Pathways Through Adolescence:

Pathways Through Adolescence Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention

Pathways to Ruin? Erin Gibbs Van Brunschot, Tamara Humphrey, 2022-05-30 Individuals who have committed a number of crimes over their lifetimes have had complex multi faceted life experiences often characterized by extreme disadvantage and victimization Those who are formally designated as high risk by the Canadian criminal justice system often have a record of violent or sexual crimes As a result they are usually subject to additional monitoring in the community after completing a prison sentence *Pathways to Ruin* disentangles the numerous elements and pathways that lead to high rates of reoffending by focusing on developmental periods of childhood adolescence and adulthood The book uses a case study approach to consider individuals entire crime pathway by examining the circumstances and factors that contribute to assumptions or official designations of high risk behaviour Erin Gibbs Van Brunschot and Tamara Humphrey overhaul society s popular crime narratives and instead draw on sociological and criminological perspectives to identify historical social and personal contexts that appear to increase the likelihood of reoffending They also consider how negative life experiences may be addressed to circumvent trajectories of serious offending Reducing the social distance that the law abiding public may feel towards marginalized groups *Pathways to Ruin* details how legal systems could better serve these individuals and acknowledges the many missed opportunities for compassion

Pathways to Sexual Aggression Jean Proulx, Eric Beauregard, Patrick Lussier, Benoit Leclerc, 2014-03-14 Most people who read an article in the newspaper about the brutal rape of a woman by a stranger or the long standing sexual abuse of a young boy by his step father have a strong visceral reaction which is a mix of anger fear and incomprehension Apart from these aversive reactions several questions also come

to people's minds Was this offender crazy or sexually obsessed What is the purpose of such outrageous acts To answer these questions the authors of this book review theoretical and empirical models of the processes that lead men to sexually assault children or women whilst also presenting new results and models on this topic In particular this book focuses on empirical analyses of the pathways of six types of sexual aggressors three of which marital rapists hebephilic sexual aggressors and polymorphic sexual aggressors have never been investigated before Drawing on a large dataset on the offending processes of sexual aggressors this book analyzes the influence of personality factors and lifestyle factors on offending pathways and brings together key researchers in the field of sexual aggression This book will be of interest to psychologists psychiatrists criminologists and social workers involved in the study assessment and treatment of sexual aggressors In addition this information will be crucial for practitioners involved in the follow up of these offenders in the community and will interest researchers and graduate students in the field of sexual aggression
