Pattern Recognition and Image Processing presents a comprehensive introduction of the use of fuzzy models in pattern recognition and selected topics in image processing and computer vision. Unique to this volume in the Kluwer Handbooks of Fuzzy Sets Series is the fact that this book was written in its entirety by its four authors. A single notation presentation style and purpose are used throughout. The result is an extensive unified treatment of many fuzzy models for pattern recognition. The main topics are clustering and classifier design with extensive material on feature analysis, relational clustering, image processing and computer vision. Also included are numerous figures, images and numerical examples that illustrate the use of various models involving applications in medicine, character and word recognition, remote sensing, military image analysis and industrial engineering. **Proceedings IEEE Computer Society, 1977** **Progress in Pattern Recognition, Image**

Analysis, Computer Vision, and Applications Isabelle Bloch, Roberto M. Cesar, Jr., 2010-11-02. Pattern recognition is a central topic in contemporary computer sciences with continuously evolving topics, challenges and methods including machine learning, content based image retrieval and model and knowledge based approaches, just to name a few. The Iberoamerican Congress on Pattern Recognition CIARP has become established as a high quality conference highlighting the recent evolution of the domain. These proceedings include all papers presented during the 15th edition of this conference held in Sao Paulo, Brazil in November 2010. As was the case for previous conferences, CIARP 2010 attracted participants from around the world with the aim of promoting and disseminating going research on mathematical methods and computing techniques for pattern recognition, computer vision, image analysis and speech recognition as well as their applications in such diverse areas as robotics, health, entertainment, space exploration, telecommunications, data mining, document analysis and natural language processing and recognition, to name only a few of them. Moreover, it provided a forum for scientific research, experience exchange, sharing new knowledge and increasing cooperation between research groups in pattern recognition and related areas. It is important to underline that these conferences have contributed significantly to the growth of national associations for pattern recognition in the Iberoamerican region, all of them as members of the International Association for Pattern Recognition IAPR. **Progress in Pattern Recognition, Image Analysis, Computer Vision, and**
