the problem of expansion of clusters of galaxies *Studies in Social and Political Theory (RLE Social Theory)* Anthony Giddens, 2014-08-21 The studies which comprise this book are essentially organized around a critical encounter with European social theory in its classical period i.e. from the middle years of the nineteenth century until the First World War and have the aim of working out some of the implications of that encounter for the position and prospects of the social sciences today The issues involved relate to the following series of problems method and epistemology social development and transformation the origins of sociology in nineteenth century social theory and the status of social science as critique In each of these areas Giddens develops views that challenge existing orthodoxies and connects these ideas to a reconstruction of social theory in the contemporary era *Reader's Guide to the History of Science* Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *Realism, Ethics and Secularism* George Levine, 2008-10-09 George Levine is one of the world's leading scholars of Victorian literature and culture This collection of his essays develops the key themes of his work the intersection of nineteenth century British literature culture and science and the relation of knowledge and truth to ethics The essays offer perspectives on George Eliot Thackeray the Positivists and the Scientific Naturalists and reassess the complex relationship between Ruskin and Darwin In readings of Lawrence and Coetzee Levine addresses Victorian and modern efforts to push beyond the limits of realist art by testing its aesthetic and epistemological limits in engagement with the self and the other Some of Levine's most important contributions to the field are reprinted in revised and updated form alongside previously unpublished material Together these essays cohere into an exploration both of Victorian literature and culture and of ethical epistemological and aesthetic problems fundamental to our own times **Nietzsche's Naturalist Deconstruction of Truth** Peter Bornedal, 2020-01-03 Nietzsche's Naturalist Deconstruction of Truth A World Fragmented in Late Nineteenth Century Epistemology offers a new interpretation of Nietzsche's discussions of truth and knowledge covering the period from his early essay On Truth and Lies in an Extra Moral Sense to his late notebooks It places these discussions in the context of the neo Kantian Naturalist Positivist and Pragmatic schools influential in Nietzsche's late nineteenth century Europe Peter Bornedal argues for a view of Nietzsche's epistemological thought as an elaboration of this paradigm proposing ideas that are anti metaphysical and anti theological in their polemic orientation and in general promoting new scientific naturalist ideals in the discussions of knowledge Bornedal suggests that the rational pursuit of these new ideals to the unencumbered mind logically leads to Nihilism in its most profound epistemological sense Nietzsche's critique of metaphysics is thus seen as having sprung from sources different from and at times in patent opposition to more recent postmodern and deconstructionist critiques This book contextualizes

Nietzsche in relation to a number of philosophical peers and juxtaposes him to contemporary thinkers in a way that resolves some of the difficulties that have plagued recent Nietzsche scholarship

Varieties of Scientific Experience Lewis S. Feuer, Lewis S Feuer shows that the gestation of the hypotheses of original minded scientists such as Darwin Einstein or Bohr is in large part a subconscious process Scientists try to project upon the world structural laws that beside fitting the given physical realities will also realize their own emotional longings among alternative worldviews Repeatedly too in examining the standpoints of philosophical figures ranging from Spinoza Descartes Kant and Mill to contemporary figures such as Einstein Lovejoy and Hook Feuer

illuminates how sociological antipathies project themselves into scientific divergences Feuer delves into the bearing of emotive beliefs such as pacifism socialism anti-Semitism upon the formation of concurrent worldviews often fixations of scientific belief held with the same passion in science as in religion *Sociology , Basic Modern Philosophy of Religion* Frederick Ferré,2013-06-19 This book provides a reasoned comprehensive understanding of what religion is as well as a clear and critical assessment of whether in the light of modern developments in philosophy contemporary thinking people can responsibly maintain religious belief in God The book is divided into three major sections the first deals with what all religions may be said to have in common the second discusses theistic religion and the issue of intellectually responsible belief in God the third examines current developments within a particular theistic religion Christianity Originally published in 1968 the book is basic both in the nature of the issues it discusses and in the clarity and comprehensiveness of its presentation it is varied in the arguments and perspectives dealt with it provides an introduction to philosophical thinking through the problems of philosophy of religion and it deals seriously with controversial movements in theology The Varieties of Understanding: Introduction. Cambridge analytical philosophy Nikolay Milkov,1997 **A Critical Dictionary of Sociology** Raymond Boudon,François Bourricaud,1989 This distinguished reference work is much more than a lexicon or ordinary dictionary Each essay complete with bibliographical references presents a selective and critical discussion of some issue fundamental to sociology Synthesizing American British French and German taken together these contributions provide a coherent and sophisticated critique of the sociological tradition *Creating Healthy and Learning Organisations: A Handbook for Practitioners* Sudhir K. Samantaray,2017-05-31
