Post Soviet Economy Soviet And Western Perspectives:

The Post-Soviet Economy Anders Aslund, 1992 In the context of the Soviet economic crisis of 1991 this work offers the views of 12 economists half from the USSR half from the West While all agree on the need for a market economy the Soviet writers here argue for a markedly more gradual change than do their Western counterparts **Alternative Political** Economy Models of Transition John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

Economic Management and Transition Towards a Market Economy Anthony T.H. Chin, 1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an

attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies Imagining America Alan M. Ball, 2004-09-09 In Imagining America historian Alan M Ball explores American influence in two newborn Russian states the young Soviet Union and the modern Russian Republic Ball deftly illustrates how in each era Russians have approached the United States with a conflicting mix of ideas as a land to admire from afar to shun at all costs to emulate as guickly as possible or to surpass on the way to a superior society Drawing on a wide variety of sources including contemporary journals newspapers films and popular songs Ball traces the shifting Russian perceptions of American cultural social and political life As he clearly demonstrates throughout their history Russian imaginations featured a United States that political figures and intellectuals might embrace exploit or attack but could not <u>International Development and the Washington Consensus</u> John Marangos, 2020-07-16 In this book John Marangos offers an insightful analytical and theoretical review of the Washington Consensus and its successors among the mainstream Following an intuitive structure it explores international development and the Washington Consensus as a critique through the lenses of Neoclassical economics Post Keynesian economics Institutional economics and Marxist economics Ultimately it provides a compelling alternative perspective to the dominant development paradigm and enables readers to identify the interconnections interrelationships and intercontradictions between different frameworks and policies It will be a valuable supplementary reading for students researchers and policymakers in international development development economics heterodox economics and the history of economic thought In Search of the True West Esther Kingston-Mann, 1998-12-21 This ground breaking work documents Russian efforts to appropriate Western solutions to the problem of economic backwardness since the time of Catherine the Great Entangled then as now with issues of cultural borrowing educated Russians searched for Western nations ideas and social groups that embodied universal economic truths applicable to their own country Esther Kingston Mann describes Russian Westernization which emphasized German as well as Anglo U S economics while she raises important questions about core values of Western culture and how cultural values and priorities are determined This is the first historical account of the significant role played by Russian social scientists in nineteenth century Western economic and social thought In an era of rapid Western colonial expansion the Russian quest for the right Western economic model became more urgent Was Russia condemned to the fate of India if it did not become an England In the 1900s Russian liberal economists emphasized cultural difference and historical context while Marxists and prerevolutionary government reformers declared that inexorable economic laws doomed peasants and their medieval communities On the eve of 1917 both the tsarist regime and its leading critics agreed that Russia must choose between Western style progress or feudal stagnation And when peasants and communes survived until Stalin s time he mercilessly destroyed them in the name of progress Today Russia's painful modernizing traditions shape the policies of contemporary
