*Vision, Race, and Modernity* Deborah Poole, 2021-08-10 Through an intensive examination of photographs and engravings from European Peruvian and U S archives Deborah Poole explores the role visual images and technologies have played in shaping modern understandings of race Vision Race and Modernity traces the subtle shifts that occurred in European and South American depictions of Andean Indians from the late eighteenth to the early twentieth centuries and explains how these shifts led to the modern concept of racial difference While Andean peoples were always

thought of as different by their European describers it was not until the early nineteenth century that European artists and scientists became interested in developing a unique visual and typological language for describing their physical features Poole suggests that this scientific or biological discourse of race cannot be understood outside a modern visual economy Although the book specifically documents the depictions of Andean peoples Poole s findings apply to the entire colonized world of the nineteenth century Poole presents a wide range of images from operas scientific expeditions nationalist projects and picturesque artists that both effectively elucidate her argument and contribute to an impressive history of photography Vision Race and Modernity is a fascinating attempt to study the changing terrain of racial theory as part of a broader reorganization of vision in European society and culture **Yeats Annual No. 3** Warwick Gould,2016-07-27 [Computer Vision – ECCV 2020](#) Andrea Vedaldi,Horst Bischof,Thomas Brox,Jan-Michael Frahm,2020-11-18 The 30 volume set comprising the LNCS books 12346 until 12375 constitutes the refereed proceedings of the 16th European Conference on Computer Vision ECCV 2020 which was planned to be held in Glasgow UK during August 23 28 2020 The conference was held virtually due to the COVID 19 pandemic The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions The papers deal with topics such as computer vision machine learning deep neural networks reinforcement learning object recognition image classification image processing object detection semantic segmentation human pose estimation 3d reconstruction stereo vision computational photography neural networks image coding image reconstruction object recognition motion estimation
