New Majority Adult Learners:

The New Majority Duncan Campbell, 1984 No description Serving the New Majority Student Eric Malm, Marguerite Weber, 2018-03-06 Much of higher education was originally designed to meet the needs of full time 18-22 year old students who enter directly from high school. However, the New Majority of our students are older, likely to swirl among institutions and have significant adult responsibilities outside of the classroom. The New Majority Student Working from Within to Transform Higher Education is a call to transform colleges and universities to meet the academic and student experience needs of New Majority students and for adult educators to become advocates, allies, and resources for needed reforms. Book contributors including faculty, staff, and administrators at public, private, and community colleges provide insights for this transformation. The book utilizes a business perspective to academic transformation, providing a guide to how universities can redefine and restructure their education product to meet student needs. Taking a Human-Centered Design approach, the contributors provide frameworks and examples of how institutions can reallocate technology effort, internal/external student faculty, and finances to reimagine programs and ensure long-term institutional health.

Adult Learners On Campus H.B. Slotnick, Mary Helen Pelton, Mary Lou Fuller, Lila Tabor, 2005-06-21 The opportunity for a second chance is a growing phenomenon. Some members of the Adult Learners Consulting Group, a dozen or so faculty and graduate students at the University of Dakota who have a general interest in the related processes of learning and teaching, investigated the specific concern about the ways older than average students learn and the instructional methods most appropriate for them. They recognized that for both the older student and the teacher of the older student, there are problems and issues that are different from the average student or student-teacher relationship. In addition to presenting an integrated picture of adult learners on campus, this book also provides some teaching techniques that can be used in the classroom tomorrow. It is aimed at teachers in further and adult education, trainers in all disciplines, researchers in adult and continuing education.

One of those changes is a rise in adult learners in higher education. In order to cope with this particular change and set their classrooms up for success, it is vital for educators to be aware of and fluent in adult instructional strategies. Outcome-Based Strategies for Adult Learning provides emerging research exploring the theoretical and practical aspects of nontraditional education and applications within curriculum development and instructional design. Featuring coverage on a broad range of topics such as experiential learning, instructional design, and formative assessment, this book is ideally designed for educators, academicians, educational professionals, researchers, and upper-level students seeking current research on how instructional strategies can be tied to assessment.
