Postoperative Care Of The Critically Ill Patient:

Postoperative Care of the Critically Ill Patient Thomas James Gallagher, 1995 Care of the Critically Ill Patient Jack Tinker, Warren M. Zapol, 2012-12-06 Nine years have passed since the first edition of *Care of the Critically Ill Patient* was published. As its editors Maurice Rapin and I were fortified by the many positive and helpful comments of reviewers and readers, the work appeared to have fulfilled our original aims and objectives. Intensive care medicine has, of course, advanced and changed in many ways since 1982, and it therefore seemed appropriate to consider the preparation of a second edition. Encouraged by the reception of the first and the timely prompting of the publishers, we began in 1986 to prepare for a new edition. Caring for critically ill patients is of universal concern, and we were therefore delighted when Warren Zapol joined us as a co-editor, widening our international base. The three of us subsequently spent many happy and productive times together planning the content, priorities, scale, and contributions for the new edition. A great tragedy then overcame us: Maurice Rapin died suddenly. His death deprived us of a true friend and colleague who had been an international pioneer during the development of intensive care medicine. I will always remember with affection and professional pride the many hours he and I worked together in preparing the first edition of this book and also as founding editors of the now firmly established journal *Intensive Care Medicine*. An obituary written by Warren Zapol that appeared in the journal follows the Preface. *Cardiac Anesthesia and Postoperative Care in the 21st Century* Marc Vives, Alberto Hernandez, 2022-02-14 This book provides a practical approach to cardiac perioperative care. The step-by-step format guides readers from basic concepts such as cardiac physiology and pharmacology to anesthetic management of specific cardiac surgical procedures, including cardiac percutaneous interventions, management of specific cardiac disease, circulatory support, and organ protection strategies. Written by experienced cardiac anesthesiologists in Europe, USA, Canada, and Australia, this book provides an international perspective on the topic, with each chapter referring the reader to the relevant key reading. *Cardiac Anesthesia and Postoperative Care in the 21st Century* is aimed at new consultants in cardiac anesthesia and intensive care, residents, and fellows. It may also be of interest to perfusionists and is a refreshing update for the experienced cardiac anesthesiologist.
