Potash Mining in Germany and France George Samuel Rice, John Allen Davis, 1927 **Potash Mining in Germany and France, by George S. Rice and John A. Davis...** George Samuel Rice, John Allen Davis, 1927 *Potash Mining in Germany and France* George S. Rice, John Allen Davis, 1927 *Electrochemical and Metallurgical Industry* Eugene Franz Roeber, Howard Coon Parmelee, 1926 *Industrial Germany* Hermann Levy, 2013-09-12 Originally published in 1935 this book presents the origins and structure of the industrial quasi monopoly in Germany in contrast to similar organizations in contemporary England Levy discusses industrial cartels in a variety of fields from film to steel and the shift in public opinion on the acceptability of monopolies This book will be of value to anyone with an interest in German economic or industrial history **Drilling and Blasting in Open-cut Copper Mines** Eugene Delos Gardner, George Samuel Rice, Harold Carl Miller, John Allen Davis, 1927 **Capitalism in Chaos** Máté Rigó, 2022-08-15 Capitalism in Chaos explores an often overlooked consequence and paradox of the First World War the prosperity of business elites and bankers in service of the war effort during the destruction of capital and wealth by belligerent armies This study of business life amid war and massive geopolitical changes follows industrialists and policymakers in Central Europe as the region became crucially important for German and subsequently French plans of economic and geopolitical expansion in the late nineteenth and early twentieth centuries Based on extensive research in sixteen archives five languages and four states M t Rig demonstrates that wartime destruction and the birth of war millionaires were two sides of the same coin Despite the recent centenaries of the Great War and the Versailles peace treaties knowledge of the overall impact of war and border changes on business life remains sporadic based on scant statistics and misleading national foci Consequently most histories remain wedded to the viewpoint of national governments and commercial connections across national borders Capitalism in Chaos changes the static historical perspective by presenting Europe s East as the economic engine of the continent Rig accomplishes this paradigm shift by focusing on both supranational regions including East Central and Western Europe as well as the eastern and western peripheries of Central Europe Alsace Lorraine and Transylvania from the 1870s until the 1920s As a result Capitalism in Chaos offers a concrete lively history of economics during major world crises with a contemporary consciousness toward inequality and disparity during a time of collapse **Minerals Yearbook** United States. Conditions in France Great Britain. Commercial Relations and Exports Department, Great Britain. Department of Overseas Trade, 1925

The History of Foreign Investment in the United States to 1914 Mira Wilkins, 1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world's largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world's largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main attraction The construction of the American railroad system called on vast portfolio investments from abroad there was also sizable direct investment in mining cattle ranching the oil industry the chemical industry flour production and breweries as well as the production of rayon thread and even submarines In addition there were foreign stakes in making automobile and electrical and nonelectrical machinery America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts
