Zappia, 2013-12-11 This volume contains 56 contributions presented at the 1st International Symposium on Post Translational Modifications of Proteins and Ageing held on the Island of Ischia Naples Italy from May 11 to 15 1987 under the auspices of the University of Naples and the Italian Society of Biochemistry The primary aim of this interdisciplinary meeting was to promote a productive exchange among scientists from different cultural areas and to give them the opportunity to discuss problems of common interest approached from different scientific standpoints Although a large number of studies has led to a definition of the chemical mechanisms and of the main enzymological aspects of the several post translational modifications of proteins we are still far away from a complete elucidation of the functional significance of such processes As a matter of fact it seems reasonable that the presently available experimental approaches and models employed to investigate the biological roles are still inadequate The search for suitable model systems was a matter of discussion during the meeting and will be a major challenge in the future The most frequently employed

approaches to this problem thus far have been in vitro but several proteins reported to be excellent in vitro substrates failed to show any activity when assayed in in vivo models      The Role of Protein Post-Translational Modifications in Protein-RNA Interactions and RNP Assemblies Roberto Giambruno,Dorothee Dormann,Nicolas Lux Fawzi,Ewa Anna Grzybowska,2022-02-11 Dr Nicolas Lux Fawzi is a member of the Scientific Advisory Board of Dewpoint Therapeutics LLC All other Topic Editors declare no competing interests with regards to the Research Topic      *Proteins* Thomas E.
