Election Campaigning in East and Southeast Asia

Christian Schafferer,2017-05-15 At the end of the last century political marketing appeared to have become a global phenomenon with an increasing number of electoral campaigns resembling those of the United States Comparative research has shown the existence of a so called Americanization of election campaign practices This book examines the nature of electoral campaigns in East and Southeast Asia Based on the analyses of developments in Japan Taiwan South Korea Malaysia and the Philippines it examines whether there is an Asian style of election campaigning Contributing to the fields of media studies and comparative politics the book offers an insight into the various changes in election campaigning that occurred in the East and Southeast Asia during the process of democratization and modernization It sheds new light on the causes and consequences of the worldwide proliferation of US election campaigning and provides the academic world with previously unpublished material on the electoral strategies of Asian political parties **The Hidden Costs of Clean**

Election Reform Frederic Charles Schaffer,2008 Schaffer reveals how tinkering with the electoral process even with the best of intentions can easily damage democratic ideals **Mixed Blessing** Hazel McFerson,2001-12-30 Invidious distinctions on the basis of race and overt racism were central features in American colonial policy in the Philippines from 1898 to 1947 as America transported its domestic racial policy to the island colony This collection by young Filipino scholars analyzes American colonialism and its impact on administration and attitudes in the Philippines through the prism of American racial tradition a structural concept which refers to beliefs attitudes images classifications laws and social customs that shape race relations and racial formation in multiracial and colonial societies The dominance of this tradition was manifested in the wanton prerogatives of the U S Congress and others who helped to carry out colonial policy in the region The Spanish flexible racial tradition had resulted in a system based on ethnicity and class as determinants of social and economic structure while the rigid U S racial tradition assigned race the more dominant role The cultural affinity between the early individual American administrators and the Filipino elite however meant that class based distinctions in the islands were not broken up Thus the extreme elitist character of the Philippines economy and society persisted and became impervious to the influences which in other Asian countries led to a progressive weakening of elite structures as the 20th century advanced **Between Two Worlds - Society, Politics, and Business in the Philippines** Rupert

Hodder,2003-08-29 This book considers the tensions and complementarities between two different attitudes towards social relationships on the one hand the attitude aspired to in the West which emphasises individualism institutional probity and the rule of law and which regards social relationships as ideals or absolutes and on the other hand the attitude often found in Asia where loyalties based on kinship local networks and places of origin are vitally important and where social relationships institutions and practices are often material for manipulation and the pursuit of ambition The book explores the nature of these different attitudes discussing the different attitudes as they are found in practice in the Philippines It considers how they are bound up with material progress and how they have a crucial impact on business politics and region centre relations

Government of the Shadows Eric Wilson, 2009-01-20 This book uncovers the activities of clandestine governments. It explores how covert political activity and transnational organised crime are linked and how they ultimately work to the advantage of state and corporate power. Using a variety of case studies from the mafia in Italy to programmes for food and reconstruction in Iraq, the authors illustrate that parapolitical structures are not deviant but central to the operation of global governments. The creation of this parallel world economy, the source of huge political and economic potential, entices states to undertake new forms of regulation, either through their own intelligence agencies or through the more shadowy world of criminal cartels.

Emotional Bureaucracy Rupert Hodder, 2017-07-28 This study casts doubt on the classic model of bureaucracy and its relevance to developing areas. In particular, Hodder challenges the Weberian distinction between the role of emotion and a modern bureaucracy's impersonal and rational qualities. He suggests that bureaucracies function differently and offers a different perspective. The focus is the Philippines, but Hodder's conclusions are applicable to other developing areas. Two main themes are discussed. The first explores the classic Weberian model of bureaucracy. The second concerns ways of thinking about the social features of bureaucracy. The focus is dimensions of bureaucracy that are less dependent upon structure. What emerges is an innovative description of the social world of bureaucracy and its attributes. Hodder observes that discussions with civil servants and politicians in developing countries suggest that deepening emotion, a strengthening sense of the importance of social relationships and informality are vital to the emergence of professional and stable organizations. Hodder believes it is possible to account for these social features of bureaucracy by understanding participants' representations and practices. While these ideas are discussed in the context of the Philippines, they have wider relevance to other states, especially those whose bureaucracies are characterized as weak and personalistic. The author suggests that these characterizations and possible remedies may need to be reconsidered. He argues that through informality and emotion, effective and stable organizations can be built; excessive formalism may exacerbate the problems that governments of developing countries are trying to solve. The means to strengthen bureaucracies in developing countries are already available and rather than be ignored or suppressed, need to be identified and encouraged.

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't? What factors account for different economic performance among states that are vulnerable to external shocks, crony capitalism, and political instability? This book argues that the answer lies in the structuring of state power, specifically the way different sets of governing elites, political leaders, and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each

other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future Routledge Handbook of the Contemporary Philippines Mark R. Thompson, Eric Vincent C. Batalla, 2018-02-19 The Philippines is a fascinating example of a poor country democracy where issues of economic development and poverty political participation and stability as well as ethnicity and migration are crucial The Routledge Handbook of the Contemporary Philippines provides a comprehensive overview of the current political economic social and cultural issues of the country The Handbook is divided into the following four sections concentrating on a different aspect of the Philippines domestic politics foreign relations economics and social policy cultures and movements In terms of domestic politics chapters discuss clientelism bossism dynasties pork barrel and corruption as well as institutions the presidency congress the judiciary the civil service political parties and civilian military relations The Philippines is confronted with many overseas challenges with the foreign relations section focused on the country's relationship with China Japan and the USA as well as assessing the impact of the Filipino diaspora community around the world Regarding economics and social policy authors examine industrial policy capital flight microfinance technocracy economic nationalism poverty social welfare programs and livelihoods The final section on Philippine cultures and movements highlights issues of customs gender religion and nationalism while also examining various social and political forces the peasantry the middle class indigenous peoples NGOs the left trade unionism the women's movement and major insurgencies Written by leading experts in the field the Handbook provides students scholars and policymakers of Southeast Asia with an interdisciplinary resource on the evolving politics society and economics of the Philippines *High-level Political Appointments in the Philippines* Rupert Hodder, 2013-10-08 This book questions the belief that patronage explains poor governance and weak organizations Its focus is on high level political appointees in the Philippines but its implications for development processes and policy are far reaching Patronage stimulates the emergence of democracy and welfare and constitutes formal organizations So intimately connected is it with the health of democracy and effective organizations that attempts to eradicate patronage only harm social organizational and democratic life In developed societies this has meant a growing Puritanism interspersed with bouts of corruption and moral panic and as they seek to maintain effective organizations and vibrant democracies a mounting desire to project their own anxieties and imperfections onto developing countries Development Without Freedom Songok Han Thornton, 2016-12-05 Thanks to the inroads of

IMFism and the war on terror America has lost much of the soft power it enjoyed in Asia during the early 1990s The winners by default are some of the world's most undemocratic development models such as Sino globalism Asian values took a hard blow from the Asian Crash but have returned in this even more virulent form The West is left sitting on the sidelines of a distinctly Asian contest of development with or without freedom Development Without Freedom explores this crucial trial by development which will define the politics of globalization for decades to come *The Philippines* David Joel Steinberg, 2018-02-19 A unified nation with a single people the Philippines is also a highly fragmented plural society Divided between uplander and lowlander rich and poor Christian and Muslim between those of one ethnic linguistic and geographic region and those of another the nation is a complex mosaic formed by conflicting forces of consensus and national identity and of division and instability It is not possible to comprehend the many changes in the Philippines such as the rise and fall of Ferdinand Marcos or the revolution that toppled him without an awareness of the religious cultural and economic forces that have shaped the history of these islands These forces formed the focus of the first edition of *The Philippines* Of that 1982 edition the late Benigno Aquino Jr noted that anyone wanting to understand the Philippines and the Filipinos today must include this book in his must reading list The fourth edition has been updated through the final years of the Ramos presidency and contains a new section on the impact of President Estrada *Philippine Politics* Lynn White III, 2014-12-17 Philippine political history especially in the twentieth century challenges the image of democratic evolution as serving the people and does so in ways that reveal inadequately explored aspects of many democracies In the first decades of the twenty first century the Philippines has nonetheless shown gradual socioeconomic progress This book provides an interpretive overview of Philippine politics and takes full account of the importance of patriotic Philippine factors in making decisions about future political policies It analyses whether regional and local politics have more importance than national politics in the Philippines Discussing cultural traditions of patronism it also examines how clan feuds localize the state and create strong local policies These conflicts in turn make regional and family run polities collectively stronger than the central state institution The book goes on to explore elections in the Philippines and in particular the ways in which politicians win democratic elections the institutionalized role of public money in this process and the role that media plays Offering a new interpretive overview of Philippine progress over many decades the author notes recent economic and political changes during the current century while also trying to advance ideas that might prove useful to Filipinos Presenting an in depth analysis of the problems and possibilities of politics and society in the Philippines the book will be of interest to those researching Southeast Asian Politics Political History and Asian Society and Culture **Party Politics in Southeast Asia** Dirk Tomsa, Andreas Ufen, 2013 Contributing to the growing discourse on political parties in Asia this book looks at parties in Southeast Asia's most competitive electoral democracies of Indonesia Thailand and the Philippines It highlights the diverse dynamics of party politics in the region and provides new insights into organizational structures mobilizational strategies and

the multiple dimensions of linkages between political parties and their voters The book focuses on the prominence of clientelistic practices and strategies both within parties as well as between parties and their voters It demonstrates that clientelism is extremely versatile and can take many forms ranging from traditional personalized relationships between a patron and a client to the modern reincarnations of broker driven network clientelism that is often based on more anonymous relations The book also discusses how contemporary political parties often combine clientelistic practices with more formal patterns of organization and communication thus raising questions about neat analytical dichotomies Straddling the intersection between political science and area studies this book is of interest to students and scholars of contemporary Southeast Asian politics and political scientists and Asian Studies specialists with a broader research interest in comparative democratization studies

Political Booms Lynn T. White, 2009 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle classes promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike previous books shows that both the roots and results of growth are largely political not just economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the aforementioned countries Violence has been common in these politics along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the role of local money and power above all from small and medium sized firms that emerged after agrarian reforms on elections and justice this book asks democrats squarely to face the extent to which electoral procedures have failed to help ordinary citizens Students and scholars of Asia will all need this book as will students of the West whose methods have become parochial
