Coolidge, 1989 Philip Johnson and the Museum of Modern Art Philip Johnson, 1998 This volume focuses on the architect Philip Johnson s long association with The Museum of Modern Art with essays examining his roles as patron as curator and as the institution s unofficial architect from the late 1940s to the early 1970s **The Art Museum from Boullée to Bilbao** Andrew McClellan, 2008-01-02 Art museums cases of beauty and calm in a fast paced world have emerged in recent decades as the most vibrant and popular of all cultural institutions But as they have become more popular their direction and values have been contested as never before This engaging thematic history of the art museum from its inception in the eighteenth century to the present offers an essential framework for understanding contemporary debates as they have evolved in Europe and the United States **The Museums of Contemporary Art** J. Pedro Lorente, 2016-03-03 Where how by whom and for what were the first museums of contemporary art created These are the key questions addressed by J Pedro Lorente in this new book In it he explores the concept and history of museums of contemporary art and the shifting ways in which they have been imagined and presented Following an introduction that sets out the historiography and considering questions of terminology the first part of the book then examines the paradigm of the Musée des Artistes Vivants in Paris and its equivalents in the rest of Europe during the nineteenth century The second part takes the story forward from 1930 to the present presenting New York s Museum of Modern Art as a new universal role model that found emulators or contramodels in the rest of the Western world during the twentieth century An epilogue reviews recent museum developments in the last decades Through its adoption of a long term worldwide perspective the book not only provides a narrative of the development of museums of contemporary art but also sets this into its international perspective By assessing the extent to which the great museum capitals Paris London and New York in particular created their own models of museum provision as well as acknowledging the influence of such models elsewhere the book uncovers fascinating perspectives on the practice of museum provision and reveals how present cultural planning initiatives have often been shaped by historical uses The Architecture of Art Museums Ronnie Self, 2014-04-16 As a building type art museums are unparalleled for the opportunities they provide for architectural investigation and experimentation They are frequently key components of urban revitalization and often push the limits of building technology Art museums are places of pleasure education and contemplation They are remarkable by their prominence and sheer quantity and their lessons are useful for all

architects and for all building types This book provides explicit and comprehensive coverage of the most important museums built in the first ten years of the 21st Century in the United States and Europe By dissecting and analyzing each case Ronnie Self allows the reader to get under the skin of each design and fully understand the process behind these remarkable buildings Richly designed with full technical illustrations and sections the book includes the work of Tadao Ando Zaha Hadid Peter Cook Colin Fournier Renzo Piano Yoshi Taniguchi Herzog de Meuron Jean Nouvel SANAA Daniel Libeskind Diller Scofidio Renfro Steven Holl Coop Himmelblau Bernard Tschumi Sauerbruch Hutton and Shigeru Ban Jean de Gastines Together these diverse projects provide a catalogue of design solutions for the contemporary museum and a snapshot of current architectural thought and culture One of few books on this subject written by an architect Self's analysis thoroughly and critically appraises each project from multiple aspects and crucially takes the reader from concept to building This is an essential book for any professional engaged in designing a museum
