Davidson,Ondine Park,Rob Shields,2013-06-01 Ecologies of Affect offers a synthetic introduction to the felt dynamics of cities and the character of places The contributors capture the significance of affects including desire nostalgia memory and hope in forming the identity and tone of places The critical intervention this collection

of essays makes is an active consistent engagement with the virtualities that produce and refract our idealized attachments to place Contributors show how place images and attempts to build communities are rather than abstractions fundamentally tied to and revolve around such intangibles We understand nostalgia desire and hope as virtual that is even though they are not material they are nevertheless real and must be accounted for In this book the authors take up affect emotion and emplacement and consider them in relation to one another and how they work to produce and are produced by certain temporal and spatial dimensions The aim of the book is to inspire readers to consider space and place beyond their material properties and attend to the imaginary places and ideals that underpin and produce material places and social spaces This collection will be useful to practitioners and students seeking to understand the power of affect and the importance of virtualities within contemporary societies where intangible goods have taken on an increasing value

Brodsky & Utkin Lois Nesbitt, Alexander Brodsky, Ilya Utkin, 2003-07 Alexander Brodsky and Ilya Utkin are the best known of a loosely organized group of Soviet artists known as Paper Architects who designed much but built little in the early days of Glasnost in the late 1980s Many of their elaborate etchings in which they depicted outlandish often impossible structures and cityscapes of allegorical content were collected in our 1990 book *Brodsky Utkin* Now with the addition of forty three new and never before published prints we are pleased to announce this updated edition In their designs by turns funny cerebral and deeply human Brodsky Utkin borrow from Egyptian tombs Ledoux's visionary architecture Le Corbusier's urban master plans and other historical precedents collaging these heterogeneous forms in learned and layered scrambles Underlying the wit and visual inventiveness is an unmistakable moral that the dehumanizing architecture of the sort seen in Russian cities in the 1980s and 1990s and elsewhere around the globe takes a sinister toll A new preface assesses the works of Brodsky Utkin and reminds us that the greatest art is often born of adversity Beautifully printed in 300 screen dry trap duotones by the Steinhauer Press *Brodsky Utkin* is a book for artists architects and collectors alike
