The Challenge of Emulation in Art and Architecture David Mayernik, 2016-04-01

Emulation is a challenging middle ground between imitation and invention The idea of rivaling by means of imitation as old as the Aeneid and as modern as Michelangelo fit neither the pessimistic deference of the neoclassicists nor the revolutionary spirit of the Romantics Emulation thus disappeared along with the Renaissance humanist tradition but it is slowly being recovered in the scholarship of Roman art It remains to recover emulation for the Renaissance itself and to revivify it for modern practice Mayernik argues that it was the absence of a coherent understanding of emulation that fostered the fissuring of artistic production in the later eighteenth century into those devoted to copying the past and those interested in continual novelty a situation solidified over the course of the nineteenth century and mostly taken for granted today This book is a unique contribution to our understanding of the historical phenomenon of emulation and perhaps more importantly a timely argument for its value to contemporary practice

Poussin: Works on Paper, Drawings from the Collection of Her Majesty Queen Elizabeth II, *The Creation of Art* Berys Gaut, Paisley Livingston, 2003-03-17

Although creativity from Plato onwards has been recognized as a topic in philosophy it has been overshadowed by investigations of the meanings and values of works of art In this collection of essays a distinguished roster of philosophers of art redress this trend The subjects discussed include the nature of creativity and the process of artistic creation the role that creative making should play in our understanding and evaluation of art relations between concepts of creation and creativity and ideas of tradition metaphor genius imagination and genre This is an important collection that will be eagerly sought by philosophers of art as well as theorists in art history cinema studies and literary criticism

The Fabrication of Leonardo da Vinci's Trattato della pittura (2 vols.) Claire Farago, Janis Bell, Carlo Vecce, 2018-01-29 The basis for our understanding of Leonardo's theory of art was for over 150 years his Treatise on Painting which was issued in 1651 in Italian and French This present volume offers both the first scholarly edition of the Italian editio princeps as well as the first complete English translation of this seminal work In addition It provides a comprehensive study of the Italian first edition documenting how each editorial campaign that led to it produced a different understanding of the artist's theory What emerges is a rich cultural and textual history that foregrounds the transmission of artisanal knowledge from Leonardo's

workshop in the Duchy of Milan to Carlo Borromeo's Milan Cosimo I de' Medici's Florence Urban VIII's Rome and Louis XIV's Paris

Early Modern Art Theory. Visual Culture and Ideology, 1400-1700 James Hutson, 2016-03 The development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts In order to elucidate the relationship between theory and practice we must consider the wider connections between art theory poetic theory natural philosophy and related epistemological matrices Investigating the interdisciplinary reality of framing art making and interpretation this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches focusing on stylistic transformation in particular artist's oeuvres Michelangelo Annibale Carracci Guercino Guido Reni Poussin and others and the contemporary environments that facilitated them Through the dual understanding of the art theoretical concept of the Idea an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity beauty and the goal of art as an exercise in encapsulating the divine truth of nature

Editing the Image Mark Cheetham, Elizabeth Legge, Catherine M. Soussloff, 2008-11-29 The editing process is a vital part of virtually every form of media Primarily associated with texts and written language editing is equally essential if less examined in regard to visual media Editing the Image looks at the editing of visual media as both a series of technical exercises and as an allegory It touches on concerns that are crucial to the history of art and visual culture as well as those media and institutions that produce and disseminate the visual arts in our society Featuring contributors from a wide range of disciplines Editing the Image considers editing in the context of academic journals art historical texts illustrated books museum displays and exhibitions It is an inclusive analysis of visual forms commonly associated with the process of editing photography film and video as well as some that are not intrinsically linked to editing painting sculpture and architecture In addition to wide ranging academic considerations this collection includes discussions of moving picture media and studio art by practitioners giving the study a practical focus For anyone who has considered the implications of the editorial process this work will be of significant interest

Re-Reading Leonardo Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting first published in Paris in 1651 and soon translated into all the major European languages Here for the first time is a study that examines the historical reception of this vastly influential text This collection charts the varied interpretations of Leonardo's ideas in French Italian Spanish English German Dutch Flemish Greek and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists one of the key sources drawn upon by art theorists and widely read by a diverse network of artists architects biographers natural philosophers translators astronomers publishers engineers theologians aristocrats

lawyers politicians entrepreneurs and collectors The cross cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years The volume includes original essays by scholars studying a wide variety of national and institutional settings The coherence of the volume is established by the shared subject matter and interpretative aim to understand how Leonardo's ideas were used With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius the collection takes Leonardo studies to a new level of historical inquiry Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature One of the most important questions to emerge from this study is what enabled the same text to produce so many different styles of painting
