Principles and Practice of Geriatric Surgery Ronnie Ann Rosenthal, Michael E. Zenilman, Mark R. Katlic, 2013-06-29 More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate

Functional Neurobiology of Aging Patrick R. Hof, Charles V. Mobbs, 2001-01-11 Some well known age related neurological diseases include Parkinson's disease Alzheimer's disease deafness and blindness Even more common are the problems of aging which are not due to disease but to more subtle impairments in neurobiological systems including impairments in vision memory loss muscle weakening and loss of reproductive functions changes in body weight and sleeplessness As the average age of our society increases diseases of aging continue to become more common and conditions associated with aging need more attention by doctors and researchers In 1991 patients over the age of 65 saw their doctors an average of eight times per year Research funding is provided by the Neuroscience and Neuropsychology of Aging NNA Program which is run by the National Institute on Aging This book offers a comprehensive overview of all topics related to functional impairments which are related to the aging

brain and nervous system It is organized according to four general functions movement senses memory and neuroendocrine regulation Written by the leading researchers in the field this comprehensive work addresses both impairments associated with diseases and not associated with diseases making it easier to understand the mechanisms involved Functional Neurobiology of Aging is an important reference for professionals and students involved in aging research as well as physicians who need to recognize and understand age related impairments Organized by function making it easy to find and understand the material Addresses impairments both associated with diseases and not associated with diseases Written by leading researchers in the field Most comprehensive source of information on the neurobiology of aging **Parkinson's**
