American Art, 1966-1986

Robert Pincus-Witten

A large, abstract teal graphic composed of several overlapping, angular shapes. One shape on the left is a large, dark teal triangle pointing towards the center. Another shape on the right is a lighter teal, more complex polygon. The overall effect is a bold, minimalist graphic element that contrasts sharply with the black background.

Crow, 2004 Thomas Crow's analysis of the art of the 1960s remains as fresh as ever as he expertly follows the broad range of artists working in Europe and America in the stormy years of the Civil Rights movement the Vietnam War and the counterculture At a time when visual artists sought a variety of responses to the turmoil of the public sphere and struggled to have an impact on a world preoccupied with social crisis Crow explores the relationship of politics to art and shows how the rhetoric of one often informed or subverted the other He also traces the emergence of a new aesthetic climate that challenged established notions of content style medium and audience

Art Information and the Internet Lois Swan Jones, 2013-12-16 In the first book of its kind art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats print sources CD ROMS documentary videos and microfiche sets to produce excellent research results The book is divided into three sections Basic Information Formats Types of Websites and How to Find Them and How to Use Web Information Jones discusses the strengths and limitations of Websites scholarly and basic information resources are noted and search strategies for finding pertinent Websites are included Art Information and the Internet also discusses research methodology for studying art historical styles artists working in various media individual works of art and non Western cultures as well as art education writing about art problems of copyright and issues concerning the buying and selling of art This title will be periodically updated History of Art Horst Woldemar Janson, Anthony F. Janson, 2004 For forty years this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world boasting the matchless credibility of the Janson name This newest update features a more contemporary more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book's incredible art program offer profound insight

through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout. Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history. Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians. With a truly humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years.

Double Desire Ian McLean, 2014-11-19 Double Desire challenges the tendency by critics to perpetuate an aesthetic apartheid between Indigenous and Western art. The double desire explored in this book is that of the divided but also amplified attractions that occur between cultural traditions in places where both indigenous and colonial legacies are strong. The result it is argued produces imaginative transcultural practices that resist the assimilation or acculturation of Indigenous perspectives into the dominant Western mode.

Talking Painting David Ryan, 2002 Each chapter consists of an article about the artist's work selected by the artist and an interview of the artist by David Ryan.

Multiple themes including the impact of digital technologies on processes of architectural design production materiality and representation the implications of globalization and networks of information the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition if not crisis that centers around the perceived
