*Postcommunism* Michael Mandelbaum,1996 This book offers distinctive perspectives by four leading students of politics on the single most important social political and economic development of the 1990s post communist Eurasia

**Postcommunism/Postcolonialism** Bogdan Stefanescu,2012      **Between Past and Future: Elites, Democracy and the State in Post-Communist Countries** Anton Steen,2019-07-18 Published in 1997 this text presents a specific interest in analyzing the role of the elites as a key factor for democratic rule and policy changes In order to put the elites in perspective the author has also conducted opinion surveys asking some of the same questions among representative samples of the populations in the three countries Comparing these three rather similar states gives possibilities for singling out conditions for specific national developments in elite structure and policies      US Democracy Promotion after the Cold War Annika Elena Poppe,2019-07-24 This book explores the often assumed but so far not examined proposition that a particular U S culture influences U S foreign policy behavior or more concretely that widely shared basic assumptions embraced by members of the U S administration have a notable impact on foreign policy making Publicly professed beliefs regarding America s role in the world and about democracy s universal appeal despite much contestation go to the heart of U S national identity Employing extensive foreign policy text analysis as well as using the case study of U S Egyptian bilateral relations during the Clinton Bush junior and Obama administrations it shows that basic assumptions matter in U S democracy promotion in general and the book operationalizes them in detail as well as employs qualitative content analysis to assess their validity and variation The research presented lies at the intersection of International Relations U S foreign policy regional studies and democracy promotion The specific focus on the domestic cultural angle for the study of foreign policy and this dimension s operationalization makes it a creative crossover study and a unique contribution to these overlapping fields      Extreme Politics Charles King,2010-01-14 Why do some violent conflicts endure across the centuries while others become dimly remembered ancient struggles among forgotten peoples Is nationalism really the powerful force that it appeared to be in the 1990s This wide ranging work examines the conceptual intersection of nationalist ideology social violence and the political transformation of Europe and Eurasia over the last two decades The end of communism seemed to usher in a period of radical change an era of extreme politics that pitted nations ethnic groups and violent entrepreneurs against one another from the wars in the Balkans and Caucasus to the apparent upsurge in nationalist mobilization throughout the region But the last twenty years have also illustrated the incredible diversity of political life after the end of one party rule Extreme Politics engages with themes from the micropolitics of social violence to the history of nationalism studies to the nature of demographic change in Eurasia Published twenty years since the collapse of communism Extreme Politics charts the end of Eastern Europe as a place and chronicles the ongoing revolution in the scholarly study of the post communist world      **The State of Law in the South Caucasus** C. Waters,2005-10-26 This book evaluates the strength of

John L Campbell Slavic Review **Preying on the State** Venelin I. Ganey, 2013-07-02 Immediately after 1989 newly emerging polities in Eastern Europe had to contend with an overbearing and dominant legacy the Soviet model of the state At that time the strength of the state looked like a massive obstacle to change less than a decade later the state's dominant characteristic was no longer its overweening powerfulness but rather its utter decrepitude Consequently the role of the central state in managing economies providing social services and maintaining infrastructure came into question Focusing on his native Bulgaria Venelin I Ganey explores in fine grained detail the weakening of the central state in post Soviet Eastern Europe Ganey starts with the structural characteristics of the Soviet satellites and in particular the forms of elite agency favored in the socialist party state As state socialism collapsed Ganey demonstrates its institutional legacy presented functionaries who had become accustomed to power with a matrix of opportunities and constraints In order to maximize their advantage under such conditions these elites did not need a robust state apparatus in fact all of the incentives under postsocialism pushed them to subvert the infrastructure of governance Throughout *Preying on the State* Ganey argues that the causes of state malfunctioning go much deeper than the policy preferences of free marketeers who deliberately dismantled the state He systematically analyzes the multiple dimensions implications and significance of the institutional and social processes that transformed the organizational basis of effective governance

**Welcome to the Desert of Post-Socialism** Srećko Horvat, Igor Stiks, 2015-01-06 This volume offers a profound analysis of post socialist economic and political transformation in the Balkans involving deeply unequal societies and oligarchical democracies The contributions deconstruct the persistent imaginary of the Balkans pervasive among outsiders to the region who see it as no more than a repository of ethnic conflict corruption and violence Providing a much needed critical examination of the Yugoslav socialist experience the volume sheds light on the recent rebirth of radical politics in the Balkans where new groups and movements struggle for a radically democratic vision of society

*Democracy After Communism* Larry Diamond, Marc F. Plattner, 2002-09-23 The last quarter of the twentieth century was marked by two dramatic political trends that altered many of the world's regimes the global resurgence of democracy and the collapse of communism Was the process that brought down communism in Eastern Europe and the former Soviet Union fundamentally different from the process that gave birth to

new democracies in other regions of the world Were the transitions away from communism mostly like or mostly unlike the transitions away from authoritarianism that took place elsewhere Is the challenge of building and consolidating democracy under postcommunist conditions unique or can one apply lessons learned from other new democracies The essays collected in this volume explore these questions while tracing how the countries of Eastern Europe and the former Soviet Union have fared in the decade following the fall of communism Contributors Anders slund Carnegie Endowment for International Peace in Washington D C Leszek Balcerowicz Warsaw School of Economics Archie Brown Oxford University and St Antony s College Zbigniew Brzezinski Johns Hopkins University a former U S national security advisor Valerie Bunce Cornell University Nadia Diuk National Endowment for Democracy in Washington D C M Steven Fish University of California Berkeley Charles H Fairbanks Jr the Johns Hopkins University Bronislaw Geremek former foreign minister of Poland John Higley University of Texas at Austin Judith Kullberg University of Michigan Ann Arbor Mart Laar prime minister of Estonia Michael McFaul Stanford University Ghia Nodia Tbilisi State University Jan Pakulski University of Tasmania in Australia Richard Rose University of Strathclyde in Glasgow Jacques Rupnik College of Europe in Bruges Lilia Shevtsova Carnegie Endowment for International Peace in Washington D C Aleksander Smolar Stefan Batory Foundation in Warsaw and Centre National de la Recherche Scientifique in Paris G M Tam s formerly of Georgetown University Vladimir Tismaneanu University of Maryland at College Park Grigory Yavlinsky member of the Russian State Duma parliament

**Assessing the Value of Law in Transition Economies** Peter Murrell, 2001 Explores the role of law in nations making the transition to market democracies

**From Elections to Democracy** Susan Rose-Ackerman, 2005 The countries of Central Europe in the first round for admission to the European Union have all established constitutional electoral democracies and market economies However much remains to be done to achieve fully consolidated democratic states This study documents the weaknesses of public oversight and participation in policymaking in Hungary and Poland two of the most advanced countries in the region It discusses five alternative routes to accountability including European Union oversight constitutional institutions such as presidents and courts devolution to lower level governments the use of neo corporatist bodies and open ended participation rights It urges more emphasis on the fifth option public participation Case studies of the environmental movement in Hungary and of student groups in Poland illustrate these general points The book reviews the United States experience of open ended public participation and draws some lessons for the transition countries from the strengths and weaknesses of the American system

**Global Political Economy** Robert G. Gilpin, 2011-08-29 This book is the eagerly awaited successor to Robert Gilpin s 1987 The Political Economy of International Relations the classic statement of the field of international political economy that continues to command the attention of students researchers and policymakers The world economy and political system have changed dramatically since the 1987

book was published The end of the Cold War has unleashed new economic and political forces and new regionalisms have emerged Computing power is increasingly an impetus to the world economy and technological developments have changed and are changing almost every aspect of contemporary economic affairs Gilpin's Global Political Economy considers each of these developments Reflecting a lifetime of scholarship it offers a masterful survey of the approaches that have been used to understand international economic relations and the problems faced in the new economy Gilpin focuses on the powerful economic political and technological forces that have transformed the world He gives particular attention to economic globalization its real and alleged implications for economic affairs and the degree to which its nature extent and significance have been exaggerated and misunderstood Moreover he demonstrates that national policies and domestic economies remain the most critical determinants of economic affairs The book also stresses the importance of economic regionalism multinational corporations and financial upheavals Gilpin integrates economic and political analysis in his discussion of global political economy He employs the conventional theory of international trade insights from the theory of industrial organization and endogenous growth theory In addition ideas from political science history and other disciplines are employed to enrich understanding of the new international economic order This wide ranging book is destined to become a landmark in the field

The Nation-state in Question T. V. Paul, G. John Ikenberry, John A. Hall, 2003-10-05 Has globalization forever undermined the state as the mighty guarantor of public welfare and security In the 1990s the prevailing and even hopeful view was that it had The euphoria did not last long Today the return of the state is increasingly being discussed as a desirable reality This book is the first to bring together a group of prominent scholars from comparative politics international relations and sociology to systematically reassess through a historical lens that moves beyond the standard focus on the West state society relations and state power at the dawn of the twenty first century The contributors examine the sources and forms of state power in light of a range of welfare and security needs in order to tell us what states can do today They assess the extent to which international social forces affect states and the capacity of states to adapt in specific issue areas Their striking conclusion is that states have continued to be pivotal in diverse areas such as nationalism national security multiculturalism taxation and industrial relations Offering rich insights on the changing contours of state power The Nation State in Question will be of interest to social scientists students and policymakers alike John Hall's introduction is followed by chapters by Peter Baldwin John Campbell Francesco Duina Grzegorz Ekiert Jeffrey Herbst Christopher Hood Anatoly Khazanov Brendan O Leary T V Paul Bernard Yack Rudra Sil and Minxin Pei The conclusion is by John Ikenberry

**Eastern Europe Since 1970** Bulent Gokay, 2015-12-22 From the hardening grip of Soviet domination under Brezhnev to the collapse of communism and its aftermath Bulent Gokay provides the essential introduction to Eastern Europe in the last quarter of the twentieth century The Soviet invasion of Czechoslovakia in 1968 spelt the end of reformist communism and the tightening of Soviet control throughout Eastern Europe In spite of this several countries within the Soviet Bloc managed to retain varying degrees of independence over the next two decades Focusing on the struggle towards economic and social modernisation in the region and the competing influences of East and West in a dangerous Cold War Bulent Gokay shows how individual circumstances and diverse national characteristics made a uniform application of the Soviet model impossible and charts the growing resistance to domination and the momentous events which finally toppled Soviet power in the region

**Dangerous Peace** Alpo M Rusi, 2021-11-28 Alpo Rusi provides a broad vision of the strategic landscape for the coming century warning against dangers inherent in the emerging world order He predicts a more complex and potentially hostile multipolar system based on four or five rival trading blocs Despite the centrality of trade rivalries the role of military force will not vanish Although he considers superpower conflict unlikely he expects that lower level conflicts will become more prevalent Consequently Rusi believes that the trading blocs will have to actively pursue security arrangements that will safeguard the traditional role of the nation state Examining the international system from a geopolitical and geoeconomic perspective Alpo Rusi provides a broad vision and bold forecast of the emerging strategic landscape for the coming century An asymmetrical world system is emerging The United States is now the sole true world power it forms the core of a unipolar order characterized by an uneven division of world power and economic resources Rusi argues however that this post Cold War order will not survive into the next century Rusi suggests that the power vacuum in the former Soviet empire will be filled by China in Asia and by the European Union in Eastern Europe Russias disintegration and decline in world power status will continue but may have reached its bottom line economically and Islam will gain strength in various parts of the world embracing a new international role He also predicts that the world will be split into four or five distinct trading blocs A European bloc formed around the European Union an East Asian bloc potentially strong interventionist and even aggressive formed around China and the Singapore economic region Japan as a strong and still competitive economic power and a Pan American bloc also strong but potentially isolationist formed around the United States One of the question marks will be the future ability of an orthodox Russia to facilitate conditions for an economic space According to Rusi these trading blocs will develop new political or geopolitical interests For example the

European bloc will extract fossil fuels from the former Soviet Union instead of the Middle East thereby changing the existing global trade system Each bloc will have certain internal problems the Europeans will be linked to the unstable successors to the Soviet Union the East Asian Bloc will have to contemplate whether China's economic growth and geopolitical expansions will create a new bipolar world in the early twenty first century and the Pan American bloc will struggle with continuing political and economic instability in South and Central America Finally Rusi warns that it is crucial for the European and Pan American blocs to build upon the traditional Euro Atlantic relationship Without it he argues a truly polarized and potentially hostile bloc system will take root most likely lining the Western pan regions against China's expansiveness Right-sizing the State Brendan O'Leary, Ian S. Lustick, Thomas Callaghy, 2001-11-22 Strategic decisions to reduce the size scope or ambitions of organizations including states in order to enhance future prospects are among the most difficult and least well understood choices made in collective life This volume makes a bold effort to identify the conditions in which less really is more Each contributor to the volume analyzes the possibilities for institutional redesign including state contraction for responding effectively to destabilizing and often violence laden conflicts Among the countries discussed in detail are Turkey Pakistan Morocco Congo Jordan Indonesia Russia and the former Soviet Union Iraq and India An impressive array of experts assess strategies that go against the grain strategies to rightsize and even downsize states by changing their external and internal borders Typically this means opposing prevailing prejudices against partition and separatist solutions as well as paying high political costs in the short run for more manageable political problems in the long run Understanding the conditions under which such strategies can be entertained and successfully implemented is as difficult and as important as making this kind of option available to beleaguered states in a complex and rapidly changing world Diasporas and Ethnic Migrants Rainer Munz, Rainer Ohliger, 2004-08-02 This work adopts a comparative approach to explore interrelations between two phenomena which so far have rarely been examined and analysed together namely the dynamics of diaspora and minority formation in Central and Eastern Europe on the one hand and the diaspora migration on the other
