## **Poverty Equality And Growth The Politics Of Economic Need In Postwar Japan:**

*Poverty, Equality, and Growth* Deborah J. Milly, 2020-03-23 In striking contrast to the large indigent population in Japan in the 1950s very few Japanese live in poverty today This book explains the Japanese government's decision to respond to poverty by promoting equality as the basis for a social compromise Milly argues that to account for why and how political actors crafted a program that won acceptance we must look beyond them and identify how they relied on knowledge and normative arguments This book straddles theoretical fault lines in comparative politics by exploring the interactions among choice language knowledge and institutions in policy processes and has implications for the ongoing debate between proponents of rational choice theory as a universal explanation for the decisions of political actors and those who focus on historically or culturally specific conditions

Writing Home: Representations of the Native Place in Modern Japanese Literature Stephen Dodd, 2020-03-17 This book examines the development of Japanese literature depicting the native place (*furusato*) from the mid Meiji period through the late 1930s as a way of articulating the uprootedness and sense of loss many experienced as Japan modernized. The 1890s witnessed the appearance of fictional works describing a city dweller who returns to his native place where he reflects on the evils of urban life and the idyllic past of his childhood home. The book concentrates on four authors who typify this trend: Kunikida Doppo, Shimazaki Tōson, Sat Haruo, and Shiga Naoya. All four writers may be understood as trying to make sense of contemporary Japan. Their works reflect their engagement with the social, intellectual, economic, and technological discourses that created a network of shared experience among people of a similar age. This common experience allows the author to chart how these writers' works contributed to the general debate over Japanese national identity in this period. By exploring the links between *furusato* literature and the theme of national identity, he shows that the debate over a common language that might transparently express the modern experience helped shape a variety of literary forms used to present the native place as a distinctly Japanese experience.

*Fu Shan's World* Qianshen Bai, 2020-03-23 For 1,300 years, Chinese calligraphy was based on the elegant art of Wang Xizhi (A.D. 303–361). But the seventeenth-century emergence of a style modeled on the rough, broken epigraphs of ancient bronzes and stone artifacts brought a revolution in calligraphic taste. By the eighteenth century, this led to the formation of the *stele school* of calligraphy, which continues to shape Chinese calligraphy today. A dominant force in this school was the eminent calligrapher and art theorist Fu Shan (1607–1685). Because his work spans the late Ming/early Qing divide, it is an ideal prism through which to view the transformation in calligraphy. Rather than seek a single explanation for the change in calligraphic taste, the author demonstrates and analyzes the heterogeneity of the cultural, social, and political processes behind it. Among other subjects, the book covers the late Ming interaction between high and low culture, the role of publishing, the Ming loyalist response to the Qing, and early Qing changes in intellectual discourse. In addition to the usual approach of art historians, it adopts the theoretical perspectives of such fields as material culture, print culture, and social and intellectual history.

Developmentalism Graham Harrison, 2020-06-19 Why do so few countries achieve development success Achieving development requires many changes over a short period of time generating instability and risk It is a deep and integrated economy of change involving force strategic thinking and ideological conviction it emerges when successful development is seen as necessary for the survival of a political order Developmentalism engages with the moral issues that

this raises Developmentalism The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change a shift from a state of capital ascendance to capital dominance It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible However capitalist development is extremely difficult and requires a highly exacting political endeavour The politics of development is conceptualized as developmentalism a strategy and ideology in which governments exercise heavy directive power endure instability and crisis and secure a rudimentary legitimacy for their efforts This book argues that developmentalism requires a conflation of successful capitalist transformation with some form of existential insecurity of the state itself It flourishes when capitalist transformation connects to profound questions of sovereignty statehood nation building and elite survival Developmentalism shows deep contextualisation of capitalist transformation as well as the massive improvements in material life that it has generated

*Magazines and the Making of Mass Culture in Japan* Amy Bliss Marshall, 2019-03-14 *Magazines and the Making of Mass Culture in Japan* provides a detailed yet approachable analysis of the mechanisms central to the birth of mass culture in Japan by tracing the creation production and circulation of two critically important family magazines Kingu King and Ie no hikari Light of the Home These magazines served to embed new instruments of mass communication and socialization within Japanese society and created mechanisms to facilitate the dissemination of hegemonic forms of discourse in the first half of the twentieth century The amazing success of Kingu and Ie no hikari during the 1920s and 1930s not only established and normalized participation in a Japanese mass national audience a community which had previously not existed but also facilitated the rise of Japanese mass consumer culture in the postwar years Amy Bliss Marshall argues that the postwar mass national consumer in Japan is foreshadowed by the mass national audience created by family magazines of the interwar era This book narrates the development of such publications one explicitly capitalist and one outwardly agrarian based on missions with an overarching desire to create a mass audience *Magazines and the Making of Mass Culture in Japan* highlights the importance of the seemingly innocuous acts of mass leisure consumption of magazines and the goods advertised therein aiding our understanding of the creation and direction of a new form of social participation and understanding an essential part of not only the culture but also the politics of the interwar period

*Body and Face in Chinese Visual Culture* Hung Wu, Katherine R. Tsang, 2020-03-17 Traditionally the Chinese body was approached as a totality and explained by sweeping comparisons of the differences that distinguished Chinese examples from their Western counterparts Recently scholars have argued that we must look at particular examples of Chinese images of the body and explore their intrinsic conceptual complexity and historical specificity The twelve contributors to this volume adopt a middle position They agree that Chinese images are conditioned by indigenous traditions and dynamics of social interaction but they seek to explain a general Chinese body and face by charting multiple specific bodies and faces All of the chapters are

historical case studies and investigate particular images such as Han dynasty tomb figurines Buddhist texts and illustrations pictures of deprivation illness deformity and ghosts clothing formal portraiture and modern photographs and films From the diversity of art forms and historical periods studied there emerges a more complex picture of ways that the visual culture of the body and face in China has served to depict the living memorialize the dead and present the unrepresentable in art

Emperor and Aristocracy in Japan, 1467-1680 Lee Butler, 2020-03-23 An institution in decline possessing little power in an age dominated by warriors Or a still potent symbol of social and political legitimacy Emperor and Aristocracy in Japan traces the fate of the imperial Japanese court from its lowest point during the turbulent century long sengoku when the old society built upon the strength and influence of the court the priesthood and a narrow warrior elite was shaken to its foundations to the Tokugawa era when court culture displayed renewed vitality and tea gatherings flower arranging and architecture flourished In determining how the court managed to persist and survive Butler looks into contemporary documents diaries and letters to reveal the court's internal politics and protocols hierarchies finances and ceremonial observances Emperor and courtiers adjusted to the prominence of the warrior elite even as they held on to the ideological advantages bestowed by birth tradition and culture To this historical precedent the new wielders of power paid dutiful homage ever mindful that ranks and titles as well as the political blessing of the emperor were advantageous marks of distinction

**The Golden Age of the U.S.-China-Japan Triangle, 1972-1989** Ezra F. Vogel, Ming Yuan, Akihiko Tanaka, 2020-03-23 A collaborative effort by scholars from the United States China and Japan this volume focuses on the period 1972-1989 during which all three countries brought together by a shared geopolitical strategy established mutual relations with one another despite differences in their histories values and perceptions of their own national interest Although each initially conceived of its political and security relations with the others in bilateral terms the three in fact came to form an economic and political triangle during the 1970s and 1980s But this triangle is a strange one whose dynamics are constantly changing Its corners the three countries and its sides the three bilateral relationships are unequal while its overall nature the capacity of the three to work together has varied considerably as the economic and strategic positions of the three have changed and post Cold War tensions and uncertainties have emerged

**Practices of the Sentimental Imagination** Jonathan Zwicker, 2020-03-23 The history of the book in nineteenth century Japan follows an uneven course that resists the simple chronology often used to mark the divide between premodern and modern literary history By examining the obscured histories of publication circulation and reception of widely consumed literary works from late Edo to the early Meiji period Jonathan Zwicker traces a genealogy of the literary field across a long nineteenth century one that stresses continuities between the generic conventions of early modern fiction and the modern novel In the literature of sentiment Zwicker locates a tear streaked lens through which to view literary practices and readerly expectations that evolved across the century Practices of the Sentimental Imagination emphasizes both qualitative and quantitative aspects of literary production and

consumption balancing close readings of canonical and noncanonical texts sophisticated applications of critical theory and careful archival research into the holdings of nineteenth century lending libraries and private collections By exploring the relationships between and among Japanese literary works and texts from late imperial China Europe and America Zwicker also situates the Japanese novel within a larger literary history of the novel across the global nineteenth century *Radicals and Realists in the Japanese Nonverbal Arts* Thomas R. H. Havens, 2006-07-31 *Radicals and Realists* is the first book in any language to discuss Japan's avant garde artists their work and the historical environment in which they produced it during the two most creative decades of the twentieth century the 1950s and 1960s Many of the artists were radicals rebelling against existing canons and established authority Yet at the same time they were realists in choosing concrete materials sounds and themes from everyday life for their art and in gradually adopting tactics of protest or resistance through accommodation rather than confrontation Whatever the means of expression the production of art was never devoid of historical context or political implication Focusing on the nonverbal genres of painting sculpture dance choreography and music composition this work shows that generational and political differences not artistic doctrines largely account for the divergent stances artists took vis a vis modernism the international arts community Japan's ties to the United States and the alliance of corporate and bureaucratic interests that solidified in Japan during the 1960s After surveying censorship and arts policy during the American occupation of Japan 1945-1952 the narrative divides into two chronological sections dealing with the 1950s and 1960s bisected by the rise of an artistic underground in Shinjuku and the security treaty crisis of May 1960 The first section treats Japanese artists who studied abroad as well as the vast and varied experiments in each of the nonverbal avant garde arts that took place within Japan during the 1950s after long years of artistic insularity and near stasis throughout war and occupation Chief among the intellectuals who stimulated experimentation were the art critic Takiguchi Shuzo the painter Okamoto Taro and the businessman painter Yoshihara Jiro The second section addresses the multifront assault on formalism confusingly known as anti art led by visual artists nationwide Likewise composers of both Western style and contemporary Japanese style music increasingly chose everyday themes from folk music and the premodern musical repertoire for their new presentations Avant garde print makers sculptors and choreographers similarly moved beyond the modern and modernism in their work A later chapter examines the artistic apex of the postwar period Osaka's 1970 world exposition where more avant garde music painting sculpture and dance were on display than at any other point in Japan's history before or since *Radicals and Realists* is based on extensive archival research numerous concerts performances and exhibits and exclusive interviews with more than fifty leading choreographers composers painters sculptors and critics active during those two innovative decades Its accessible prose and lucid analysis recommend it to a wide readership including those interested in modern Japanese art and culture as well as the history of the postwar years *The "Greatest Problem"* Trent E. Maxey, 2020-05-18 At its inception in 1868 the modern Japanese state pursued policies and created institutions that

lacked a coherent conception of religion Yet the architects of the modern state pursued an explicit religious settlement as they set about designing a constitutional order through the 1880s As a result many of the cardinal institutions of the state particularly the imperial institution eventually were defined in opposition to religion Drawing on an assortment of primary sources including internal government debates diplomatic negotiations and the popular press Trent E Maxey documents how the novel category of religion came to be seen as the greatest problem by the architects of the modern Japanese state In Meiji Japan religion designated a cognitive and social pluralism that resisted direct state control It also provided the modern state with a means to contain regulate and neutralize that plurality

**Empires on the Waterfront** Catherine L. Phipps,2020-05-11 Empires on the Waterfront offers a new spatial framework for understanding Japan s extended transition into the modern world of nation states This study examines a largely unacknowledged system of special trading ports that operated under full Japanese jurisdiction in the shadow of the better known treaty ports By allowing Japan to circumvent conditions imposed on treaty ports the special trading ports were key to achieving autonomy and regional power Catherine L Phipps uses an overtly geographic approach to demonstrate that the establishment of Japan s maritime networks depended on initiatives made and carried out on multiple geographical scales global national and local The story of the special trading ports unfolds in these three dimensions Through an in depth assessment of the port of Moji in northern Kyushu Empires on the Waterfront recasts the rise of Japan s own empire as a process deeply embedded in the complicated system of maritime relations in East Asia during the pivotal second half of the nineteenth century
