**Poverty and Progress** Stephan THERNSTROM, 2009-06-30 Embedded in the consciousness of Americans throughout much of the country's history has been the American Dream that every citizen no matter how humble his beginnings is free to climb to the top of the social and economic ladder Poverty and Progress assesses the claims of the American Dream against the actual structure of economic and social opportunities in a typical nineteenth century industrial community Newburyport Massachusetts Here is local history With the aid of newspapers census reports and local tax school and savings bank records Stephan Thernstrom constructs a detailed and vivid portrait of working class life in Newburyport from 1850 to 1880 the critical years in which this old New England town was transformed into a booming industrial city To determine how many self made men there really were in the community he traces the career patterns of hundreds of obscure laborers and their sons over this thirty year period exploring in depth the differing mobility patterns of native born and Irish immigrant workmen Out of this analysis emerges the conclusion that opportunities for occupational mobility were distinctly limited Common laborers and their sons were rarely able to attain middle class status although many rose from unskilled to semiskilled or skilled occupations But another kind of mobility was widespread Men who remained in lowly laboring jobs were often strikingly successful in accumulating savings and purchasing homes and a plot of land As a result the working class was more easily integrated into the community a new basis for social stability was produced which offset the disruptive influences that accompanied the first shock of urbanization and industrialization Since Newburyport underwent changes common to other American cities Thernstrom argues his findings help to illuminate the social history of nineteenth century America and provide a new point of departure for gauging mobility trends in our society today Correlating the Newburyport evidence with comparable studies of twentieth century cities he refutes the popular belief that it is now more difficult to rise from the bottom of the social ladder than it was in the idyllic past The blocked mobility theory was proposed by Lloyd Warner in his famous Yankee City studies of Newburyport Thernstrom provides a thorough critique of the Yankee City volumes and of the ahistorical style of social research which they embody Nineteenth-Century Cities Richard Sennett, Stephan Thernstrom, 1969-01-01 Research on the frontiers of urban studies was the subject of a conference on nineteenth century cities held in November 1968 at Yale University These papers from the conference attempt to define what is coming to be known as the new urban history The cities studied range from small communities such as Springfield Massachusetts and Poughkeepsie New York to giants like Philadelphia Chicago and Boston While the majority of the contributions deal with American cities four essays examine cities in Canada England France and Colombia The studies focus on the dimensions of mobility and stability in the social structure of nineteenth century cities Within this general frame the essays explore such areas as urban patterns of class stratification changing rates of occupational and residential mobility social origins of particular elite groups the relations between political control and social class differences in opportunities for various ethnic

groups and the relationships between family structure and city life In all these fields the authors relate sociological theory to the historical materials a complex yet readable interdisciplinary portrait of the origins of modern city life is the result
