## **Post Cold War Identity Politics Northern And Baltic Experiences:**

**Post-Cold War Identity Politics** Marko Lehti, David J Smith, 2004-11-23 During the past decade northern Europe has started to assume an identity of its own Categories of East and West have become blurred challenging as well the idea of what it means to be Nordic Post Cold War Identity Politics maps this process in Scandinavia Looking at projects designed to help regional development in the Nordic countries it assesses whether a new way of defining Northernness is emerging The book highlights the existence of co existing and to some extent competing region building projects in northern Europe It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future *History in the World* Kalle Pihlainen, 2019-03-04 Questions about the relationship between historical research and contemporary social and practical problems have posed a challenge to generations of historians as well as to philosophers and theorists of history In recent years views regarding the isolation of academic history from real world issues and affairs have come under increasing criticism The contributions to this volume all focus on history's role in the world today and on the possibilities for and limits to engagement resulting from disciplinary practices and conventions The authors undertake their assessment of history's relevance in different ways combining case studies of political clashes public debates and practices of commemoration with sophisticated theoretical discussions of identity construction the material manifestations of power and the relationship between historicizing and expectations concerning future actions These studies highlight the difficulty of distinguishing between history and politics and between disciplinary accounts and activism and contribute significantly towards an improved understanding of our relationship with the past This book was originally published as a special issue of *Rethinking History* **From Socialist to Post-Socialist Cities** Alexander C. Diener, Joshua Hagen, 2016-04-14 The development of post socialist cities has become a major field of study among critical theorists from across the social sciences and humanities Originally constructed under the dictates of central planners and designed to serve the demands of command economies post socialist urban centers currently develop at the nexus of varied and often competing economic cultural and political forces Among these nationalist aspirations previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity have emerged as dominant factors shaping the urban landscape This book explores this burgeoning field of research through detailed case studies relating to the cultural politics of architecture urban planning and identity in the post socialist cities of Eurasia This book was published as a special issue of *Nationalities Papers* **The Scandinavian International Society** Laust Schouenborg, 2013 This book provides a comprehensive analysis of Scandinavia as a regional international society including the Nordic Peace and the rise of the Scandinavian welfare state Schouenborg aims to take the next big step in the theoretical development of the English School of International Relations particularly the structural version introduced by Barry Buzan He analyses the formation of a Scandinavian regional international society over a 200 year period and develops the concepts of primary

institutions and binding forces as an analytical framework In doing so he not only offers one of the first systematic applications of English School structural theory but also sheds a new comparative light on the distinctiveness of Scandinavian international relations and provides a novel intervention in the debates about the emergence of the so called Nordic Peace In the first part of the book Schouenborg explains the core concepts and discusses how one may distinguish a regional international society from the broader global international society in which it is embedded In the second part he provides an in depth study of the Scandinavian case focussing on the periods 1815 to 1919 1919 to 1989 and 1989 to 2010 The Scandinavian International Society will be of interest to students and scholars of international relations theory Scandinavian international relations and history and researchers engaged in comparative welfare state studies *European Regions and Boundaries* Diana Mishkova, Balázs Trencsényi, 2017-07-01 It is difficult to speak about Europe today without reference to its constitutive regions supra national geographical designations such as Scandinavia Eastern Europe and the Balkans Such formulations are so ubiquitous that they are frequently treated as empirical realities rather than a series of shifting overlapping and historically constructed concepts This volume is the first to provide a synthetic account of these concepts and the historical and intellectual contexts in which they emerged Bringing together prominent international scholars from across multiple disciplines it systematically and comprehensively explores how such meso regions have been conceptualized throughout modern European history *Nordic Consumer Culture* Søren Askegaard, Jacob Östberg, 2019-03-01 Unpacking the complexities of Nordic consumer culture this edited collection responds to the growing interest in regionalism within consumer research and marketing By taking a closer look at the interaction between the state and the market in Nordic countries the authors examine how consumer behaviour is impacted by the region's unique context Important elements of Nordic culture are explored such as its underlying element of mythology and the concept of hygge an object of global consumption Those studying consumer behaviour branding and marketing more generally will find this book a fascinating contribution to research **Contested and Shared Places of Memory** Jorg Hackmann, Marko Lehti, 2013-09-13 The Baltic Russian debates on the past have become a hot spot of European memory politics Violent protests and international tensions accompanying the removal of the Bronze Soldier monument which commemorated the Soviet liberation of Tallinn in 1944 from the city centre in April 2007 have demonstrated the political impact that contested sites of memory may still reveal In this publication collective memories that are related to major traits of the 20th century in North Eastern Europe the Holocaust Nazi and Soviet occupation and re emerging nationalisms are examined through a prism of different approaches They comprise reflections on national templates of collective memory the political use of history cultural and political aspects of war memorials and recent discourses on the Holocaust Furthermore places of memory in architecture and urbanism are addressed and lead to the question of which prospects common trans national forms of memory may unfold After decades of frozen forms of commemoration under Soviet hegemony the Baltic case offers an

interesting insight into collective memory and history politics and their linkage to current political and inter ethnic relationships The past seems to be remembered differently in the European peripheries than it is in its centre Europe is diverse and so are its memories This book was published as a special issue of the Journal of Baltic Studies *Borders in Post-Socialist Europe* Tassilo Herrschel, 2016-04-08 Borders have attracted considerable attention in public and academic debates in light of the impact of globalisation and in Europe the end of the divisions of the Cold War era Instead being inside or outside of the EU has become a major paradigmatic divide between claimed spheres of influence by Brussels and Moscow respectively In the aftermath of the end of communism established certainties no longer seemed to apply And this included many of the borders within the former eastern Bloc with some losing their relevance while others re assert themselves As its particular contribution this book adopts a symbiotic approach to the analysis of borders drawing on a political economy perspective while also recognising the importance of the socio cultural dimension as found in border studies This seeks to do greater justice to the complex composite nature of borders as geo political state legal and cultural historic constructs in both theory and practice In addition the book s approach stretches across spatial scales to capture the multi level nature of borders The first part of the book presents the conceptual framework as it sets out to embrace this multi faceted multi layered nature of borders In the second part case studies from north central Europe including the Baltic Sea Region exemplify the complexity of borders in the context of post socialist transformation and continuing EU isation

**Piip, Meierovics & Voldemaras** Charlotte Alston, 2011-04-26 Conflict on the borders of the Russian Empire whatever the complexion of the government controlling it has been a constant feature of the past 90 years most recently with Russia's brief war with Georgia in August 2008 In 1919 as the smaller nations on Russia's borders sought self determination while the Civil War raged between the Whites and the Bolsheviks the Paris Peace Conference struggled with a situation complicated by mutually exclusive aims The Baltic States of Latvia Lithuania and Estonia were seen by both the Russians and the Western Allies as a protective buffer for their own territory which led to the curious situation that the Peace Conference requested German troops to remain temporarily in the Baltic territory they had occupied during the First World War to block the westward spread of the Bolshevik Revolution The ongoing civil war in Russia further complicated the issue because if the Whites should win and restore the legitimate Russian government the Peace Conference could not divide up the territory of a power that had been one of the original members of the Entente The US politician Herbert Hoover described Russia as Banquo's ghost at the Paris Peace Conference an invisible but influential presence and nowhere can this be more clearly seen than in the deliberations over the Baltic States

*Identities, Nations and Politics after Communism* Roger E. Kanet, 2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied

This book was previously published as a special issue of Nationalities Papers      The Geopolitics of Region Building in the Black Sea Yannis Tsantoulis, 2020-12-17 Offering theoretical insights on region building this book explores the attempts to formulate a political and institutional vision for the Black Sea region in the post 9 11 era and in the context of the enlargements of the EU and NATO It investigates in depth these attempts viewed as a failure by the key actors involved in order to understand how regions emerge in international politics as well as how and why they may fail to come into being To this end the book explores a range of factors that impacted region building in the Black Sea considering the role of region builders involved their practices and the context of their actions and the spatial representations and security discourses that were integral to the region building process Hence attention is paid to how these factors both enabled and constrained the discursive construction of the Black Sea region thus identifying the elements that distinguish the Black Sea from other successful cases of region building Based on critical approaches towards international relations and political geography this book both expands and deepens the scope and understanding of regions and will thus appeal to academics and students in the fields of International Relations Security Studies Political Geography and Regional Integration      *Handbook of Nordic Cooperation* Nina Græger, Ruth Hemstad, Peter Nedergaard, Peter Stadius, 2025-09-10 This illuminating Handbook explores transnational Nordic cooperation from a broad historical and political perspective It examines the entangled and variegated history of Nordic collaboration from early civil society initiatives to comprehensive official cooperation as well as responses to recent challenges such as defence and foreign policy      **EU-Russian Border Security** S.
