Postmobilization Training Resource Requirements Army National Guard Heavy Enhanced Brigades:

Postmobilization Training Resource Requirements Thomas F. Lippiatt,1996 This report analyzes the training resources needed for future postmobilization training of combat brigades in the Army National Guard It lays out a detailed 102 day postmobilization model for an enhanced readiness heavy brigade seeking to minimize train up time by executing many activities in parallel It then analyzes the key resources required active trainers gunnery and maneuver sites and Opposing Force personnel to prepare the brigades for deployment under various options involving multiple training sites It concludes that under current plans the Army will have sufficient training personnel and other resources to run three training sites simultaneously assuming that the National Guard can provide an Opposing Force training support personnel and garrison support for collective training sites The sites would also need some equipment enhancements such as additional MILES laser training systems and visual modification of tracked vehicles This would produce as many as three trained brigades as early as 108 days after mobilization To run more sites and hence produce more brigades during the early phases of a deployment the Army would need more active training personnel to oversee training and to provide OPFOR cadres at the extra sites

Postmobilization Training Resource Requirements. Army National Guard Heavy Enhanced Brigades ,1996 The Army National Guard ARNG combat brigades that were called up for Operation Desert Storm took longer to get ready than many people had anticipated As a result some steps were taken to improve the peacetime training of enhanced National Guard brigades with an eye to improving their ability to respond to short notice contingencies However postmobilization training remains an issue particularly in light of the substantial force reductions made since Desert Storm Active duty combat units played a large role in helping the reserve component brigades prepare for deployment to the Persian Gulf and it is likely that few if any will be available to provide such support in the future The Arroyo Center was asked to determine whether there are adequate resources sites training and support personnel and opposing forces to prepare the seven enhanced heavy National Guard brigades for deployment To make that determination we developed a detailed training model that allows us to quantify the resources required to train a single heavy brigade and its support elements We also examined different alternatives for implementing the model that is different numbers of sites Army National Guard United States. The United States Army George D. Bennett,2002 United States Army Issues Background Bibliography **Expanding Global Military Capacity for Humanitarian Intervention** Michael E. O'Hanlon,2004-05-13 Humanitarian military intervention and muscular peace operations have been partially effective in recent years in saving thousands of lives from the Balkans to Haiti to Somalia to Cambodia to Mozambique However success has often been mitigated by the

international community's unwillingness or inability to quickly send enough forces capable of dealing with a situation decisively. In other cases the international community has essentially stood aside as massive but possibly preventable humanitarian tragedies took place for instance in Angola and Rwanda in the mid 1990s and in Congo as this book goes to press. Sometimes these failures have simply been the result of an insufficient pool of available military and police forces to conduct the needed intervention or stabilization missions. In this timely new book Michael O Hanlon presents a blueprint for developing sufficient global intervention capacity to save many more lives with force. He contends at least for now that individual countries rather than the United Nations should develop the aggregate capacity to address several crises of varying scale and severity and that many more countries should share in the effort. The United States role is twofold: it must make slight redesigns to its own military and even more important encourage other nations to join it in this type of intervention including training and support of troops in countries such as those in Africa that are willing to take the necessary steps to prevent humanitarian disaster but lack the resources.

The Real and the Ideal Anthony Lake, David A. Ochmanek, 2001 A series of 13 essays engage different aspects of Richard Ullmann's work on U.S. foreign and security policy over the years he was teaching at Princeton and Oxford as well as the time he served in the U.S. government. Presented by Lake diplomacy Georgetown U and Ochmanek the RAND corporation the essays sometimes directly address the work of Ullmann but more often look at contemporary issues of foreign policy from the lens of the intellectual school that he established. After a appreciation of Ullmann's life and work essays treat such topics as transatlantic relations after the Cold War isolationism in U.S. foreign policy humanitarian interventions and polarization in policy processes. c Book News Inc
