E. McGriff,2020-08-03 A new pottery tradition has been developing along the border of northern Indiana and southern Michigan Despite the fact that this region is not yet an established destination for pottery collectors Michiana potters are committed to pursuing their craft thanks to the presence of a community of like minded artists The Michiana Potters an ethnographic exploration of the lives and art of these potters examines the communal traditions and aesthetics that have developed in this region Author Meredith A E McGriff identifies several shared methods and styles such as a preference for wood fired wares glossy glaze surfaces cooler colors the dripping or layering of glazes on ceramics that are not wood fired the handcrafting of useful wares as opposed to sculptural work and a tendency to borrow forms and decorative effects from other regional artists In addition to demonstrating a methodology that can be applied to studies of other emergent regional traditions McGriff concludes that these styles and methods form a communal bond that inextricably links the processes of creating and sharing pottery in Michiana Women Potters Moira Vincentelli,2004 This works proposes that a women s tradition in ceramics is one in which pottery making is a gendered activity intimately connected with female identity The knowledge is passed down from one generation to the next It guides the reader through these traditions continent by continent Different areas are illustrated with beautiful detailed maps and fascinating colour photographs from around the world **Potter's Wheel Projects** ,1968

Pottery in the Archaeological Record Mark L. Lawall, John Lund, 2011-04-20 Archaeologists are increasingly focusing on the transformation of artifacts from their use in the past to their appearance in the archaeological record trying to identify the natural and cultural processes that created the archaeological record we study today In Classical Archaeology attention to these processes received an impetus by J Theodore Pena's 2007 monograph *Roman Pottery in the Archaeological Record* which considered how ceramic vessels were made used and stayed in use serving various secondary purposes before finally being discarded Pena relied mainly on evidence from Roman Italy which raises the question of the impact of similar cultural forces on pottery from other periods and places His work accentuates the need to continue the process of building and developing explicit interpretive models of ceramic life histories in Mediterranean archaeology With a view to beginning to address these challenges the editors invited a group of specialists in the pottery of Greece and the rest of the Eastern Mediterranean to a colloquium in Athens in June 2008 asking the contributors to reconsider Pena's general models approaches and examples from their own particular geographic and cultural perspectives This publication constitutes the proceedings of this colloquium
