Power And Economic Institutions Reinterpretations In Economic History:

Power and Economic Institutions Bo Gustafsson, 1991 This important book written by leading economists and economic historians analyses how institutions are shaped by economic forces how institutions shape economic behaviour and how economics and politics interact in economic development Part I deals with traditional economics and challenges received views of the efficiency of agriculture Part II focuses on transitions to capitalism and recent theories of the origins of capitalist hierarchy at the firm level The final part deals with the role of control organizations and politics in capitalist development

Theories of Power and Domination Angus Stewart, 2001-03-20 Power and domination are central concepts in social science yet up to now they have been undertheorized This wide ranging book guides students through the complexities and implications of both concepts It provides systematic accounts of current debates about the dynamics and rationale of state power in an era of globalization social citizenship and the significance of social movements The contributions of Parsons Giddens Foucault Mann Arendt Habermas and Castells are clearly set out and critically assessed

Escape from the Market Michael Huberman, 1996-09-12 At the outset of the industrial revolution the Lancashire labour market was a model of thoroughgoing competition Wages adjusted quickly and smoothly to changes in the demand for and supply of labour Within two generations however workers and firms had retreated from the market Instead of busting wages firms paid fixed rates instead of breaking ties on short notice workers sought longer term associations Social norms doing the right thing protected and preserved the fresh labour market arrangements This book explains the causes and effects of changes in the labour market in the context of developments in labour economics and fresh research in social and economic history

Craft Guilds in the Early Modern Low Countries Catharina Lis, Hugo Soly, 2017-03-02 In the half millennium of their existence guilds in the Low Countries played a highly significant role in shaping the societies of which they were a part One key aspect that has been identified in recent historical research to explain the survival of the guilds for such a long time is the guilds continued adaptability to changing circumstances This idea of flexibility is the point of departure for the essays in this volume which sheds new light on the corporate system and identifies its various features and regional variances The contributors explore the interrelations between economic organisations and political power in late medieval and early modern towns and address issues of gender religion and social welfare in the context of the guilds This cohesive and focussed volume will provide a stimulus for renewed interest and further research in this area It will appeal to scholars and students with an interest in early modern economic social and cultural history in particular but will also be valuable to those researching into political religious and gender history

Organisations in Action Peter A. Clark, 2000 This original and ambitious work provides a fascinating examination of organizations from both a post modern and new organizational economics perspective Combining strategy international business and organisational theory it represents a ground breaking critique of prevailing mainstream modernist theories of organization Distinctive features include a comprehensive analysis of

social and organizational theory discussion and exploration of knowledge capitalism a critique of core competencies and resource based approaches to strategy human resource management and organizational behaviour In an essential area of study for every business undergraduate and reflective manager this outstanding book pulls together material which is currently scattered and poorly synthesised and examines high profile real world business examples **Organizations in Action** Peter Clark,2012-10-12 This original and ambitious work provides a fascinating examination of organizations from both a post modern and new organizational economics perspective Combining strategy international business and organisational theory it represents a ground breaking critique of prevailing mainstream modernist theories of organization Distinctive features include a comprehensive analysis of social and organizational theory discussion and exploration of knowledge capitalism a critique of core competencies and resource based approaches to strategy human resource management and organizational behaviour In an essential area of study for every business undergraduate and reflective manager this outstanding book pulls together material which is currently scattered and poorly synthesised and examines high profile real world business examples *Economics and Utopia* Geoffrey M Hodgson,2002-01-04 Since the fall of the Berlin Wall we have been told that no alternative to Western capitalism is possible or desirable This book challenges this view with two arguments First the above premise ignores the enormous variety within capitalism itself Second there are enormous forces of transformation within contemporary capitalisms associated with moves towards a more knowledge intensive economy These forces challenge the traditional bases of contract and employment and could lead to a quite different socio economic system Without proposing a static blueprint this book explores this possible scenario *Handbook Global History of Work* Karin Hofmeester,Marcel van der Linden,2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession **Institutional Change And Rural Industrialization In China: The Putting-out System In Handicraft Industry In Late Qing And Early Republic Period** Feizhou Zhou,2018-11-16 This book explores the development of the putting out system in hand woven textile industries in late Qing Dynasty and China s Republican Period In classic sociology theory the putting out system in handcraft production was regarded as traditional and inefficient In the context of Republican China it was believed that this kind of household based production system would have

totally failed in competition with the factory system of machinery production. However, this book exhibits the historical fact that the putting out system was booming in handcraft textile production and subsequently provides an explanation to this phenomenon from the perspectives of institutional analysis and quantitative modeling. With rich county level data and comprehensive analysis, this book is valuable for both researchers, academics, and students in economics and social history studies.

The Oxford Handbook of Critical Management Studies Mats Alvesson, Todd Bridgman, Hugh Willmott, 2009-06-18

Critical Management Studies (CMS) has emerged as a movement that questions the authority and relevance of mainstream thinking and practice. Critical of established social practices and institutional arrangements, it challenges prevailing systems of domination and promotes the development of alternatives to them. CMS draws upon diverse critical traditions. Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory. From these foundations, CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives ranging from labour process theory to radical feminism. In recent times, a set of ideas broadly labelled poststructuralist have been developed to complement and challenge the insights of Critical Theory, giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice. The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches, key topics, issues, and subject specialisms in management studies, as well as a set of reflections on the progress and prospects of CMS. Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice. Given the rapid growth of the CMS movement, its ever increasing theoretical and geographical diversity, and its outreach into the public sphere, The Oxford Handbook of Critical Management Studies is a timely publication. In addition to UK contributors, where CMS has developed most rapidly, there is strong representation from North American contributors, as well as from areas where CMS has taken hold more recently, such as Australasia.

Experiencing Wages Peter Scholliers, Leonard Schwarz, 2004-07-01

When discussing wages, historians have traditionally concentrated on the level of wages, much less on how people were paid for their work. Important aspects were thus ignored, such as how frequently wages were actually paid, how much of the wage was paid in non-monetary form, whether as traditional perquisites or community relief, especially when there was often insufficient coinage available to pay wages. Covering a wide geographical area ranging from Spain to Finland and time span ranging from the sixteenth century to the 1930s, this volume offers fresh perspectives on key areas in social and economic history, such as the relationship between customs, moral economy, wages, and the market, changing pay and wage forms, and the relationship between age, gender, and wages.

The Dismal Science Stephen A. Marglin, 2008-01-31

Insurance may be an efficient way of organizing resources, but the deep social and human ties that constitute community are weakened by the shift from reciprocity to market relations. This book dissects the ways in which foundational assumptions of economics justify a world in which social connections are impoverished.

Authority and

Control in Modern Industry Paul L. Robertson, 1999-06-10 This book takes a variety of theoretical and empirical approaches to the issue of organization and authority in the modern corporation Including contributions from scholars in the US Germany and Japan it considers such relations and the possible advantages of family ownership The book combines historical and contemporary case studies from a range of countries
Innovation and Creativity in Late Medieval and Early Modern European Cities Karel Davids, Bert De Munck, 2016-05-23 Late medieval and early modern cities are often depicted as cradles of artistic creativity and hotbeds of new material culture Cities in renaissance Italy and in seventeenth and eighteenth century northwestern Europe are the most obvious cases in point But how did this come about Why did cities rather than rural environments produce new artistic genres new products and new techniques How did pre industrial cities evolve into centres of innovation and creativity As the most urbanized regions of continental Europe in this period Italy and the Low Countries provide a rich source of case studies as the contributors to this volume demonstrate They set out to examine the relationship between institutional arrangements and regulatory mechanisms such as citizenship and guild rules and innovation and creativity in late medieval and early modern cities They analyze whether in what context and why regulation or deregulation influenced innovation and creativity and what the impact was of long term changes in the political and economic sphere

Firms, Markets and Economic Change Richard N. Langlois, Paul L. Robertson, 1995-07-06 Traditional western forms of corporate organization have been called into question by the success of Japanese keiretsu Firms Markets and Economic Change draws on industrial economics business strategy and economic history to develop an evolutionary model to show when innovation is best undertaken The authors argue that innovation is a complex process that defies neat categorization and government policy should be to facilitate change rather than to direct it
Learning on the Shop Floor Bert De Munck, Steven L. Kaplan, Hugo Soly, 2007-12-01 Apprenticeship or vocational training is a subject of lively debate Economic historians tend to see apprenticeship as a purely economic phenomenon as an incomplete contract in need of legal and institutional enforcement mechanisms The contributors to this volume have adopted a broader perspective They regard learning on the shop floor as a complex social and cultural process to be situated in an ever changing historical context The results are surprising The authors convincingly show that research on apprenticeship and learning on the shop floor is intimately associated with migration patterns family economy and household strategies gender perspectives urban identities and general educational and pedagogical contexts
Workers of the World Marcel van der Linden, 2008-10-02 The studies offered in this volume integrate the history of wage labor of slavery and of indentured labor They contribute to a Global Labor History freed from Eurocentrism and methodological nationalism
The New Politics of the Welfare State Paul Pierson, 2001-04-05 The welfare states of the affluent democracies now stand at the centre of political discussion and social conflict In these path breaking essays an international team of leading analysts rejects simplistic claims about the impact of economic globalization Economic demographic and social pressures on the welfare state are very real but many of the most

fundamental challenges have little to do with globalization Nor do the authors detect signs of a convergence of national social policies towards an American style lowest common denominator The contemporary politics of the welfare state takes shape against a backdrop of both intense pressures for austerity and enduring popularity Thus in most of the affluent democracies the politics of social policy centre on the renegotiation restructuring and modernization of the post war social contract rather than its dismantling The authors examine a wide range of countries and public policies arenas including health care pensions and labour markets They demonstrate how different national settings affect whether and on what terms centrist efforts to restructure the welfare state can succeed

The Rise and Decline of Dutch Technological Leadership (2 Vols)

Karel Davids, 2008-08-31 Technological leadership is an important topic in economic history and the history of technology This book addresses the issue of technological leadership by means of an in depth study on the Dutch Republic once described as the first modern economy Drawing on extensive research in archives in Europe and a vast amount of printed sources and secondary literature it provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general This book is thus relevant for the study of technological leadership the development of technology in the early modern period as well as the history of the economic expansion of the Dutch Republic
