

82. POSTMETAPHYSICAL THINKING

HABERMAS'S CONCEPTION OF "postmetaphysical thinking" can be understood as his alternative to *postmodern* thinking. In a series of essays first collected in *Postmetaphysical Thinking* (1988) and then later revisited in *Postmetaphysical Thinking II* (2017), he situates his broader defense of intersubjective, procedural, communicative rationality as a response to post-Hegelian critiques of modernity and metaphysics. The first collection follows on the heels of his prior work, *The Philosophical Discourse of Modernity* (1985), and poses a question continuous with it: To what extent has twentieth-century philosophy remained continuous with modern philosophy, and how does it represent a break from it? While he agrees with critiques of many core assumptions and values embedded in modernity's philosophical projects, insofar as they were defined by totalizing, subject-centered thinking, Habermas remains committed to the value of reclaiming reevolved versions of reason, universalism, and context transcendence. The task, as he sees it, is to rehabilitate the concept of reason while avoiding the twin risks of an instrumentalized reason mobilized in the name of totalitarianism, and an all-inclusive reason that attempts to give a totalizing and unified theory of everything (PMT, 340). The second collection, *Postmetaphysical Thinking II*, published thirty years later, reflects the significant developments in Habermas's contributions to questions of social and political philosophy by drawing out implications of a postmetaphysical approach for questions about the connections between rule of law and democracy and the role of religion in the public sphere. Postmetaphysical thinking contributes to defenses of pluralism and tolerance in the process of exchanging reasons, and aims to offer the self-critical tools of philosophy to all citizens of modern democratic societies.

Postmetaphysical thinking rests on a critique of metaphysics Habermas traces back to Hegel, who changed "the basic condition of philosophizing" (PMT, 29), and who began but ultimately left unfinished the task of critiquing the centrality of subjectivity in modern philosophy from Descartes to Kant (PMT, 29). Enlightenment philosophy heralded the break from religion and political authority, ushering in empirical sciences whose self-grounding depended on procedural rationality accessible to all. But Hegel, who saw the need for such a move in philosophy, could not bring it about. Habermas pins the incompleteness of Hegel's critique of subjectivity on his reliance on the idea of absolute knowledge, which he thinks remains stuck within the philosophy of subjectivity. So, when Habermas claims that since Hegel there has been "no alternative to postmetaphysical thinking" (PMT, 29), he means that Hegel's critique of self-grounded, subject-centered modern philosophy effectively catalyzed a movement away from the kind of metaphysics that had been definitive of modern philosophy.

Metaphysical thinking has four aspects, according to Habermas: identity thinking, idealism, philosophy of consciousness, and the strong concept of theory (PMT, 29). Identity thinking refers to a perspective by which things generated in the world, existing in their diversity, are abstracted from their individuality and seen through unitary thinking. From that God's-eye perspective, the diversity of things and beings in the world can be interpreted anew as originating in the unified whole. For Plato, for instance, we can abstract

Postmetaphysical Thinking Jürgen Habermas, 1992 Considers the nature and future of philosophy in a post metaphysical age In the first part Habermas examines the legacy of Kant and assesses some recent attempts to return to metaphysical modes of thought In the second part he develops and defends the concepts of communicative reason

Postmetaphysical Thinking II Jürgen Habermas, 2017-06-16 There is no alternative to postmetaphysical thinking this statement made by Jürgen Habermas in 1988 has lost none of its relevance Postmetaphysical thinking is in the first place the historical answer to the crisis of metaphysics following Hegel when the central metaphysical figures of thought began to totter under the pressure exerted by social developments and by developments within science As a result philosophy's epistemological privilege was shaken to its core its basic concepts were de-transcendentalized and the primacy of theory over practice was opened to question For good reasons philosophy lost its extraordinary status but as a result it also courted new problems In Postmetaphysical Thinking II the sequel to the 1988 volume that bears the same title English translation Polity 1992 Habermas addresses some of these problems The first section of the book deals with the shift in perspective from metaphysical worldviews to the lifeworld the unarticulated meanings and assumptions that accompany everyday thought and action in the mode of background knowledge Habermas analyses the lifeworld as a space of reasons even where language is not yet involved such as for example in gestural communication and rituals In the second section the uneasy relationship between religion and postmetaphysical thinking takes centre stage Habermas picks up where he left off in 1988 when he made the far sighted observation that philosophy even in its postmetaphysical form will be able neither to replace nor to repress religion and explores philosophy's new found interest in religion among other topics The final section includes essays on the role of religion in the political context of a post secular liberal society This volume will be of great interest to students and scholars in philosophy religion and the social sciences and humanities generally

Postmetaphysical Thinking Jürgen Habermas, 1992 This collection of Habermas's recent essays on philosophical topics continues the analysis begun in The Philosophical Discourse of Modernity In a short introductory essay he outlines the sources of twentieth century philosophizing its major themes and the range of current debates The remainder of the essays can be seen as his contribution to these debates Habermas's essay on George Herbert Mead is a focal point of the book In it he sketches a postmetaphysical intersubjective approach to questions of individuation and subjectivity In other essays he develops his distinctive communications theoretic approach to questions of meaning and validity The book as a whole expands on his earlier efforts to define a middle ground between nostalgic revivals of metaphysical conceptions of reason and radical deconstructions of reason Jürgen Habermas is Professor of Philosophy at the University of Frankfurt The Essays The Horizon of Modernity is Shifting Metaphysics after Kant Themes in Postmetaphysical Thinking Toward a Critique of the Theory of Meaning Peirce and Communication The Unity of Reason in the Diversity of Its Voices Individuation through Socialization On George Herbert

and Peirce Through his analysis of their work Habermas demonstrates the interpretive fecundity of the central themes of his philosophical enterprise his pragmatist theory of meaning his communicative theories of subjectivity and sociality and his discursive theory of normativity in its moral juridical and political manifestations In contrast to the bland compendia of thinkers and positions generally presented in surveys of the history of philosophy Habermas s thematically focused interpretations are destined to provoke controversy and stimulate dialogue With this work one of the indisputably great thinkers of our time presents a powerful vindication of his conception of philosophy as an inherently discursive and not merely analytical or speculative enterprise

Gamwell,2015-10-06 Franklin I Gamwell holds that democracy with religious freedom is dependent on metaphysical theism Democratic politics can be neutral to all religious convictions only if its constitution establishes a full and free discourse about the ultimate terms of justice and their application to decisions of the state and the divine good is the true ground of justice Notably Gamwell s view challenges virtually all current accounts of democracy with religious freedom This uncommon position emerges through a series of essays in which Gamwell engages a variety of conversation partners including Thomas Jefferson David Strauss Abraham Lincoln J rgen Habermas Alfred North Whitehead Reinhold Niebuhr and Iris Murdoch Discussions of Jefferson Lincoln and the US Constitution illustrate the promise of neoclassical metaphysics as a context for interpreting US history Gamwell then defends his metaphysics against both modern refusals of metaphysics and accounts of ultimate reality offered by Niebuhr and Murdoch **Heidegger and French Philosophy** Tom Rockmore,2002-09-11 Martin Heidegger s impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger s thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken *Pentecostal Public Theology* Simo Frestadius,Mark J.
