**From Hierarchy to Anarchy** J. Larkins,2009-11-23 This book considers the rise of territoriality in international relations

**War and the Rise of the State** Bruce D. Porter, 2002-02-01 States make war but war also makes states. As Publishers Weekly notes, Porter, a political scientist at Brigham Young University, demonstrates that wars have been catalysts for increasing the size and power of Western governments since the Renaissance. The state's monopoly of effective violence has diminished not only individual rights and liberties but also the ability of local communities and private associates to challenge the centralization of authority. Porter's originality lies in his thesis that war, breaking down barriers of class, gender, ethnicity, and ideology, also contributes to meritocracy, mobility, and above all, democratization. Porter also posits the emergence of the Scientific Warfare State, a political system in which advanced technology would render obsolete mass participation in war. This provocative study merits wide circulation and serious discussion.

The Late Medieval Age of Crisis and Renewal, 1300-1500 Clayton J. Drees, 2000-11-30 As part of a unique series covering the grand sweep of Western civilization from ancient to present times, this biographical dictionary provides introductory information on 315 leading cultural figures of late medieval and early modern Europe. Taking a cultural approach not typically found in general biographical dictionaries, the work includes literary, philosophical, artistic, military, religious, humanistic, musical, economic, and exploratory figures. Political figures are included only if they patronized the arts, and coverage focuses on their cultural impact. Figures from western European countries such as Italy, France, England, Iberia, the Low Countries, and the Holy Roman Empire predominate, but outlying areas such as Scotland, Scandinavia, and Eastern Europe are also represented. Late medieval Europe was an age of crisis. With the Papacy removed to Avignon, the schism in the Catholic Church shook the very core of medieval belief. The Hundred Years War devastated France. The Black Death decimated the population. Yet out of this crisis grew an age of renewal leading to the Renaissance. The great Italian city states developed. Humanism reawakened interest in the cultures of ancient Greece and Rome. Dante and Boccaccio began writing in their Tuscan vernacular. Italian artists became humanists and flourished. As the genius of Italy began spreading to northern and western Europe at the end of the 15th century, the age of renewal was completed. This book provides thorough, basic information on the major cultural figures of this tumultuous era of crisis and renewal.

*Episcopal Power and Florentine Society, 1000-1320* George Williamson Dameron, 1991 This first detailed study of the bishops of Florence tells the story of a dynamic Italian lordship during the most prosperous period of the Middle Ages. Drawing upon a rich base of primary sources, Dameron demonstrates that the nature of the Florentine episcopal lordship results from the tension between seigniorial pressure and peasant resistance. Implicit throughout is the assumption that episcopal lordship relied upon both the bishop's jurisdictional power and his spiritual or sacramental power. The story of the Florentine bishops illuminates important moments in Italian history. The development of the Florentine elite, for example, is closely tied to the political and economic privileges they derived from their access to

ecclesiastical property A study of the bishopric's vast holdings in the major river valleys surrounding Florence also provides valuable insight into the nature of the interrelation between city and countryside Comparisons with lordships in other Italian cities contrast with and define the nature of medieval lordship This economic social and political history addresses issues of concern to a wide audience of historians the emergence of the commune the social development of the nobility the nature of economic change before the Black Death and the transition from feudalism to capitalism
