Critical Music Historiography: Probing Canons, Ideologies and Institutions Vesa Kurkela, Markus Mantere, 2016-03-09 During the past two decades there has emerged a growing need to reconsider the objects axioms and perspectives of writing music history A certain suspicion towards Francois Lyotard's grand narratives as a sign of what he diagnosed as our postmodern condition has become more or less an established and unquestioned point of departure among historians This suspicion at its most extreme has led to a radical conclusion of the end of history in the work of postmodern scholars such as Jean Baudrillard and Francis Fukuyama The contributors to Critical Music Historiography take a step back and argue that the radical view of the impossibility of history as well as the unavoidable ideology of any history are counter productive points of departure for historical scholarship It is argued that metanarratives in history are still possible and welcome even if their limitations are acknowledged Foucault Lyotard and others should be taken into account but systematized viewpoints and methods for a more critical and multi faceted re evaluation of the past through research are needed As to the metanarratives of music history they must avoid the pitfalls of evolutionism hagiography and teleology all hallmarks of traditional historiography In this volume the contributors put these methods and principles into practice The chapters tackle under researched and non conventional domains of music history as well as rethinking older historiographical concepts such as orientalism and nationalism and consequently introduce new concepts such as occidentalism and transnationalism The volume is a challenging collection of work that stakes out a unique territory for itself among the growing body of work on critical music history

Europe as she uncovers music's relationships to trauma and grief. The 1970s and 1980s witnessed a cultural preoccupation in this region with the meanings of historical suffering particularly surrounding the Second World War and the Stalinist era. Journalists, historians, writers, artists, and filmmakers frequently negotiated themes related to pain and memory, truth and history, morality and spirituality during glasnost and the years leading up to it. *Performing Pain* considers how works by composers Alfred Schnittke, Galina Ustvolskaya, Arvo Pärt, and Henryk Gorecki musically address contemporary concerns regarding history and suffering through composition, performance, and reception. Taking theoretical cues from psychology, sociology, and literary and cultural studies, Cizmic offers a set of hermeneutic essays that demonstrate the ways in which people employ music in order to make sense of historical traumas and losses. Seemingly postmodern compositional choices such as quotation, fragmentation, and stasis create musical analogies to psychological and emotional responses to trauma and grief, and the physical realities of their embodied performance focus attention on the ethics of pain and representation. Furthermore, as film music, these works participate in contemporary debates regarding memory and trauma. A comprehensive and innovative study, *Performing Pain* will fascinate scholars interested in the music of Eastern Europe and in aesthetic articulations of suffering.

The Routledge Research Companion to Modernism in Music Björn Heile, Charles Wilson, 2018-10-29. Modernism in music still arouses passions and is riven by controversies. Taking root in the early decades of the twentieth century, it achieved ideological dominance for almost three decades following the Second World War before becoming the object of widespread critique in the last two decades of the century, both from critics and composers of a postmodern persuasion and from prominent scholars associated with the new musicology. Yet these critiques have failed to dampen its ongoing resilience. The picture of modernism has considerably broadened and diversified and has remained a pivotal focus of debate well into the twenty-first century. This Research Companion does not seek to limit what musical modernism might be. At the same time, it resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period. In addition to addressing issues already well established in modernist studies such as aesthetics, history, institutions, place, diaspora, cosmopolitanism, production and performance, communication technologies, and the interface with postmodernism, this volume also explores topics that are less established among them: modernism and affect, modernism and comedy, modernism versus the contemporary, and the crucial distinction between modernism in popular culture and a popular modernism, a modernism of the people. In doing so, this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence.

Reification and the Aesthetics of Music Jonathan Lewis, 2015-11-19. This innovative study re-evaluates the philosophical significance of aesthetics in the context of contemporary debates on the nature of philosophy. Lewis's main argument is that contemporary conceptions of meaning and truth have been reified and that aesthetics is able to articulate why this is the case with important consequences for understanding the horizons and nature of philosophical inquiry. *Reification and the Aesthetics of*
