Structure Analysis by Electron Diffraction B. K. Vainshtein, 2013-10-22 *Structure Analysis by Electron Diffraction* focuses on the theory and practice of studying the atomic structure of crystalline substances through electron diffraction The publication first offers information on diffraction methods in structure analysis and the geometrical theory of electron diffraction patterns Discussions focus on the fundamental concepts of the theory of scattering and structure analysis of crystals structure analysis by electron diffraction formation of spot electron diffraction patterns electron diffraction texture

patterns and polycrystalline electron diffraction patterns The text then ponders on intensities of reflections including atomic scattering temperature factor structure amplitude experimental measurements of intensity and review of equations for intensities of reflections in electron diffraction patterns The manuscript examines the Fourier methods in electron diffraction and experimental electron diffraction structure investigations Topics include the determination of the structure of the hydrated chlorides of transition metals structures of carbides and nitrides of certain metals and semi conducting alloys electron diffraction investigation of clay minerals and possibilities inherent in structure analysis by electron diffraction The book is a helpful source of data for readers interested in structure analysis by electron diffraction

Biologically Inspired Cooperative Computing Yi Pan, Franz J. Rammig, Hartmut Schmeck, Mauricio Solar, 2006-11-24 In the world of information technology it is no longer the computer in the classical sense where the majority of IT applications is executed computing is everywhere More than 20 billion processors have already been fabricated and the majority of them can be assumed to still be operational At the same time virtually every PC worldwide is connected via the Internet This combination of traditional and embedded computing creates an artifact of a complexity heterogeneity and volatility unmanageable by classical means Each of our technical artifacts with a built in processor can be seen as a Thing that Thinks a term introduced by MIT's ThingLab It can be expected that in the near future these billions of Things that Think will become an Internet of Things a term originating from ETH Zurich This means that we will be constantly surrounded by a virtual organism of Things that Think This organism needs novel adequate design evolution and management means which is also one of the core challenges addressed by the recent German priority research program on Organic Computing

Artificial Intelligence in Design '98 John S. Gero, Fay Sudweeks, 2012-12-06 The development of computational models of design founded on the artificial intelligence paradigm has provided an impetus for much of current design research As artificial intelligence has matured and developed new approaches so the impact of these new approaches on design research has been felt This can be seen in the way concepts from cognitive science has found their way into artificial intelligence and hence into design research And also in the way in which agent based systems are being incorporated into design systems In design research there is an increasing blurring between notions drawn from artificial intelligence and those drawn from cognitive science Whereas a number of years ago the focus was largely on applying artificial intelligence to designing as an activity thus treating designing as a form of problem solving today we are seeing a much wider variety of conceptions of the role of artificial intelligence in helping to model and comprehend designing as a process Thus we see papers in this volume which have as their focus the development or implementation of frameworks for artificial intelligence in design attempting to determine a unique locus for these ideas We see papers which attempt to find foundations for the development of tools based on the artificial intelligence paradigm often the foundations come from cognitive studies of human designers
