Revival Paresh Chattopadhyay, 2018-08-07 Socialism is a word that is now habitually taken to refer to a particular social system that prevailed in different parts of the globe during the twentieth century This system was defined primarily by single party rule with public mainly state ownership of the means of production along with a centrally planned economy Its material base was generalised commodity production The spokespersons of this system claim that this socialism was derived from Marx Paresh Chattopadhyay's Socialism and Commodity Production argues the falsity of this claim On the basis of a comprehensive study of Marx's own texts as well as a detailed engagement with a wide variety of theorists of socialist economics it shows that Marx's socialism constituted an Association of free individuals in which private ownership the commodity wage labour and the state have no place **Revolution From Above** David Kotz, Fred Weir, 2013-04-15

Beck,2014-09-19 Examining the rapid transition in Iran from a modernizing westernizing secularizing monarchy 1941 79 to a hard line conservative clergy run Islamic republic 1979 this book focuses on the ways this process has impacted the Qashqa i a rural nomadic tribally organized Turkish speaking ethnic minority of a million and a half people who are dispersed across the southern Zagros Mountains Analysing the relationship between the tribal polity and each of the two regimes the book

goes on to explain the resilience of the people's tribal organizations, kinship networks and politicized ethnolinguistic identities to demonstrate how these structures and ideologies offered the Qashqai a way to confront the pressures emanating from the two central governments. Existing scholarly works on politics in Iran rarely consider Iranian society outside the capital of Tehran and beyond the reach of the details of national politics. Local level studies on Iran accounts of the ways people actually lived are now rare especially after the revolution. Based on long term anthropological research, *Nomads in Postrevolutionary Iran* provides a unique insight into how national level issues relate to the local level and will be of interest to scholars and researchers in Anthropology, Iranian Studies and Middle Eastern Studies.

The Political Forms of Modern Society Claude Lefort, 1986-08-26 Claude Lefort is one of the leading social and political theorists in France today. This anthology of his most important work published over the last four decades makes his writing widely accessible to an English speaking audience for the first time. With exceptional skill Lefort combines the analysis of contemporary political events with a sensitivity to the history of political thought. His critical account of the development of bureaucracy and totalitarianism in the Soviet Union and Eastern Europe is a timely contribution to current debates about the nature and shortcomings of these societies. His incisive analyses of Marx's theory of history and concept of ideology provide the backdrop for a highly original account of the role of symbolism in modern societies. While critical of many traditional assumptions and doctrines Lefort develops a political position based on a reappraisal of the idea of human rights and a reconsideration of what democracy means today. *The Political Forms of Modern Society* is a major contribution to contemporary social and political theory. The volume includes a substantial introduction that describes the context of Lefort's writings and highlights the central themes of his work.

Historiography: Society Robert M. Burns, 2006 This collection aims to enable the reader to disentangle some of the ambiguities and confusions which have characterized the use of the term historiography.

A Revolution in Language Sophia A. Rosenfeld, 2003-08-01 What is the relationship between the ideas of the Enlightenment and the culture and ideology of the French Revolution? This book takes up that classic question by concentrating on changing conceptions of language and especially signs during the second half of the eighteenth century. The author traces first the emergence of a new interest in the possibility of gestural communication within the philosophy, theater and pedagogy of the last decades of the Old Regime. She then explores the varied uses and significance of a variety of semiotic experiments including the development of a sign language for the deaf within the language politics of the Revolution. *A Revolution in Language* shows not only that many key revolutionary thinkers were unusually preoccupied by questions of language but also that prevailing assumptions about words and other signs profoundly shaped revolutionaries' efforts to imagine and to institute an ideal polity between 1789 and the start of the new century. This book reveals the links between Enlightenment epistemology and the development of modern French political culture.
