## **Post Military Society:**

**Militarism and World Society** Martin Shaw, 1986      **Post-Military Society** Martin Shaw (omonimi non identificati.), 1991      **What is Post-military Society? Transformation of Militarism in Contemporary Society** Kiyohiko Toyama, 1994 The problem of militarism and militarization in contemporary society has been inadequately researched despite frequent use of the terms in our everyday language Martin Shaw has recently addressed the issue by presenting the notion of post military society A basic assumption of the post military society hypothesis is that there have been contradictory dual developments in society since 1945 in relation to militarism enhancement of military build up and demilitarization of mass society The study focuses on two important factors transformation of armed forces and militarism in post war society is focused A model of the militarization militarism process is proposed to establish reliable criteria to investigate the problem The main characteristics of military society are also explored to grasp significant changes in the post war period that put modern armed forces in the crisis of legitimacy and turned nationalistic mass militarism into shallow modern militarism Although international tensions generated by the Cold War have warranted the pre eminent position of the military establishment society has gradually edged toward demilitarization in the absence of major wars This trend has been manifested in the decline of the mass army and the rise of the peace movement However there are limitations The scope of the hypothesis is confined to societies of the developed countries The lack of theoretical clarification on the relationship between democracy and militarism causes some difficulties in dealing with some non Western societies The latter are highlighted through the case study of contemporary Japanese society Yet new movements prompted by the end of the Cold War suggest that society is moving in the direction of post militarism      **Soldiers and Societies in Postcommunist Europe** A. Forster, T. Edmunds, 2003-09-08 This major comparative study examines the development of military society relations in central and eastern Europe since the collapse of communism Soldiers and Societies in Post Communist Europe explores how the interaction of the common challenges of postcommunism and the diverse circumstances of individual countries are shaping patterns of military society relations in this changing region Detailed country case studies written by international experts to a common analytical framework compare the experiences of Poland the Czech Republic Slovakia Hungary Latvia Lithuania Romania Bulgaria Slovenia Croatia Yugoslavia and Ukraine      Democratic Societies and Their Armed Forces Stuart A. Cohen, 2013-02-01 These papers are an edited selection from the BESA conference of 1998 They present an overview of transformations in societal military relations in the western world and the specific manifestations in Israel      National Security, Democracy, and Good Governance in Postmilitary-Rule Nigeria, Volume Two Dr. Dan Mou, 2017-01-12 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the 71 percent of Nigerias population still living below the poverty line This is in spite of the billions of petrodollars that Nigeria

garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness worse civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in the future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use There is this perception that Nigerians dont write and read This perception is deep seated even among intellectuals who see our authors as shallow researchers But Dr Dan Mou has debunked that myth and shown that Nigerians can write well researched and detailed books It is quite prophetic in its assessment of the Nigerian State Agbo Agbo deputy editor The Nation Dr Dan Mou has proven himself a world class scholar and an intellectual colossus His reputation as an internationally renowned public policy expert has continued to soar I congratulate him for these remarkable achievements Professor Justice Abdul Fatai Kuti first justice of Abuja High Court and former dean faculty of law University of Ado Ekiti Ekiti State of Nigeria Dr Mou is certainly one of the best scholars we have on the African continent As an educationist myself before I became a traditional ruler I agree totally with his analysis and conclusions I share the optimism Dr Mou has expressed that once the recommendations therein are adopted and meticulously implemented with proper monitoring and evaluation of such resultant policies and programmes Nigeria and indeed Africa would be able to solve most of these challenges HRH Alh Dr Sheban Audu Nizazo III Etsu Kwali Etsu Kwalis Palace Abuja Nigeria      Citizenship Keith Faulks,2013-09-27 This book presents a clear and comprehensive overview of citizenship which has become one of the most important political ideas of our time The author an experienced textbook writer and teacher uses a postmodern theory of citizenship to ask topical questions as Can citizenship exist without the nation state What should the balance be between our rights and responsibilities Should we enjoy group as well as individual rights Is citizenship relevant to our private as well as our public lives Have processes of globalisation rendered citizenship redundant      **Militarism and International Relations** Anna Stavrianakis,Jan Selby,2013 Militarism and international relations in the 21st century Twenty first century militarism a historical sociological framework Martin Shaw Challenging cartographies of enmity empire war and culture in contemporary militarization Simon Dalby Militarism new wars and the political economy of development a Gramscian critique Nicola Short War becomes academic human terrain virtuous war and contemporary militarism an interview with James der Derian Anna Stavrianakis and Jan Selby From Oslo to Gaza Israel s enlightened public and the remilitarization of the Israeli Palestinian conflict Yoav Peled From political armies to the war against crime the transformation of militarism in Latin America Dirk Kruijt and Kees Koonings The global arms trade and the diffusion of militarism David Kinsella Wilsonians under arms Andrew J Bacevich The political economy of EU space

**Beyond Left and Right** Anthony Giddens, 2013-04-29 How should one understand the nature and possibilities of political radicalism today The political radical is normally thought of as someone who stands on the left opposing backward looking conservatism In the present day however the left has turned defensive while the right has become radical advocating the freeplay of market forces no matter what obstacles of tradition or custom stand in their way What explains such a curious twist of perspective In answering this question Giddens develops a new framework for radical politics drawing freely on what he calls philosophic conservatism but applying this outlook in the service of values normally associated with the Left The ecological crisis is at the core of this analysis but is understood by Giddens in an unconventional way as a response to a world in which modernity has run up against its limits as a social and moral order The end of nature as an entity existing independently of human intervention and the end of tradition combined with the impact of globalization are the forces which now have to be confronted made use of and coped with This book provides a powerful interpretation of the rise of fundamentalism of democracy the persistence of gender divisions and the question of a normative political theory of violence It will be essential reading for anyone seeking a novel approach to the political challenges which we face at the turn of the twenty first century

War and Genocide Martin

Shaw,2015-01-28 This comprehensive introduction to the study of war and genocide presents a disturbing case that the potential for slaughter is deeply rooted in the political economic social and ideological relations of the modern world Most accounts of war and genocide treat them as separate phenomena This book thoroughly examines the links between these two most inhuman of human activities It shows that the generally legitimate business of war and the monstrous crime of genocide are closely related This is not just because genocide usually occurs in the midst of war but because genocide is a form of war directed against civilian populations The book shows how fine the line has been in modern history between degenerate war involving the mass destruction of civilian populations and genocide the deliberate destruction of civilian groups as such Written by one of the foremost sociological writers on war War and Genocide has four main features an original argument about the meaning and causes of mass killing in the modern world a guide to the main intellectual resources military political and social theories necessary to understand war and genocide summaries of the main historical episodes of slaughter from the trenches of the First World War to the Nazi Holocaust and the killing fields of Cambodia Bosnia and Rwanda practical guides to further reading courses and websites This book examines war and genocide together with their opposites peace and justice It looks at them from the standpoint of victims as well as perpetrators It is an important book for anyone wanting to understand and overcome the continuing salience of destructive forces in modern society     *The New Western Way of War* Martin Shaw,2005-05-27 The new western way of war from Vietnam in Iraq Theories of the new western way of war The global surveillance mode of warfare Rules of risk transfer war Iraq risk economy of a war A way of war in crisis     *The New Dogs of War* Ward Thomas,2021-09-15 As Ward Thomas details in *The New Dogs of War* militias and paramilitary groups wield greater power than national governments in many countries while in some war zones private contractors perform missions previously reserved for uniformed troops Most ominously terrorist organizations with global reach have come to define the security landscape for even the most powerful nations Across the first decades of the twenty first century we have witnessed a dramatic rise in the use of military force by these nonstate actors in ways that have impacted the international system leading Thomas to undertake this valuable assessment of the state of play at this critical moment To understand the spread of nonstate violence Thomas focuses on the crucial role played by an epochal transformation in international norms Since the eighteenth century the Westphalian model of sovereignty has reserved the legitimate use of force to states Thomas argues that normative changes in the decades after World War II produced a crisis of coherence for formal and informal rules against nonstate violence In detailed case studies of nonstate militias transnational terrorist networks and private military contractors Thomas explains how forces contesting state prerogatives exploited this crisis which in turn reshaped international understandings of who could legitimately use force By considering for the first time all three purveyors of nonstate violence as aspects of the same phenomenon *The New Dogs of War* explains this fundamental shift in the norm that for centuries gave states the monopoly on military force     Contemporary Security and Strategy Craig Snyder,Craig A.

Snyder, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company      **Social Change and Political Transformation** Chris Rootes, Howard Davis, 2018-05-11 Social Change in Political Transformation is thorough examination of political transformation the book features contributors from western and eastern Europe giving their views on how European society and institutions are changing The themes of social change new movements and the development of European institutions are developed within a broad framework and are supported by considerable empirical detail relating to the European Community and a disaggregated eastern Europe Students of political sociology politics and European studies will all find this a useful text providing theories and explanations as well as summaries of recent research      **Another Bloody Century** Colin S. Gray, 2012-02-23 How the wars of the near future will be fought and who will win them Many nations peoples and special interest groups believe that violence will advance their cause Warfare has changed greatly since the Second World War it continued to change during the late 20th century and this process is still accelerating Political technological social and religious forces are shaping the future of warfare but most western armed forces have yet to evolve significantly from the cold war era when they trained to resist a conventional invasion by the Warsaw Pact America is now the only superpower but its dominance is threatened by internal and external factors The world's most hi tech weaponry seems helpless in the face of determined guerrilla fighters not afraid to die for their beliefs Professor Colin Gray has advised governments on both sides of the Atlantic and in *ANOTHER BLOODY CENTURY* he reveals what sort of conflicts will affect our world in the years to come      **War, Identity and the Liberal State** Victoria Basham, 2013-07-24 This book critically examines the significance of gender race and sexuality to wars waged by liberal states Drawing on original field research with British soldiers it offers insights into how their everyday experiences are shaped by and shape a politics of gender race and sexuality that not only underpins power relations in the military but the geopolitics of wars waged by liberal states Linking the politics of daily life to the international is an intervention into international relations IR and security studies because instead of overlooking the politics of the everyday this book insists that it is vital to explore how geopolitical events and practices are co constituted reinforced and contested by it By utilising insights from Michel Foucault the book explores how shared and collectively mediated knowledge on gender race and sexuality facilitates certain claims about the nature of governing in liberal states and about why and how such states wage war against illiberal ones in pursuit of global peace and security The book also develops post structural work in international relations by urging scholars interested in the linguistic construction of geopolitics to consider the ways in which bodies objects and architectures also reinforce particular ideas about war identity and statehood      *Militarizing Men* Maya Eichler, 2011-10-26 A state's ability to maintain mandatory conscription and wage war rests on the idea that a real man is one who has served in the military Yet masculinity has no inherent ties to militarism The link between men and the military argues Maya Eichler must be produced and reproduced in order to fill the ranks engage in combat and mobilize the population behind war In the context of Russia's post communist

transition and the Chechen wars men's militarization has been challenged and reinforced Eichler uncovers the challenges by exploring widespread draft evasion and desertion anti draft and anti war activism led by soldiers mothers and the general lack of popular support for the Chechen wars However the book also identifies channels through which militarized gender identities have been reproduced Eichler's empirical and theoretical study of masculinities in international relations applies for the first time the concept of militarized masculinity developed by feminist IR scholars to the case of Russia

**Ordnance: War + Architecture & Space** Gary A. Boyd, Denis Linehan, 2016-12-05 Ordnance War Architecture Space investigates how strategies of warfare occupy and alter built and other landscapes Ranging across the modern period from the eighteenth century to the present day the book presents a series of case studies which operate in and between a number of settings and scales from the infrastructures of the battlefield to the logistics of the domestic realm The book explores the patterns forms and systems that articulate militarised spaces excavates how these become re circulated and reconfigured within other domains and discusses the often ephemeral legacies and residues of these architectures The complexities of unpicking the spaces of the fog of war are addressed by an inter disciplinary approach which deploys graphic and textual analyses and techniques to provide new and unique perspectives on a hitherto underexplored aspect of architectural and spatial discourse the tactics and programmes through which the built environment has historically been made to respond to the imperatives and threats of conflict and in the context of the war on terror continues to be so in ever more pervasive ways
