Inhuman Thoughts Asher

Seidel, 2008-03-25 *Inhuman Thoughts* is a philosophical exploration of the possibility of increasing the physiological and psychological capacities of humans to the point that they are no longer biologically psychologically or socially human The movement is from the human through the trans human to the post human The tone is optimistic Seidel argues that such an evolution would be of positive value on the whole Seidel's initial argument supports the need for a comprehensive ethical theory the success of which would parallel that of a large scale scientific revolution such as Newtonian mechanics He elaborates the movement from the improved but still human to the post human and philosophically examines speculated examples of post human forms of life including indefinitely extended life span parallel consciousness altered perception a

sociality and a sexuality Inhuman Thoughts is directed at those interested in philosophical questions on human nature and the best life given the possibilities of that nature Seidel s overall argument is that the most satisfactory answer to the latter question involves a transcendence of the present confines of human nature *Immortal Passage* Asher Seidel,2010-10-11

Immortal Passage Philosophical Speculations on Posthuman Evolution is Asher Seidel s speculative account of posthuman evolution Seidel begins with the transitional period in which humans begin to live for significantly extended periods then moves to the closer future in which having transitioned the now posthumans enjoy enhanced cognitive and creative powers Finally Seidel enters the distant future where our descendants might possess abilities beyond the limits of what is presently conceivable Seidel s speculations engage various philosophical problems Seidel seeks an ethical theory that co develops with a deeper scientific understanding of ourselves He also examines the metaphysical and epistemological presuppositions of his recommendation for human to posthuman transitioning including mind body dualism vigorous enough to allow for full bodied consciousness but insufficient for freewill perceptual direct realism and self identity As the speculations reach further into the future various socio political questions regarding the difficulties of transitioning are explored Speculated possibilities of pain free living cooperative relationships nonbiological selfhood and radically enhanced cognitive abilities are examined in depth in this mind bending ride into the future of humankind **Our Posthuman Future** Francis Fukuyama,2017-06-15

Is a baby whose personality has been chosen from a gene supermarket still a human If we choose what we create what happens to morality Is this the end of human nature The dramatic advances in DNA technology over the last few years are the stuff of science fiction It is now not only possible to clone human beings it is happening For the first time since the creation of the earth four billion years ago or the emergence of mankind 10 million years ago people will be able to choose their children s sex height colour personality traits and intelligence It will even be possible to create superhumans by mixing human genes with those of other animals for extra strength or longevity But is this desirable What are the moral and political consequences Will it mean anything to talk about human nature any more Is this the end of human beings Our Posthuman Future is a passionate analysis of the greatest political and moral problem ever to face the human race *Magical Thinking* Stuart McWilliams,2011-12-08

How do we write about magic Responding to a renewed interest in the history of the occult this volume examines the role of magic in a series of methodological controversies in the humanities In case studies ranging from the necromancy of historiography to the strident rationalism of the New Atheism Magical Thinking sets out the surprising ways in which scholars and critics have imagined the occult The volume argues that thinking and writing about magic has engendered multiple epistemological crises profoundly unsettling the understanding of history and knowledge in Western culture By examining how scholarly writing has contended and conspired with discourses of enchantment the book reveals the implications of magic and its scholarship for intellectual history Parallels and Responses to Curricular Innovation Brad Petitfils,2014-10-24

This volume explores two radical shifts in history and subsequent responses in

curricular spaces the move from oral to print culture during the transition between the 15th and 16th centuries and the rise of the Jesuits and the move from print to digital culture during the transition between the 20th and 21st centuries and the rise of what the philosopher Jean Baudrillard called hyperreality The curricular innovation that accompanied the first shift is considered through the rise of the Society of Jesus the Jesuits These men created the first global network of education and developed a humanistic curriculum designed to help students navigate a complicated era of the known human centered and unknown God centered universe The curricular innovation that is proposed for the current shift is guided by the question What should be the role of undergraduate education become in the 21st century Today the tension between the known and unknown universe is concentrated on the interrelationships between our embodied spaces and our digitally mediated ones As a result today s undergraduate students should be challenged to understand how in the objectively focused commodified STEM centric landscape of higher education the human subject is decentered by the forces of hyperreality and in turn how the human subject might be recentered to balance our humanness with the new realities of digital living Therein one finds the possibility of posthumanistic education

Philosophical Posthumanism Francesca Ferrando, 2019-06-27 The notion of the human is in need of urgent redefinition At a time of radical bio technological developments and in light of the political and environmental imperatives of our age the term posthuman provides an alternative The philosophical landscape which has developed as a response to the crisis of the human includes several movements such as Posthumanism Transhumanism Antihumanism and Object Oriented Ontology This book explains the similarities and differences between these currents and offers a detailed examination of a number of topics that fall under the posthuman umbrella including the anthropocene artificial intelligence and the deconstruction of the human Francesca Ferrando affords particular focus to Philosophical Posthumanism defined as a philosophy of mediation which addresses the meaning of humanity not in separation but in relation to technology and ecology The posthuman shift thus emerges in the global call for social change responsible science and multispecies coexistence

The Future of Post-Human Formal Science Peter Baofu, 2010-02-19 What exactly is so appealing in formal science such that its influence can be seen in numerous disciplines nowadays for practical purposes like better functionality performance and so on as Pythagoras already famously said in antiquity Number is the ruler of forms and ideas and the cause of gods and demons This contemporary addiction to practical convenience in formal science has turned a blind eye to its other side which has impoverished both our knowledge of reality and the well being of our lifeworld Contrary to conventional wisdom the other side of this appealing addiction has yet to be comprehensively understood nor has the fact that its practical convenience is neither possible nor desirable to the extent that the proponents of formal science would like us to believe Needless to say this by no means suggests that formal science should not be used for practical purposes or that the literature in formal science and other related fields like computer science information theory microeconomics decision theory statistics and linguistics just to cite a few of them should be dismissed Of course neither of these two extreme views is

reasonable either. Instead, this book provides an alternative, better way to understand the nature of formal science, especially in relation to systems theory, for practical convenience while learning from different approaches in the literature but without favoring any one of them nor integrating them, since they are not necessarily compatible with each other. In the end, this book offers a new theory to transcend the existing approaches in the literature in a new direction not thought of before. This seminal project is to fundamentally alter the way that we think about formal science from the combined perspectives of the mind, nature, society, and culture, with enormous implications for the human future and what I originally called its post-human fate.

The Changing Scope of Technoethics in Contemporary Society Luppicini, Rocci, 2018-04-13. In the modern era, each new innovation poses its own special ethical dilemma. How can human society adapt to these new forms of expression: commerce, government, citizenship, and learning, while holding onto its ethical and moral principles? *The Changing Scope of Technoethics in Contemporary Society* is a critical scholarly resource that examines the existing intellectual platform within the field of technoethics. Featuring coverage on a broad range of topics such as ethical perspectives on internet safety, technoscience, and ethical hacking, communication, this book is geared towards academicians, researchers, and students seeking current research on domains of technoethics.

The Future of Post-Human Chemistry Peter Baofu, 2011-08-08. Is chemistry really so valuable that as Theodore L. Brown, 2011, and his colleagues continue to claim in the twelfth edition of their work, in 2011, chemistry is the central science in connecting the physical sciences with the life and applied sciences? WK 2011. C. Reinhardt, 2001. This crowning of chemistry, however, can be contrasted with an opposing view as Michael Polanyi once questioned the centrality of chemistry when he wrote that no inanimate object is ever fully determined by the laws of chemistry, so other fields of study are just as important. BQ 2011. Contrary to these conflicting views about chemistry and other ones discussed in the book, chemistry in relation to substances and their changes is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe. This challenge to the conflicting views about chemistry does not mean, however, that chemistry is useless or that those fields of study related to chemistry like astronomy, physics, geology, mathematics, material science, biology, psychology, computer science, and so on, should be ignored too. Of course, neither of these extreme views is reasonable. Instead, this book provides an alternative, better way of understanding the future of chemistry, especially in the dialectic context of substances and their changes, while learning from different approaches in literature but without favoring any one of them or integrating them, since they are not necessarily compatible with each other. This book offers a new theory that is the creational theory of chemistry to go beyond the existing approaches to literature in an original way. If successful, this seminal project will fundamentally change the way that we think about chemistry from the combined perspectives of the mind, nature, society, and culture, with enormous implications for the human future and what the author originally called its post-human fate.

Exits to the Posthuman Future Arthur Kroker,2014-03-12 Exits to the Posthuman Future is media theory for a global digital society which thrives and sometimes perishes at the intersection of technologies of speed distant ethics and a pervasive cultural anxiety Arthur Kroker s incisive and insightful text presents the emerging pattern of a posthuman future life at the tip of technologies of acceleration drift and crash Kroker links key concepts such as Guardian Liberalism and Obama s vision of the Just War with a striking account of culture drift as the essence of real world technoculture He argues that contemporary society displays growing uncertainty about the ultimate ends of technological innovation and the intelligibility of the digital future The posthuman future is elusive is it a gathering storm of cynical abandonment inertia disappearance and substitution Or else the development of a new form of critical consciousness the posthuman imagination as a means of comprehending the full complexity of life Depending on which exit to the posthuman future we choose or perhaps which exit chooses us Kroker argues that a very different posthuman future will likely ensue

Philosophical Faith and the Future of Humanity Helmut Wautischer, Alan M. Olson, Gregory J. Walters, 2012-01-02 Karl Jaspers who died in 1969 had a profound impact on 20th century theology and philosophy His central thesis called for among other things a de centering of philosophy from its Eurocentric roots and a renewal of its dialogue with other traditions especially Asian ones This collection of essays includes unpublished work by Jaspers himself as well as testimonies to his life and career by colleagues associates and translators some of who knew Jaspers personally Readers will also find commentary and interpretation by researchers who have explored Jaspers work for decades and a biographical account of Jaspers student Leonard Ehrlich who handled much of Jaspers English translation The book interrogates Jaspers conceptions of philosophical faith his philosophy of communication and the prospects for world philosophy in the future Focusing on philosophical faith it assesses Jaspers interpretations of key philosophers such as Kant Hegel Schelling Kierkegaard Nietzsche and Rosenzweig as well as examining his personal relationships with Bultmann and Heidegger Contributors also look at Jaspers philosophies of religion and history his hypothesis of the axial age Achsenzeit and his contributions to metaphysics periechontology and economics Finally chapters cover Jaspers philosophy of communication and world history The latter are informed by a burgeoning interest in Kantian Freiheitphilosophie that influenced Jaspers as well as concerns over the future of humanity These concerns in part account for Jaspers growing

popularity in the Middle East Eastern Europe Central South America and Asia Also included are lucid clarifications of the difference between religious and philosophical faith and the relevance of certainty trust and communication for a future of mankind Trained as a psychiatrist Jaspers practiced this profession before becoming a philosopher and thus had a keen insight into the workings of the human mind even as he challenged the philosophical establishment of his time It is perhaps this depth to his background that adds to the contemporary relevance of his work

The Age of Promiscuity Doru Pop, 2018-11-15 This book presents an original and engaging look at contemporary popular culture opening with the provocative idea that this is a day and age of complete exhaustion of ideas images stories and myths Questioning the effects of content recycling in cinema and other media the author further elaborates on the repurposing of cultural junk the reassembling of narratives and myths The thought provoking hypothesis proposed in this research is that we have entered an age of cultural promiscuity By analyzing the mutations of myth making practices and connecting them with larger cultural manifestations the author explains these transformations as integral to the development of a myth illogical imagination Cinematic and mythological representations in mainstream Hollywood films have reached a point of amalgamation with no return which marks the beginning of a fourth age of representations where signs and meanings are manifested in illogical permutations This is more explicit in films that commingle aliens cowboys undead American presidents and zombie nazis joining together in the same narrative ghosts werewolves and vampires aggregating disjointed storylines and historical fake facts all coalesced in an orgy of empty burlesque and infantile masquerades This interdisciplinary research combines cultural studies film criticism art and myth interpretations bringing into the debate multiple concepts from related fields such as critical theory and media criticism The book also opens up to innovative approaches from a wide array of academic disciplines offering researchers students and those fascinated by the transformations happening in contemporary cinema an interpretative tool based on a revised dialectic approach The conclusion is that we are now victims of a zombie semiotics Meaning making in contemporary culture politics and aesthetics is dominated by a process of incessant desecration of significations specific to the total mishmash of representations analyzed here
