ISACA generally considers capacity in terms of the amount of time capacity is available within the existing grid. Organizations often consider grids that can deliver power output to the grid on an intermittent, typically daily, cultural basis, based on weather, daylight and other factors. ISACA usually recognizes all the generation capacity that the grid has up to the limit of the physical grid. The "available" capacity is the amount of capacity that can be used on an ongoing, for-profit or not-for-profit basis to support the demand to the grid on a relatively continuous basis.

Power And Class In Africa:

Power and Class in Africa Irving Leonard Markovitz,1977 **Studies in Power and Class in Africa** Irving Leonard Markovitz,1987 These thirteen original essays bring the concept of social class to the analysis of contemporary African politics Each study considers different aspects of a single theme the authoritative allocation of values or who gets what when where and why and who gets left out The essays address problems of major concern in the daily lives of ordinary people pointing out just how precarious life was for most Africans during and after the Colonial period They show how class conflict intensified with war and depression how farmers fled to the city to maintain their independence and how migrant workers struggled to protect their declining standard of living The authors who represent a cross section of political perspectives and disciplinary backgrounds also shed light on the importance of the state religion ideology gender ethnicity language and international relations in determining policy and in understanding society in general Challenging the conventional academic and popular views of Africa these powerful studies hold implications which if heeded could affect future scholarship as well as policy

Gerhart, 2023-04-28 This book better than any I have seen provides an understanding of the politics and ideology of orthodox African nationalism or Black Power in South Africa since World War II from the Youth League of the African Student National Congress ANC of the late 1940s to the South African Student Organization SASO and the Black Consciousness Movement of the 1970s Perspective Clarifies some of the main issues that have divided the black leadership and rescues the work of some pioneering nationalist theorists It s an absorbing piece of history New York Times Informative and well researched She ably explores the nuances of the two main movements until 1960 and explains why blacks were so receptive to black consciousness in the late Sixties New York Review This book better than any I have seen provides an understanding of the politics and ideology of orthodox African nationalism or Black Power in South Africa since World War II from the Youth League of the African Student National Congress ANC Race, Class, and Power Leo Kuper, 2017-07-05 Examining in detail the apparently inexorable polarization of society in such countries as Rwanda Algeria and South Africa the author questions whether current theories correctly explain the past or offer adequate

guides for the future In their place he puts forward an alternative neo Durkheimian view of the possibility of non violent revolutionary change based on the development of such social and cultural continuities as already exist within each plural society But he warns that this is an age of passionate commitment to violence in which vicarious killers abound in search of a Vietnam of their own The aim of this groundbreaking and challenging book is to create theoretical perspectives in which to view the racial conflict of plural societies Written in the turbulent early 1970s the book demonstrates the inadequacy of then prevailing views such as Marxist interpretations of racial conflict as class struggle and the Fanon a priori rejection of non violent techniques of change which Kuper holds responsible for the acceptance of what he calls the platitudes of violence The book concludes with more personal sections focusing on the author s struggles with the then prevailing South African society critiques of that and censorship of his attempts to make these public In the light of subsequent changes in South Africa many decades later this book serves not only as an important work of political sociology but as a personal testament to the fight against racism in South Africa Leo Kuper was professor of sociology and director of the African Studies Center at the University of California Los Angeles A South African by birth he was one of the first writers on genocide as well as other aspects of African studies and urban sociology His major book Genocide Penguin 1981 remains in print The Leo Kuper Foundation is a non governmental organization dedicated to the eradication of genocide through research advice and education It was created in Washington DC in 1994 following the death of Leo Kuper with the aim of improving measures to prevent genocide The main area of work for the past five years has been in support of the creation of an International Criminal Court Troy Duster is director at the Institute for the History of the Production of Knowledge New York University
