**Arts and Business** Elena Raviola, Peter Zackariasson, 2016-10-04 Arts and Business aims at bringing arts and business scholars together in a dialogue about a number of key topics that today form different understandings in the two disciplines Arts and business are many times positioned as opposites Where one is providing symbolic and aesthetic immersion the other is creating goods for a market and markets for a good They often deal and struggle with the same issues framing it differently and finding different

solutions This book has the potential of offering both critical theoretical and empirical understanding of these subjects and guiding further exploration and research into this field Although this dichotomy has a well documented existence it is reconstructed through the writing out of business in art and vice versa This edited volume distinguishes itself from other writings aimed at closing the gap between art and business as it does not have a firm standpoint in one of these fields but treating them as symmetrical and equal The belief that by giving art and business an equal weight the editors also create the opportunity to communicate to a wider audience and construct a path forward for art and business to coexist **Women,**

**Gender, and Technosciences, 1900-2020** Grégory Dufaud, Isabelle Lémonon-Waxin, 2025-04-03 This innovative volume analyzes the historical entanglement of gender technosciences and government governance Situated at the crossroad of women and gender studies science and technology studies and political sociology this volume shows the ever accumulating gendered mechanisms that have determined the careers of scientific women and their access to power positions It underlines on different scales from the lab to international organizations or states how the masculine culture of technoscientific practices has assigned women to subaltern institutional positions while social practices of legitimization and recognition ended up granting some women access to leadership positions outside of institutions With a broad geographic political and disciplinary scope the contributors draw on a variety of new sources including interviews private collections and archives to examine the institutions structures and policies that shaped the technosciences as well as the individuals who developed practices and environments that gained agency for themselves and their contemporaries This book will be of interest to students and scholars alike interested in women and gender studies political studies STS history and sociology of science and technology *Oxford Textbook of Medical Education* Kieran Walsh, 2013-10-31 Providing a comprehensive and evidence based reference guide for those who have a strong and scholarly interest in medical education the Oxford Textbook of Medical Education contains everything the medical educator needs to know in order to deliver the knowledge skills and behaviour that doctors need The book explicitly states what constitutes best practice and gives an account of the evidence base that corroborates this Describing the theoretical educational principles that lay the foundations of best practice in medical education the book gives readers a through grounding in all aspects of this discipline Contributors to this book come from a variety of different backgrounds disciplines and continents producing a book that is truly original and international

*Theory and Practice of Leadership* Roger Gill, 2006-02-08 Theory and Practice of Leadership provides a comprehensive and critical review of the major theories of leadership and clearly lays out a more holistic understanding of leadership that integrates the disparate approaches and theories Throughout the book Roger Gill uses illustrative examples and cases drawn from research and practice in the UK mainland Europe and the USA as well as Asia and elsewhere enabling students to better relate the theories to real cases and their own experience A clear picture of leadership theory and leadership development is set out through accessible language and a focus on bridging the gap between theory and practice

Questioning Leadership Gabriele Lakomski, Scott Eacott, Colin W. Evers, 2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars. It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes. This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully. It poses challenging questions such as: Is leadership really necessary for high quality school performance? Can schools function effectively without leadership? Is it possible to describe the work that principals do without using the word leadership? How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance? This book does not assume that leadership is the key to organisational performance, although it acknowledges the work that principals do. It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis-à-vis organisational and institutional structures. It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools. At a time when leadership's dominance seems unshakeable, this is a bold book that should appeal to postgraduate students of educational leadership and management, those undertaking training in educational administration, and current school leaders interested in exploring the value of leadership for educational organisations.

Handbook of Research on Gender and Leadership Susan R. Madsen, 2017-05-26 Although some progress has been made in recent decades in getting women into top positions in government, business, and education, there are ongoing persisting challenges with efforts to improve the opportunities for women in leadership. The Handbook of Research on Gender and Leadership comprises the latest research from the world's foremost scholars on women and leadership, exposing problems and offering both theoretical and practical solutions on how to best strengthen the impact of women around the world.

**Unleadership** Selen Kars-Ünlüoğlu, Carol Jarvis, Hugo Gaggiotti, 2024-03-04 Leaderly acts and practices from unexpected places are often overlooked and yet have remarkable power. These spontaneous acts are in sharp contrast to those of formal leaders in governments and leading corporations. Global events like the Covid 19 pandemic and the climate crisis light up these differences. This book delves deeper, exploring these leaderly acts and practices more fully and beyond extraordinary events. The authors describe these as unleadership, a term defined in this book as a set of acts and practices that are undertaken in a spirit of spontaneity and generosity for social good. Four dimensions of unleadership are identified in this book: paying it forward, living with the unknown, catching the wave, and confident connecting and collaborating. Unleadership exposes the potential that is unleashed when members of the community discover their own

power to act and reclaim what they have delegated to their leaders Based on extensive research the authors highlight the flourishing of alternative forms of leading that encourage rethinking ideas of leadership and followership They provide practical guidance to organisations and practitioners for enriching their leaderly capacity and cultivating unleadership practices to co exist with and complement leadership practices Unleadership is an invaluable resource for leaders and managers in public and private organisations as well as students of leadership and organisational development
