

Patient and Family Education, Counseling, and Therapy

- Patient education is one of the most important responsibilities that medical social workers have in health care settings.
- Grappling with a disease, injury or other medical condition can be confusing and deeply stressful for patients and their loved ones.
- Medical social workers explain to patients the causes, effects and progression of their illness. After receiving information about patients' treatment options from the medical team, medical social workers also communicate and discuss these options with patients and their families.
- They also provide updates to patients and their families regarding any changes in their treatment plan.
