Pathology of the Mesothelium John S.P.

Jones,2012-12-06 Many books have been written about the pathology of the major organs of the body such as the lungs heart gastrointestinal tract etc Included in these are descriptions often with a minor emphasis of pathological conditions which affect their serosal surfaces In this book I have endeavoured to reverse the process and treat the mesothelium as an organ in its own right rather than being the no man s land between various major structures A number of pathological conditions are common to the coverings of the three major body cavities the pleura pericardium and peritoneum while some abnormalities are exclusive to one or other sites I hope that the contents of this book cover a broad enough spectrum of mesothelial diseases to be of help to service pathologists who are ever increasingly being asked to make diagnoses particularly on small biopsies of pleural and peritoneal tissues It is also my hope that the various aspects of the subject have been dealt with in sufficient depth to be of use to pathol ogists engaged in teaching and research and to those whose interests lie in the structure and function of the mesothelium There is still much to be learned in understanding the way the mesothelium behaves in the realm of both inflammatory response and tumour formation If this book provides a stimulus to furthering research in these fields I feel it will have achieved its objective

Colour Atlas of Mesothelioma

J.S.P. Jones,C. Lund,H.T. Planteydt,2012-12-06 by W J Hunter In 1977 a report of a Working Group of experts prepared for the Commission of the European Communities was published entitled Public Health Risks of Exposure to Asbestos EUR 5653e 1 This report contained several conclusions and recommendations one of the latter stated that a mesothelioma register should be set up in those countries of the EEC where none exist in accordance with criteria and procedures agreed upon by a panel of pathologists Acting upon this

recommendation the Commission established a C E C Mesothelioma Panel which has as one of its basic objectives the standardization of the pathological diagnosis of mesotheliomas by exchange of information between members of National Panels Since its establishment several meetings have been held and much useful information has been exchanged This work has been underlined by the adoption by the Council of Ministers of a Directive on the protection of workers from the risks related to asbestos at work which requires Member States to keep a register of recognized cases of mesothelioma To assist Member States in the establishment of such registers the Commission of the European Communities considered it would be useful for an illustrated book on mesotheliomas to be prepared Three pathologists who are members of the C E C

Mesothelioma Panel have undertaken this task and this publication is the result **Atlas of Pulmonary Pathology** Yasmeen Mahmood Butt, Henry D. Updates in Diagnostic Pathology David C. Chhieng, Gene P. Siegal, 2007-05-31 by CDs but we continue to utilize the same general format of morning didactics and afternoon glass slide review and small group interactions One of our biggest successes was in the ever expanding set of didactic lecture notes and radiologic gross microscopic ultrastructural and other images that course participants received so it wasn't much of a surprise when we were approached by the publisher to consider creating an updated compilation of some of the best talks and packaging them in a monograph available to a broader population of physicians and scientists With the extraordinary attention to detail that he is known for my co editor David Chhieng has been both the brains and the brawn of this project resulting in the bringing together of such a collection while trying to be sensitive and representative of the various branches of pathology reflected in

the actual course From surgical pathology chapters cover select topics in endocrine gynecologic GU and GI pathology with contributions from Walter Bell Michael Conner Katrin Klemm and Audrey Lazenby respectively Tom Winokur has begun to prepare us for the near future with a treatise on molecular markers in breast cancer The interactive nature of cytopathology and surgical pathology are brought together by Claudia Castro now at the U T Medical Branch at Galveston and David Chhieng in three chapters covering mediastinal pleural and pulmonary pathology
