Postmodernism Unraveling Racism And Democratic Institutions:

Postmodernism, Unraveling Racism, and Democratic Institutions John W. Murphy, Jung Min Choi, 1997-05-28

Professors Murphy and Choi use postmodern philosophy to expose an important source of racism and cultural domination. They examine foundationalism which they see at the core of the Western intellectual tradition and which is shown to foster a metaphysics of domination. By contrast, postmodernism undermines this root of racism. They demonstrate that foundationalism is not needed to support identity institutions or political order. Indeed, they assert that true pluralism is possible once foundationalist approaches to knowledge and order are set aside. Special attention is directed to two current modes of discrimination: institutional racism and symbolic violence. Murphy and Choi provide an intriguing look at ways to undercut the justification for racism and other threats to cultural difference. This volume will be of particular interest to scholars and other researchers in the areas of race relations, cultural studies, and political theory.

An Ethics of Dissensus Ewa Płonowska Ziarek, 2001. Addressing a constellation of diverse thinkers including Emmanuel Levinas, Patricia Williams, Jean-François Lyotard, Michel Foucault, Frantz Fanon, Julia Kristeva, and Luce Irigaray, the author proposes a new conception of ethics: an ethics of dissensus that rethinks the relation between freedom and obligation in a double context of embodiment and antagonism. The author employs discourses that have hitherto been segregated: postmodern ethics, feminism, race theory, and the idea of radical democracy.

A Global Introduction to Baptist Churches Robert E. Johnson, 2010-09-13. Coinciding with the four hundredth anniversary of the birth of the Baptist movement, this book explores and assesses the cultural sources of Baptist beliefs and practices. Although the movement has been embraced, enriched, and revised by numerous cultural heritages, the Baptist movement has focused on a small group of Anglo exiles in Amsterdam in constructing its history and identity. Robert E. Johnson seeks to recapture the varied cultural and theological sources of Baptist tradition and to give voice to the diverse global elements of the movement that have previously been excluded or marginalized. With an international communion of over 110 million persons in more than 225,000 congregations, Baptists constitute the world's largest aggregate of evangelical Protestants. This work offers insight into the diversity, breadth, and complexity of the cultural influences that continue to shape Baptist identity today.

Nietzsche and Critical Social Theory, 2019-12-09. Nietzsche and Critical Social Theory: Affirmation, Animosity, and Ambiguity brings together scholars from a variety of disciplinary backgrounds to assess the salience of Nietzsche for critical social theory today. In the context of global economic crises and the rise of authoritarian regimes across the U.S. and Europe, the question asked by these scholars is why Nietzsche now. Containing several innovative interventions in the areas of queer theory, political economy, critical race theory, labour history, hip-hop aesthetics, sociology, the Frankfurt School, social movements studies, science and technology studies, pedagogy, and ludic studies, this volume pushes Nietzsche studies in new directions, seeking to broaden the appeal of Nietzsche beyond philosophy and political theory.

The Symbolism of Globalization, Development, and Aging Steven

L. Arxer, John W. Murphy, 2012-09-14 This book looks at the symbolic side of globalization development and aging. Many of the dimensions that are discussed represent updates of past debates but some are entirely new. In particular, globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined. The process of aging and persons' sense of identity is no exception. The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized. The application of marketplace imagery for example may impact attempts for holism in how aging is studied and the prospects for human agency during the aging process. This book offers a special look into how temporality, technology, normativity and empiricism structure the symbolic side of globalization and influence dominant images of the aging process. Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience.

Black Studies and the Democratization of American Higher Education Charles P. Henry, 2016-12-11 This book aims to expand what scholars know and who is included in this discussion about black studies which aids in the democratization of American higher education and the deconstruction of traditional disciplines of high education to facilitate a sense of social justice. By challenging traditional disciplines, black studies reveals not only the political role of American universities but also the political aspects of the disciplines that constitute their core. While black studies is post modern in its deconstruction of positivism and universalism, it does not support a radical rejection of all attempts to determine truth. Evolving from a form of black cultural nationalism, it challenges the perceived white cultural nationalist norm and has become a critical multiculturalism that is more global and less gendered. Henry argues for the inclusion of black studies beyond the curriculum of colleges and universities.

The World of Quantum Culture Manuel J. Caro, 2002-07-30 Caro and Murphy introduce the philosophy of Quantum Aesthetics, a theoretical framework developed by Spanish language theorists that has spread throughout the world in the last three years to an English speaking audience. In order to achieve this, writers from around the world were asked to either apply quantum aesthetics philosophy to their respective areas of study or write about their current work within this theoretical framework. Chapters are devoted to the history of quantum aesthetics, quantum art, quantum literature, quantum politics, quantum anthropology and so forth. In the end, the general elements of a quantum culture are outlined and the differences that this culture shows with respect to old conceptualizations of this domain are explained. With respect to the field of cultural studies, this new approach to cultural analysis changes how societies can be investigated as well as provides cultural studies with a more comprehensive and integrated framework. Specifically noteworthy is that quantum aesthetics is less reductionistic than research strategies of the past. A provocative collection for scholars, students and other researchers involved with the sociology of culture, cultural studies, social philosophy and sociological theory.

suffering humiliation and social and economic abuse Using the concept symbolic violence Fordham theorizes the psychological and social damage suffered especially by black girls in schools The five narratives in *Downed by Friendly Fire* ultimately highlight the pain and suffering this violence produces as well as the ways in which it promotes inequality exclusion and marginalization among girls
