Patterns In The Void Why Nothing Is Important:

Patterns In The Void Sten Odenwald, 2002-06-18 *Patterns in the Void* examines the great dark matter and dark regions that pervade the universe from elementary particles to the immense areas of vacuum that make up most of deep space and everything that is or is not Like the void itself the book ranges in temporal and spatial scales from our human world down to the molecular and subatomic world and up into the farthest reaches of the expanding universe Building upon the great theories that broke through physics and biophysics in the twentieth century *Patterns in the Void* weaves the human element into understanding modern science telling stories of ancient sacrifices paranormal experiences purported alien abductions and more all part of the human dilemma to make sense about the vast unknown

Contemporary Natural Philosophy and Philosophies - Part 1 Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind
