Poverty And Public Policy An Evaluation Of Social Science Research:

Why America Lost the War on Poverty--And How to Win It Frank Stricker,2011-02-01 In a provocative assessment of American poverty and policy from 1950 to the present Frank Stricker examines an era that has seen serious discussion about the causes of poverty and unemployment Analyzing the War on Poverty theories of the culture of poverty and the underclass the effects of Reaganomics and the 1996 welfare reform Stricker demonstrates that most antipoverty approaches are futile without the presence or creation of good jobs Stricker notes that since the 1970s U S poverty levels have remained at or above 11% despite training programs and periods of economic growth The creation of jobs has continued to lag behind the need for them Stricker argues that a serious public debate is needed about the job situation social programs must be redesigned a national health care program must be developed and economic inequality must be addressed He urges all sides to be honest if we don t want to eliminate poverty then we should say so But if we do want to reduce poverty significantly he says we must expand decent jobs and government income programs redirecting national resources away from the rich and toward those with low incomes *Why America Lost the War on Poverty And How to Win It* is sure to prompt much needed debate on how to move forward *Poverty and Public Policy* Vincent T. Covello,1980 **Handbook of Public Policy**

Clearinghouse Review ,1977 **The Future of Evaluation** Wolfgang Meyer,Reinhard Stockmann,2016-01-26 Evaluation has become an important instrument for rational governance and is used in an increasing number of countries and policy fields Recent developments at the global national and local level are changing the conditions and functions of evaluation worldwide This book examines current global development trends and changing demands for evaluation It addresses issues surrounding professionalisation and globalisation examining the need to strengthen accountability for social

development in various different policy fields regions and countries to improve governance and its impacts on social betterment It also considers issues of quality utility and further education and the upgrading of evaluation in a broad variety of different organisations such as multilateral donor organisations national public administrations private consultancies civil society organisations universities and research institutes With contributions from 30 different countries this book combines a broad variety of viewpoints to examine the global future of evaluation

The Great Recession and the Distribution of Household Income Stephen P. Jenkins,2013 The so called Great Recession that followed the global financial crisis at the end of 2007 was the largest economic downturn since the 1930s for most rich countries To what extent were household incomes affected by this event and how did the effects differ across countries This is the first cross national study of the impact of the Great Recession on the distribution of household incomes Looking at real income levels poverty rates and income inequality it focusses on the period 2007-9 but also considers longer term impacts Three vital contributions are made First the book reviews lessons from the past about the relationships between macroeconomic change and the household income distribution Second it considers the experience of 21 rich OECD member countries drawing on a mixture of national accounts and labour force and household survey data Third the book presents case study evidence for six countries Germany Ireland Italy Sweden the UK and the USA The book shows that between 2007 and 2009 government support through the tax and benefit system provided a cushion against the downturn and household income distributions did not change much But after 2009 there is likely to be much greater change in incomes as a result of the fiscal consolidation measures that are being put into place to address the structural deficits accompanying the recession The book's main policy lesson is that stabilisation of the household income distribution in the face of macroeconomic turbulence is an achievable policy goal at least in the short term

Siegfried, 2012-03-05 This book consists of 12 case studies from building the foundation for eliminating the military draft in 1973 to implementing the Pension Reform Act in 2006 that demonstrate how economic research has improved economic and social conditions over the past half century by influencing public policy decisions **Handbook of Community Psychology** Julian Rappaport, Edward Seidman, 2000-05-31 This comprehensive handbook the first in its field brings together 106 different contributors The 38 interrelated but at the same time independent chapters discuss key areas including conceptual frameworks empirically grounded constructs intervention strategies and tactics social systems designs assessment and analysis cross cutting professional issues and contemporary intersections with related fields such as violence prevention and HIV AIDS **Whose Welfare?** Steven Michael Teles, 1996 Few American social programs have been more unpopular controversial or costly than Aid to Families with Dependent Children AFDC Its budget now in the tens of billions of dollars has become a prominent target for welfare reformers and outraged citizens Indeed if public opinion ruled AFDC would be discarded entirely and replaced with employment Yet it persists Steven Teles s provocative study reveals why and tells us what we should do about it Teles argues that over the last thirty years political debate on AFDC has been dominated by an impasse created by what he calls ideological dissensus an enduring conflict between opposing cultural elites that have largely disregarded public opinion Thus he contends one must examine the origins and persistence of elite conflict in order to fully comprehend AFDC s immunity to the reform it truly needs the kind that unites the elements of order equality and individualism central to the American creed One of the first studies to analyze AFDC from a New Democrat position Whose Welfare sheds new light on the controversial role of the courts in AFDC the rise of welfare waivers in the mid 1980s the failure of the Clinton welfare plan and the victory of block granting over policy oriented welfare reform Teles however goes beyond mere critical analysis to advocate specific approaches to reform His thoughtful call for compromise built around the centrality of work individual

responsibility and opportunity offers a means for dissolving dissensus and genuine hope for changing an outdated and ineffectual welfare system Based on interviews with participants in the AFDC policymaking process as well as an unparalleled synthesis of the voluminous AFDC literature Whose Welfare will appeal to a wide array of welfare scholars policymakers and citizens eager to better understand the tumultuous history of this problematic program and how it might fare in the wake of the fall elections Hearings, Reports and Prints of the Senate Committee on Government Operations United States. Congress. Senate. Committee on Government Operations,1967 *Changing Inequalities and Societal Impacts in Rich Countries* Brian Nolan,Wiemer Salverda,Daniele Checchi,Ive Marx,Abigail McKnight,István György Tóth,Herman G. van de Werfhorst,2014-01-30 There has been a remarkable upsurge of debate about increasing inequalities and their societal implications reinforced by the economic crisis but bubbling to the surface before it This has been seen in popular discourse media coverage political debate and research in the social sciences The central questions addressed by this book and the major research project GINI on which it is based are Have inequalities in income wealth and education increased over the past 30 years or so across the rich countries and if so why What are the social cultural and political impacts of increasing inequalities in income wealth and education What are the implications for policy and for the future development of welfare states In seeking to answer these questions this book adopts an interdisciplinary approach that draws on economics sociology and political science and applies a common analytical framework to the experience of 30 advanced countries namely all the EU member states except Cyprus and Malta together with the USA Japan Canada Australia and South Korea It presents a description and analysis of the experience of each of these countries over the past three decades together with an introduction an overview of inequality trends and a concluding chapter highlighting key findings and implications These case studies bring out the variety of country experiences and the importance of framing inequality trends in the institutional and policy context of each country if one is to adequately capture and understand the evolution of inequality and its impacts
