Pottery Making Techniques Anderson Turner,2004 Articles on pottery techniques chosen from the early issues of Pottery making illustrated Simon Leach's Pottery Handbook Simon Leach,Bruce Dehnert,2013-05-07 Ceramics education is something that is typically taught in a classroom studio where a teacher first explains a series of intricate and subtle movements and then demonstrates them for the students The student then sits down at a potter's wheel and attempts to replicate the techniques but often with less than perfect results To help both beginner and more advanced potters overcome some of the most common frustrations Simon Leach has picked up where most classes fall short creating more than 800 homemade videos available on YouTube that clearly demonstrate core techniques Lively informative and full of original tips

and techniques Simon's videos have lit the ceramics world on fire becoming a must see supplement to most potters' educations. But therein lies the hitch: most potters don't want to take a laptop into a ceramics studio so they must watch the video before or after class and hope to remember the tip as they work. For each technique, detailed step-by-step photography captures the subtle intricate movements that typically fly by too fast to be noticed in a video. Plus, the book includes a DVD with many of Simon's YouTube videos, callouts throughout the book tell readers which video goes with each section so they can both read and examine the technique in the book and also watch the technique in real time.
