Keesling,2017-05-03 In this book Catherine M Keesling lends new insight into the origins of civic honorific portraits that emerged at the end of the fifth century BC in ancient Greece Surveying the subjects motives and display contexts of Archaic and Classical portrait sculpture she demonstrates that the phenomenon of portrait representation in Greek culture is complex and without a single unifying history Bringing a multi disciplinary approach to the topic Keesling grounds her study in contemporary texts such as Herodotus Histories and situates portrait representation within the context of contemporary debates about the nature of arete excellence the value of historical commemoration and the relationship between the human individual and the gods and heroes She argues that often the goal of Classical portraiture was to link the individual to divine or heroic models Offering an overview of the role of portraits in Archaic and Classical Greece her study includes local histories of the development of Greek portraiture in sanctuaries such as Olympia Delphi and the Athenian Acropolis **Roman Art** Nancy Lorraine Thompson,Philippe De Montebello,John Kent Lydecker,Carlos A. Alcock,Mariana Egri,James F. D. Frakes,2016-05-01 The Roman Empire had a rich and multifaceted visual culture which was often variegated due to the sprawling geography of its provinces In this remarkable work of scholarship a group of international scholars has come together to find alternative ways to discuss the nature and development of the art and archaeology of the Roman provinces The result is a collection of nineteen compelling essays accompanied by carefully curated visual documentation seven detailed maps and an extensive bibliography organized around the four major themes of provincial contexts tradition and innovation networks and movements and local accents in an imperial context Easy assumptions about provincial dependence on metropolitan models give way to more complicated stories Similarities and divergences in local and regional responses to Rome appear but not always in predictable places and in far from predictable patterns The authors dismiss entrenched barriers between art and archaeology center and provinces even good art and bad art extending their observations well beyond the empire s boundaries and examining phenomena sites and monuments not often found in books about Roman art history or archaeology The book thus functions to encourage continued critical engagement with how scholars study the material past of the Roman Empire and indeed of imperial systems in general *Twelve Caesars* Mary Beard,2021-10-12

Scotton,2022-07-14 Early 20th century explorations of the Roman Forum at Ancient Corinth revealed a massive early imperial building now known as the Julian Basilica The structure stood on a podium over four meters high and it dominated the east end of the forum in size aspect and function until its destruction in the 4th century A D Within it was one of the largest known shrines to the imperial cult and the likely site of the imperial court of law for the Roman province of Achaia The basilica housed 11 or more large scale statues most likely to members of the Julio Claudian family including Augustus Augustus s heirs Gaius and Lucius and arguably Divus Iulius Germanicus Nero Caesar and Claudius as well as an altar to Divus Augustus and dedications to the genius Augusti the gens Augusta and other family members This richly illustrated volume provides a contextual study of this important building the remains of which were first published by Saul Weinberg in 1960 Corinth I 5 Scotton treats the architectural remains Vanderpool the sculptural remains and Roncaglia the epigraphical material each providing extensive catalogues with new photos in addition to color reconstructions of the basilica and its grand interior A History of the Ancient World Michael Ivanovitch Rostovtzeff,1927 **A Group of Roman Imperial**

Portraits at Corinth ... Emerson Howland Swift,1922 *The Educated Elite in 1 Corinthians* Robert Dutch,2005-06-04 This book examines the educated elite in 1 Corinthians through the development and application of an ancient education model The research reads Paul s text within the social world of early Christianity and uses social scientific criticism in reconstructing a model that is appropriate for first century Corinth Pauline scholars have used models to reconstruct elite education but this study highlights their oversight in recognising the relevancy of the Greek Gymnasium for education Topics are examined in 1 Corinthians to demonstrate where the model advances an understanding of Paul s interaction with the elite Corinthian Christians in the context of community conflict This study demonstrates the important contribution that this ancient education model makes in interpreting 1 Corinthians in a Graeco Roman context This is Volume 271 of JSNTS

The Cambridge Companion to the Age of Augustus Karl Galinsky,2005-10-10 The age of Augustus commonly dated to 30 BC AD 14 was a pivotal period in world history A time of tremendous change in Rome Italy and throughout the Mediterranean world many developments were underway when Augustus took charge and a recurring theme is the role that he played in shaping their direction The Cambridge Companion to the Age of Augustus captures the dynamics and richness of this era by examining important aspects of political and social history religion literature and art and architecture *Julia Augusta* Tracene Harvey,2019-07-05 Julia Augusta examines the socio political impact of coin images of Augustus s wife Livia within the broader context of her image in other visual media and reveals the detailed visual language that was developed for the promotion of Livia as the predominant female in the Roman imperial family The book provides the most comprehensive

examination of all extant coins of Livia to date and provides one of the first studies on the images on Roman coins as gender infused designs which created a visual dialogue regarding Livia's power and gender roles in relation to those of male members of the imperial family. While the appearance of Roman women on coins was not entirely revolutionary, having roughly coincided with the introduction of images of powerful Roman statesmen to coins in the late 40s BCE, the degree to which Livia came to be commemorated on coins in the provinces and in Rome was unprecedented. This volume provides unique insights into the impact of these representations of Livia both on coins and in other visual media. *Julia Augusta: Images of Rome's First Empress on the Coins of the Roman Empire* will be of great interest to students of women and imperial imagery in the Roman Empire as well as the importance of visual representation and Roman imperial ideology. Emperors and Ancestors Olivier Hekster, 2015. Ancestry played a continuous role in the construction and portrayal of Roman emperorship in the first three centuries AD. *Emperors and Ancestors* is the first systematic analysis of the different ways in which imperial lineage was represented in the various media through which images of emperors could be transmitted. Looking beyond individual rulers, Hekster evaluates evidence over an extended period of time and differentiates between various types of sources such as inscriptions, sculpture, architecture, literary text, and particularly central coinage, which forms the most convenient source material for a modern reconstruction of Roman representations over a prolonged period of time. The volume explores how the different media in use sent out different messages. The importance of local notions and traditions in the choice of local representations of imperial ancestry are emphasized, revealing that there was no monopoly on image forming by the Roman centre and far less interaction between central and local imagery than is commonly held. Imperial ancestry is defined through various parallel developments at Rome and in the provinces. Some messages resonated outside the centre but only when they were made explicit and fitted local practice and the discourse of the medium. The construction of imperial ancestry was constrained by the local expectations of how a ruler should present himself and standardization over time of the images and languages that could be employed in the media at imperial disposal. Roman emperorship is therefore shown to be a constant process of construction within genres of communication, representation, and public symbolism.

Paul and Image Philip Erwin, 2020-09-29. In *Paul and Image*, Philip Erwin challenges conventional interpretations of 1 Corinthians that tend to overlook the significance of ancient Roman visual culture in framing and posing exegetical questions. He argues that in 1 Corinthians, Paul engaged in a long-standing philosophical discussion of visual representation with consequential implications for how he and his Corinthian addressees interacted with the imagery around them. By situating Paul's letter in the context of the critical discourse on visual representation from Plato to Philo to the Second Sophistic, Erwin redefines Paul's critique of human wisdom, treatment of idols, and resurrection discourse in visual terms.

Engraved Gems and Propaganda in the Roman Republic and under Augustus Paweł Gołyźniak, 2020-05-14. This book studies small but highly captivating artworks from antiquity: engraved gemstones. These objects had multiple

applications and the images upon them captured snapshots of people's beliefs, ideologies and everyday occupations. They provide a unique perspective on the propaganda of Roman political leaders, especially Octavian Augustus. Roman Portraits Paul Zanker, 2016-11-14. Portrait sculptures are among the most vibrant records of ancient Greek and Roman culture. They represent people of all ages and social strata: revered poets and philosophers, emperors and their family members, military heroes, local dignitaries, ordinary citizens and young children. The Met's distinguished collection of Greek and Roman portraits in stone and bronze is published in its entirety for the first time in this volume. Paul Zanker, a leading authority on Roman sculpture today, has brought his exceptional knowledge to the study of these portraits. In presenting them, he brings the ancient world to life for contemporary audiences. Each work is lavishly illustrated, meticulously described and placed in its historical and cultural context. The lives and achievement of significant figures are discussed in the framework of the political, social and practical circumstances that influenced their portraits' forms and styles, from the unvarnished realism of the late Republican period to the idealizing and progressively abstract tendencies that followed. Analyses of marble portraits recarved into new likenesses after their original subjects were forgotten or officially repudiated provide especially compelling insights. Observations on fashions in hairstyling, which typically originated with the Imperial family and spread as fast as the rulers' latest portraits, could be distributed not only to edify and amuse but also to link the Romans' motives and appetite for imitation to our own. More than a collection catalogue, Roman Portraits is a thorough and multifaceted survey of ancient portraiture. Charting the evolution of this art from its origins in ancient Greece, it renews our appreciation of an connection to these imposing timeless works. **The Oxford Handbook of Roman Sculpture** Elise A. Friedland, Melanie Grunow

Sobocinski, Elaine Gazda, 2015-01-02. The study of Roman sculpture has been an essential part of the disciplines of Art History and Classics since the eighteenth century. Famous works like the Laocoön, the Arch of Titus and the colossal portrait of Constantine are familiar to millions. Again and again, scholars have returned to sculpture to answer questions about Roman art, society and history. Indeed, the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography and a variety of artistic media, formats, sizes and functions. Exciting new theories, methods and approaches have transformed the specialized literature on the subject in recent decades. Rather than creating another chronological catalogue of representative examples from various periods, genres and settings, The Oxford Handbook of Roman Sculpture synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of Art History, Classical Archaeology and Roman Studies. This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature. The Oxford Handbook of Roman Sculpture conveniently presents new technical, scientific, literary and theoretical approaches to the study of Roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well-known works in the corpus. The contributors to this volume address metropolitan and provincial material from the early republican period

through late antiquity in an engaging and fresh style Authoritative innovative and up to date The Oxford Handbook of Roman Sculpture will remain an invaluable resource for years to come
