Elizabeth Wissinger,2015-09-18 Over the last four decades the fashion modeling industry has become a lightning rod for debates about Western beauty ideals the sexual objectification of women and consumer desire Yet fashion models still captivate embodying all that is cool glam hip and desirable They are a fixture in tabloids magazines fashion blogs and television Why exactly are models so appealing And how do these women succeed in so soundly holding our attention In This Year s Model Elizabeth Wissinger weaves together in depth interviews and research at model castings photo shoots and runway shows to offer a glimpse into the life of the model throughout the 20th and 21st centuries Once an ad hoc occupation the model life now involves a great deal of physical and virtual management of the body or what Wissinger terms glamour labor Wissinger argues that glamour labor the specialized modeling work of self styling crafting a look and building an image has been amplified by the rise of digital media as new technologies make tinkering with the body s form and image easy Models can now present self fashioning self surveillance and self branding as essential behaviors for anyone who is truly in the know and in fashion Countless regular people make it their mission to achieve this ideal not realizing that technology is key to creating the unattainable standard of beauty the model upholds and as Wissinger argues this has been the case for decades before Photoshop even existed Both a vividly illustrated historical survey and an incisive critique of fashion media This Year s Model demonstrates the lasting cultural influence of this unique form of embodied labor Fashion and Film

Modeling for Information Retrieval W. Bruce Croft,John Lafferty,2013-04-17 A statisticallanguage model or more simply a language model is a prob abilistic mechanism for generating text Such adefinition is general enough to include an endless

variety of schemes However a distinction should be made between generative models which can in principle be used to synthesize artificial text and discriminative techniques to classify text into predefined categories The first statistical language modeler was Claude Shannon In exploring the application of his newly founded theory of information to human language Shannon considered language as a statistical source and measured how well simple n gram models predicted or equivalently compressed natural text To do this he estimated the entropy of English through experiments with human subjects and also estimated the cross entropy of the n gram models on natural text The ability of language models to be quantitatively evaluated in this way is one of their important virtues Of course estimating the true entropy of language is an elusive goal aiming at many moving targets since language is so varied and evolves so quickly Yet fifty years after Shannon's study language models remain by all measures far from the Shannon entropy limit in terms of their predictive power However this has not kept them from being useful for a variety of text processing tasks and moreover can be viewed as encouragement that there is still great room for improvement in statistical language modeling

The IPINIONS Journal Anthony Hall, 2008-04 ANTHONY LIVINGSTON HALL COMMENTS ON Bush's legacy of support for Africa I was dismayed by the number of people who refused to believe that Bush had done more for Africa than any other US president notwithstanding testimonials I proffered from renowned crusaders for African development like Sir Bob Geldof and Bono to support this claim Oprah's school for African girls I applaud Oprah for founding this school for the same reason I applauded Madonna for adopting that African boy She is fulfilling a need which honors our shared humanity in a way that few of us can afford or are even conscientious enough to do Native Americans ethnically cleansing blacks from their tribes Indeed I do marvel at this curious thing that they would rather be condemned as racists for expelling blacks than be criticized as niggards for hoarding their gambling loot French President Nicolas Sarkozy's love affair with the US Sarkozy displays a Blairite affinity for America that any self-respecting Frenchman must find particularly galling Bungled terrorist attacks in London and Glasgow Wannabe suicide bombers rammed their jeep packed with explosives into Glasgow Airport on Saturday morning shouting Allah Allah Allah no doubt hoping to go off in a blaze of glory for eternal assignments with their apocryphal 72 virgins Steroids in baseball In fact steroid use has flourished in baseball and other professional sports pursuant to an open conspiracy among players and team owners to feed the gladiatorial lust of fans who want to see bigger stronger and faster cyborgs perform for their atavistic enjoyment
