**Decentralization of Education** Ketleen Florestal, Robb Cooper, 1997-01-01 In practice most education systems have both centralized and decentralized elements Planners involved in a decentralizing reform must identify which components of the system are more appropriately managed at the central level and which at the local level This book is intended to inform education policymakers planners and practitioners about international experience in the legal aspects of decentralizing basic education It also provides a basic understanding of how laws and regulations can be used for education reform For purposes of the discussion decentralization is used to describe efforts to transfer decision making power in basic education from the administrative center of a country to authorities closer to users The term is also used in a more technical sense to describe one of the many forms this type of reform can take and in this sense it is contrasted with deconcentration and devolution as educational reforms The first section examines the general legal aspects of decentralization and the second looks more closely at decentralization laws and regulations The third section is in effect a checklist of items that should be included in decentralization laws and the fourth section provides a road map to help the planner prepare and implement the laws required for reform Although an effort has been made to keep the discussion general enough for use in many countries the analysis is based on the legal systems of the Western world or those that they inspired Contains 35 references SLD
