New Dialectics and Political Economy R. Albritton, J. Simoulidis, 2002-11-29 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity

Capitalism and the Dialectic John Bell, 2009-10-15 An introduction and exposition to the Uno approach of Marx's work

Political Economy and Global Capitalism Robert Albritton, Bob Jessop, Richard Westra, 2010 This volume brings together original and timely writings by internationally renowned scholars that reflect on the current trajectories of global capitalism and in the light of these consider likely possible or desirable futures It offers theory informed writing that contextualizes empirical research on current world historic events and trends with an eye towards realizing a future of human social and economic betterment

The New Dialectic and Marx's Capital Chris Arthur, 2021-08-04 This book argues that the dialectic of Marx's Capital has a systematic rather than historical character It sheds new light on Marx's great work while going beyond it in many respects

[Dialectics and Deconstruction in Political Economy](#) R. Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

Political Economy and Globalization Richard Westra, 2009-09-30 This book provides an analysis of capitalism's world historic phases of development a critique of the globalization literature and a re examination of Marxian debates over the rise

of capitalism **Constructing Change: A Political Economy of Housing and Electricity Provision in Turkey** Ezgi B. Ünsal, 2021-07-05 In *Constructing Change* Ezgi B. Ünsal provides a political economy of electricity and housing provision in Turkey. By using the case studies of electricity and housing in Turkey, the book explores how social provision is increasingly commodified across the globe as a defining feature of financialisation. Distinguishing this trend from macroeconomic definitions of financialisation, the book offers a contextual narrative of economic change in Turkey with undetermined macroeconomic outcomes. It contributes to the literature on the financialisation of social provision and the political economy of Turkey by confirming the increasing influence of finance on social provision sectors, making them prone to volatility while contributing to their growth at the same time.

A Political Economy of the Senses Anita Chari, 2015-10-13 Anita Chari revives the concept of reification from Marx and the Frankfurt School to spotlight the resistance to neoliberal capitalism now forming at the level of political economy and at the more sensate experiential level of subjective transformation. Reading art by Oliver Ressler, Zanny Begg, Claire Fontaine, Jason Lazarus, and Mika Rottenberg, as well as the politics of Occupy Wall Street, Chari identifies practices through which artists and activists have challenged neoliberalism's social and political logics, exposing its inherent tensions and contradictions.

Capitalism and the Dialectic John R. Bell, 2009-09-07 From the 1960s to the 1990s, the ground-breaking Japanese economists Kozo Uno and Thomas Sekine developed a masterful reconfiguration of Marxist economics. The most well-known aspect of which is the levels of analysis approach to the study of capitalism. Written in Japanese, the Uno-Sekine approach to Marx's work is little understood in the West. John Bell seeks to correct this, explaining how problematic elements of Marxian Political Economy, such as the law of value and the law of relative surplus population, can be solved by using a more rigorous dialectical analysis. Bell's clear and accessible synthesis provides economists with the tools to interrogate capitalism in a more powerful way than ever before.

Value and the World Economy Today R. Westra, A. Zuege, 2003-11-30 *Value and the World Economy Today* brings together a diverse group of globally renowned scholars of international political economy and critical economics to examine the relevance of value theory for understanding the world economy today. The book is unique in the way that it connects literatures that have for the most part developed in isolation from each other and therefore brings questions of theory to bear directly upon the problems of analyzing current global trends and formulating responses to them.

The Political Economy of Fortune and Misfortune Scott Timcke, 2023-03-31 Luck greatly influences a person's quality of life. Yet little of our politics looks at how institutions can amplify good or bad luck that widens social inequality. But societies can change their fortune. Too often debates about inequality focus on the accuracy of data or modelling while missing the greater point about ethics and exploitation. In the wake of growing disparity between the 1% and other classes, this book combines philosophical insights with social theory to offer a much-needed political economy of life chances. Timcke advances new thought on the role luck plays in redistributive justice in 21st-century capitalism.

Economics Transformed Robert Albritton, 2007-05-20 Is Marx relevant? Bringing to life

the classic concepts in Marx's economic thought Robert Albritton shows that he offers great potential for study Deeply critical of the way economics is taught and studied today this is a textbook that will appeal to anyone who wants a forward thinking approach to the discipline that's free from the constraints of neo classical orthodoxy Taking up key aspects of Marx's work including surplus value theory dialectical reasoning and the commodity form Albritton highlights their relevance in the modern world and explains why mainstream economics has been so blind to their revolutionary potential Written with style and clarity it is perfect for economics undergraduates [The Political Economy of Digital Monopolies](#) Paško Bilić, Toni Prug, Mislav Žitko, 2021-07-16 As outrage over the socially damaging practices of technology companies intensifies this book asks what it actually means to hold a monopoly in the tech world and offers an in depth analysis of how these corporate giants are produced financialized and regulated **The Dialectics of Liberty** Chris Matthew Sciabarra, Edward W. Younkins, Roger E. Bissell, 2019-06-04 This collection of essays explores the ways in which the defense of liberty can be bolstered by use of a dialectical method that is a mode of analysis devoted to grasping the full context of philosophical cultural and social factors requisite to the sustenance of human freedom Its strength lies in the variety of disciplines and perspectives represented by contributors who apply explicitly dialectical tools to a classical liberal libertarian analysis of social and cultural issues In its conjoining of a dialectical method typically associated with the socialist left to a defense of individual liberty typically associated with the libertarian right this anthology challenges contemporary attitudes on both ends of the political spectrum Though this conjunction of dialectics and liberty has been explored before in several works including a trilogy of books written by one of our coeditors Chris Matthew Sciabarra this volume will be the first one of its kind to bring together accomplished scholars in political science economics philosophy aesthetics psychology law history education and rhetoric *From Political Economy to Economics* Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and

their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future

Revitalizing Causality Ruth Groff,2007-12-18 This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms or powers in the context of offering a causal explanation A unique collection it offers the reader various disciplinary and inter disciplinary divides helping to stake out a new neo Aristotelian position within contemporary debate

Hegel's Dialectical Political Economy Paul Diesing,2019-03-01 This book demonstrates how Hegel s dialectic can be used in empirical research and shows how one can do dialectical research in economics It also shows how one can use dialectical thinking to interpret some personal or social or political problem and devise a possible solution

Marx's Capital, Method and Revolutionary Subjectivity Guido Starosta,2015-11-24 In Marx s Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i e capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content
