Set against the backdrop of dramatic world order transformations across the 1970s and 1980s this book examines the competing planetary perspectives of the Brandt Commission and the multinationals arguing that the missed opportunities of these decades created a path for contemporary political and economic crises At the Global South's request for a New International Economic Order the Brandt Commission chaired by Willy Brandt was appointed in 1977 The commission with a goal to formulate arguments on how to close the gap between the North and South developed a planetary perspective grounded in economic redistribution ecological considerations and disarmament The multinationals at that time a new kind of business corporation repressed Brandt's vision by seeking freedom from political monitoring This book discusses the ways
