Different from the Others Cyd Sturgess, 2022-11-11 For much of Europe the interwar period was one of cultural expansion and diversion and increased visibility for lesbians While historical research on Germany during the period immediately after the First World War has been extensively studied by historians through the lens of gender and sexuality with an implicit emphasis on the masculine dimension of queer female sexuality the Dutch context has been virtually ignored Through careful and sensitive studies of medico social discourses media representations and literary depictions of queer femininity **Different from the Others** recovers the submerged history of queer feminine women in both Germany and the Netherlands Cyd Sturgess provides a theoretical analysis that makes key empirical contributions to the history of Dutch gays and lesbians while reframing our collective understanding of queer femininity more broadly

The Renaissance of Lesbianism in Early Modern England Valerie Traub, 2002-06-06 The Renaissance of Lesbianism in Early Modern England is the eagerly awaited study by the feminist scholar who was among the first to address the issue of early modern female homoeroticism Valerie Traub analyzes the representation of female female love desire and eroticism in a range of early modern discourses including poetry drama visual arts pornography and medicine

Contrary to the silence and invisibility typically ascribed to lesbianism in the Renaissance Traub argues that the early modern period witnessed an unprecedented proliferation of representations of such desire By means of sophisticated interpretations of a comprehensive set of texts the book not only charts a crucial shift in representations of female homoeroticism over the course of the seventeenth century but also offers a provocative genealogy of contemporary lesbianism A contribution to the history of sexuality and to feminist and queer theory the book addresses current theoretical preoccupations through the lens of historical inquiry *Myth of the Modern Homosexual* Rictor Norton,2016-10-06 With careful reasoning supported by wide ranging scholarship this study exposes the fallacies of social constructionist theories within lesbian and gay studies and makes a forceful case for the autonomy of queer identity and culture It presents evidence that queers are part of a centuries old history possessing a unified historical and cultural identity The volume reviews the fundamental historiographical issues about the nature of queer history arguing that a new generation of queer historians will need to abandon authoritarian dogma founded upon politically correct ideology rather than historical experience Norton offers a clear exposition of the evidence for ancient indigenous and pre modern queer cultural continuity revealing how knowledge of that history has been suppressed and censored and sets out the queer cultural essentialist position on the key topics of queer history role identity bisexuality orientation linguistics social control homophobia subcultures and kinship patterns **When Your Spouse Has a**
