational and social theory *Rethinking Freire and Illich* introduces readers to the results of the symposium of Paulo Freire's *Pedagogy of the Oppressed* and Ivan Illich's *Deschooling Society*. The collection uniquely analyses Freire and Illich together although not in a comparative way. It acknowledges that both Freire and Illich led in different ways to a new approach to perceiving and understanding the concept of liberation as a human condition while also presenting current criticisms of their work from a gendered perspective and by Indigenous scholars in the US and Canada. Drawing on contributions from historians of education, theologians, digital experts and philosophers of education, the book offers a historical analysis using extensive primary sources and an originality of topics. It introduces the ways in which the current generation reads the overall works of Freire and Illich in the search for a reconstructed democratic education. As a result, *Rethinking Freire and Illich* presents Freire and Illich in light of contemporary issues in this generation and offers renewed searches for a good and just life and a reconstructed democratic education.
