Articulations of Self and Politics in Activist Discourse Jan Zienkowski, 2016-10-27 This book focuses on the discursive processes that allow activists to make sense of themselves and of the modes of politics they engage in. It shows how political and metadiscursive awareness develop in tandem with a reconfiguration of one's sense of self. The author offers an integrated pragmatic and poststructuralist perspective on self and subjectivity. He draws on Essex style discourse theory, early pragmatist philosophy and linguistic pragmatics arguing for a notion of discourse as a multi-dimensional practice of articulation. Demonstrating the analytical power of this perspective he puts his approach to work in an analysis of activist discourse on integration and minority issues in Flanders, Belgium. Subjects articulate a whole range of norms, values, identities and narratives to each other when they engage in political discourse. This book offers a way to analyse the logics that structure political awareness and the associated boundaries for discursive self-interpretation.

Discourse, Power, and Resistance Down Under Mark Vicars, Tarquam McKenna, 2014-02-07 DPR Down Under Volume 2 draws together a spirited collection of papers presented at the Australian Discourse Power and Resistance conference held in Darwin 2012. The volume of work addresses and seeks to contextualise the problematic question: What counts as good research and who decides? Each chapter in this volume, written from differing theoretical and methodological positions, articulates a notion of what could be considered as being good research and is in some way involved in speaking a truth back to power. The chapters invite the reader to rethink and reconsider the inherently political, critical and subversive nature of research from a range of critical investigations.

Reviewing Qualitative Research in the Social Sciences Audrey Trainor, Elizabeth Graue, 2013 Foundational characteristics of qualitative research include flexibility, variation in application, critique and innovation, all of which derive from its subjective roots in interpretivism and constructivism. While the scholars who design qualitative research projects envision these qualities as strengths, such a breadth of practices and the assumptions that undergird them may present challenges during the peer review process. As a result, those who review and consume qualitative research often have important and difficult to answer questions about the project's design, strategies, tools and analysis, with few guidelines for gauging the merit of the work. The mission of this book is to provide a useful guide for researchers, reviewers and consumers who are charged with judging the quality of qualitative studies. In order to embrace the challenges and controversies that accompany this goal, the editors have solicited experts representing multiple disciplines and methods of qualitative inquiry. Their contributions represent the rich diversity in the field while simultaneously producing a pragmatic and useful guide. While it is neither possible nor desirable to compartmentalize qualitative approaches and issues into neatly organized categories, the construct of method has been chosen as a common organizing device. The introductory chapter explains the need for such a book and underscores the foundational strengths of qualitative research: flexibility, variation, critique and

innovation The remaining chapters review the principal approaches to qualitative research with care taken not to standardize rigidly define or oversimplify any approach For ease of use all methodological chapters are organized around the following elements of inquiry which reviewers tend to examine definition sampling data collection data analysis representation and congruency
