Campbell, 1999-04-13 Carole Campbell examines the position of women in the AIDS epidemic women living with HIV and women caring for HIV infected family members in a sociocultural context Campbell draws a connection among women s risk of AIDS gender roles particularly adolescent gender role socialization and male sexual behavior demonstrating that efforts to contain the spread of the disease to females must also target the male behavior that puts women at risk This study concludes that compared with men HIV infected women face unequal access to care and unequal quality of care Informed by the moving personal accounts of eleven HIV infected men and women this book offers a rare broad picture of the sociocultural causes and the impact on American society of AIDS among women **Optimizing Women's Health through Nutrition** Lilian U. Thompson, Wendy E. Ward, 2007-12-03 It is no surprise that women and men experience biological and physiological differences fundamentally and throughout the
