common All are networks either people or places or things that relate and connect to one another Only relatively recently have mathematicians begun to explore such networks and connections and their importance has taken everyone by surprise The mathematics of networks form the basis of many fascinating puzzles and problems from tic tac toe and circular sudoku to the Chinese Postman Problem can he deliver all his letters without traversing the same street twice Peter Higgins shows how such puzzles as well as many real world phenomena are underpinned by the same deep mathematical structure Understanding mathematical networks can give us remarkable new insights into them all *Suicide Voices* Sarah Waters,2020-09-01 This book examines the phenomenon of work suicides in France and asks why at the present historical juncture conditions of work can push individuals to take their own lives During the 2000s France experienced what commentators have described as a suicide epidemic whereby increasing numbers of workers in the face of extreme pressures of work chose to kill themselves The book analyses a corpus of testimonial material linked to 66 suicide cases across three large French companies during the period from 2005 to 2015 It aims to consider what the extreme and subjective act of self killing narrated in suicide letters can tell us about the contemporary economic order and its impact on flesh and blood bodies What do rising work related suicides reveal about conditions of human labour in the twenty first century Does neoliberal economics condition a desire for suicide How do suicidal individuals describe the causes and motivations of their act Combining critical perspectives from sociology history testimony studies economics cultural studies and public health the book raises critical questions about the human costs of the shift to a finance driven neoliberal order and its everyday effects within the French workplace *The Local Museum in the Global Village* Insa Müller,2020-10-06 In remote areas of Europe local history museums struggle to connect with the rapidly changing and increasingly diverse communities around them Insa M ller asks how these museums can recast themselves to strengthen the links to their communities Combining theoretical deliberations empirical investigations of the case of two Norwegian islands and a museum experiment she offers starting points for rethinking the local history museum while at the same time providing suggestions for locally adapted museum practice *New Progress to First Certificate Teacher's Book* Leo Jones,1996-11-07 This new colour edition has been updated to conform to the revised FCE specifications **The Condition of Digitality** Robert Hassan,2020-01-10 David Harvey s *The Condition of Postmodernity* rationalised capitalism s transformation during an extraordinary year 1989 It gave theoretical expression to a material and cultural reality that was just then getting properly started globalisation and postmodernity whilst highlighting the geo spatial limits to accumulation imposed by our planet However this landmark publication author Robert Hassan argues did not address the arrival of digital technology the quantum leap represented by the move from an analogue world to a digital economy and the rapid creation of a global networked society Considering first the contexts of 1989 and Harvey s work then the idea of humans as analogue beings he argues this arising new human condition of digitality leads to alienation not only from technology but also the environment This condition he suggests is not

an ideology of time and space but a reality stressing that Harvey's time space compression takes on new features including those of outward and inward globalisation and the commodification of all spheres of existence Lastly the author considers culture's role drawing on Rahel Jaeggi's theories to make the case for a post modern Marxism attuned to the most significant issue of our age Stimulating and theoretically wide ranging *The Condition of Digitality* recognises post modernity's radical new form as a reality and the urgent need to assert more democratic control over digitality *Salaries in the Postal Service* United States. Congress. House. Committee on Post Office and Post Roads, 1945 **Salaries in the Postal Service** United States. Congress. House.
