Pattern Of Collective Violence In A Provincial City:

Collective Violence in a Provincial City D. Parthasarathy, 1997 Drawing On A Vast Body Of Sociological Literature This Book Gives On Entirely New Focus To The Concept Of Collective Violence **Education and Hegemony** Nagaraju Gundemeda, 2014-10-02 Globalization is a multidimensional concept that encompasses the politico economic socio cultural and educational spheres of contemporary societies across time and space The ideological convictions and methodological subscriptions of social scientists guide the discourse on globalization to unravel the meanings and implications for institutions individuals and social groups in shaping and changing their everyday life experiences Globalization unleashed major lessons and has played a key role in shaping the educational systems of developing countries including India In this context this book 1 maps the multiple epistemological traditions to approach the conceptual formulations of the globalization of education 2 examines the socioeconomic context of the globalization of education in India 3 analyzes the local responses to processes associated with the knowledge discourse and 4 examines the relation between the globalization of education and its implications on the functioning of institutional structures such as caste class gender marriage in general and the education system in particular The book proposes various secondary readings and empirical observations of the global political and regional social economies that have in fact been guiding the Indian education system The institutional engagement with globalization needs to be located within the framework of social mobility either to extend or retain the social position of groups within the current social hierarchy This book proposes that the globalization of education not only hegemonizes the nature and direction of education but also hierarchizes the production and consumption of knowledge systems The hierarchical knowledge system tends to legitimize market driven education by simultaneously marginalizing the other multiple streams of knowledge systems The marginalisation of liberal knowledge creates a one dimensional pedagogy which tends to erase the tradition of critical reasoning which questions the oppressive elements of the state and suppressive values of the civil society Explaining Collective Violence in Contemporary Indonesia Z. Tadjoeeddin, 2014-05-07 Tadjoeeddin uniquely explores four types of violent conflicts pertinent to contemporary Indonesia secessionist ethnic routine everyday and electoral violence and seeks to discover what socio economic development can do to overcome conflict and make the country s transition to democracy safe for its constituencies **Communal Violence and Democratization in Indonesia** Gerry van Klinken, 2007-01-24 Through close scrutiny of empirical materials and interviews this book uniquely analyzes all the episodes of long running widespread communal violence that erupted during Indonesia s post New Order transition Indonesia democratised after the long and authoritarian New Order regime ended in May 1998 But the transition was far less peaceful than is often thought It claimed about 10 000 lives in communal ethnic and religious violence and nearly as many as that again in separatist violence in Aceh and East Timor Taking a comprehensive look at the communal violence that arose after the New Order regime this book will be of interest to students of Southeast Asian studies social movements political

violence and ethnicity Sociology and Social Anthropology in India Yogesh Atal,2009 The Indian Council of Social Science Research the premier organization for social science research in India conducts periodic surveys in the major disciplines of the social sciences to assess disciplinary developments as well as to identify gaps in research in these disciplines **Mean Streets** Jonathan Crush,Abel Chikanda,2015-11-16 This book powerfully demonstrates that some of the most resourceful entrepreneurs in the South African informal economy are migrants and refugees Yet far from being lauded they take their life into their hands when they trade on South Africas mean streets The book draws attention to what they bring to their adopted country through research into previously unexamined areas of migrant entrepreneurship Ranging from studies of how migrants have created agglomeration economies in Jeppe and Ivory Park in Johannesburg to guanxi networks of Chinese entrepreneurs to competition and cooperation among Somali shop owners to cross border informal traders to the informal transport operators between South Africa and Zimbabwe the chapters in this book reveal the positive economic contributions of migrants these include generating employment paying rents providing cheaper goods to poor consumers and supporting formal sector wholesalers and retailers As well Mean Streets highlights the xenophobic responses to migrant and refugee entrepreneurs and the challenges they face in running a successful business on the streets **The Institutional Origins of Communal Violence** Yuhki Tajima,2014-07-28 This book develops a novel theoretical explanation for why transitions from authoritarian rule are often marked by spikes in communal violence **Economic and Political Weekly** ,2006 **ICSSR Journal of Abstracts and Reviews** Indian Council of Social Science Research,1999 Connected Histories of the Roman Civil Wars (88-30 BCE) David García Domínguez,Juan García González,Federico Santangelo,2024-11-04 This book offers a distinctive take on the civil wars that unfolded in the Late Roman Republic It frames their discussion against the backdrop of the Mediterranean contexts in which they were fought and sets out to bring to the centre of the debate the significance of provincial agency on a traumatic and complex process which cannot be understood through an exclusive focus on Roman and Italian developments The study of the late Republican civil wars can be productively read as an exercise of connected history in which the fundamental interdependence of the Mediterranean world comes to the fore through a set of case studies that await to be understood through a properly integrative approach Our project brings together an international and diverse lineup of scholars who engage with a wide range of literary documentary and archaeological material and make a collective contribution to the reframing of a problem that requires a collaborative and interdisciplinary outlook and can yield invaluable insights to the understanding of the Roman imperial project
