The Sociology of Intellectuals Simon Susen, Patrick Baert, 2017-11-15 This volume offers an unprecedented account of recent and future developments in the sociology of intellectuals. It presents a critical exchange between two leading contemporary social theorists, Patrick Baert and Simon Susen, advancing debates at the cutting edge of scholarship on the changing role of intellectuals in the increasingly interconnected societies of the twenty-first century. The discussion centres on Baert's most recent contribution to this field of inquiry, *The Existentialist Moment: The Rise of Sartre as a Public Intellectual* (2015), demonstrating that it has opened up hitherto barely explored avenues for the sociological study of intellectuals. In addition, the authors provide an overview of various alternative approaches that are available for understanding the sociology of intellectuals, such as those of Pierre Bourdieu, Randall Collins, and Neil Gross. In doing so, they grapple with the question of the extent to which intellectuals can play a constructive role in influencing social and political developments in the modern era. This insightful volume will appeal to students and scholars of the humanities and social sciences, particularly to those interested in social theory and the history of intellectual thought.

Positioning and Stance in Political Discourse: The Individual, the Party, and the Party Line Lawrence N. Berlin, 2020-10-06 Within the political sphere, a political actor is often judged by what he or she says, with their verbal performance often perceived as representative of the individual. Hearers accept that as individuals, they possess a lifetime of experiences and actions which inform but may also undermine their aspirations in gaining political capital. Additionally, as representatives of a political party and its ideology, these actors do not exist in isolation; they are members and at times potential candidates of a particular party with its own agenda, which may in turn cause them to modify their personal speech to align with espoused policies of the party. The various contributions contained in this volume examine the discourse of political actors through the lenses of positionality and stance. Throughout its chapters, clearly defined theoretical perspectives and specified social practices are employed, enabling the authors to elucidate how political actors can situate themselves, their party, and their opponents toward their ostensive public. This book successfully demonstrates how espoused perspectives relate to or reflect on the nature of the individual political actor and their truth, the party they represent, and its ideology, and the pandering to popular public opinion to gain support and co-operation. This book will hold particular appeal for postgraduate students, researchers, and scholars of discourse studies, pragmatics, political science, as well as other areas in humanities and the social sciences.

Global Conflict Resolution Through Positioning Analysis Fathali M. Moghaddam, Rom Harré, Naomi Lee, 2007-11-15 Positioning theory is the study of the nature, formation, influence, and ways of change of local systems of rights and duties, as shared assumptions about them influence small-scale interactions. Evolving from linguistics origins, the theory concerns conventions of speech and action that are labile, contestable, and ephemeral. With this theory, researchers are able to examine

the dynamic flow of social interaction as well as give equal weight to the role of discourse and the psychological resolution of conflict This volume applies positioning theory in order to achieve a fuller and more in depth understanding of conflict and its psychological resolution The editors approach positioning from the micro interpersonal level all the way to the macro intergroup and international level
